Also you can add on your thread,

e-whoring spreading method

before you start to spread, FUD crypt your server (yes it will be .exe) change to icon to a jpeg or png ico, rename it to .scr (yes it will say it may corrupt the file, but ignore that it works) and test it before spreading; scan on novirus thanks too.

Example chat.

Vic: Hi

You: Heyyy asl?? :)

Vic: 25/M/UK, you?

You: 19/F/GER, you got any pics ;)?

Vic: I do/don't, you?

You: Yaaa, shall I go first?

Vic: (of 200 chases; 199 say'd "SURE") but they request photo share

You: Can't so sharing baby :(Old version, can you send directly?

Vic: Sending you the server, don't even open it, just delete it and say wow nice baby :))) Nows my turn! :D

You: Send them the server

Vic: Whats scr?

You: Screen Image baby :DD

Vic: Oh ok (200 chases; 100 say Okay and accept).

(When its finished uploading to your victim)

You: I hope you like what you see ;)

Vic: It won't open

Now just hit /ignore and you are done, got one victim.

EXTRA INFO:

I got about 100 victims from a few days of spreading. Yeah it was a while back but when you get into it you will get more and more.

In my opinion you use this spreading method to get some teen victims. If you are in a teens chat room. But you can use yahoo chat rooms too, but you will not steal anything from them (you won't

have anything to steal :D), its only for webcam and spying shit. And yes if you want female vics you need to rename yourself to a male name. Hope this cleared something about this spreading method.

Hotshot55 - December 3, 2010, 7:52 pm

lol old method buddy but still works

Stalkar - December 3, 2010, 9:05 pm

I've tried this method most people on there are hackers anyways.

In addition, you can go to Join "vietnam" chat in yahoo! messenger ! Most of them don't notice the difference between .exe and .jpg files =))

I know it's a boring method to spread but when u spend time with it, you'll get more and more victims :X
