Thread: [\[\\$10 / Lifetime\]\[HTTP Bot\] HTTPControl \[HTTP Bot\]\[\\$10 / Lifetime\]](#)

Shannon R. - December 4, 2010, 5:12 am

HTTPControl

Features/Description

HTTPControl is a very stable, HTTP Bot. It includes its own custom features, such as the slowloris feature. Basically what the slowloris feature/attack does it uses all the bots that are connected and launches an attack on the specified website. The slowloris attack can't be mistaken for a DDoS, it is completely different.

One of the keys features HTTPControl includes is, when there is Network Capture Software running, it pauses itself to avoid being caught.

Other features include, Download and Execute, Download and Execute Hidden, Kill Process, Block Input, Open CD Tray and Show Message.

[img]http://i.min.us/i9x0e.png[/img]

The sleek and simple GUI is what makes HTTPControl all the better, it looks fast and smooth. The custom log in screen is custom made and is similar to the main GUI.

[img]http://i.min.us/icQEsy.png[/img]

[img]http://i.min.us/iEsk6.png[/img]

HTTPControl comes with 3 pre-installed bots to start with. HTTPControl works just like a RAT or Keylogger, you gain bots by executing the infected file on the victims PC. Once the victim is infected, you can execute the commands described above.

The stability of HTTPControl is fantastic, with near to no downtime. The developer [Willem](#) has spent a fair amount of time on this project to make it better for the users. The extra effort put in, has added to the increased stability of HTTPControl.

Price/Contact

The current prices are the following listed:\$2 - Monthly: Doesn't include Builder, includes 3 bots.

\$10 - Single Bin

\$15 - Builder

Prices may vary from time to time.

Credits

- [Willem](#)

- [.Shannon](#)

For any further inquiries or questions contact either one of us, may it be to ask a question about HTTPControl or how to purchase it. Don't hesitate to PM either one of us.

Please note that you need your own hosting for the bot.

Da Loser - December 4, 2010, 5:25 am

I doubt you even did slowloris correctly if you're saying slowloris is not a ddos attack...
Your bot is a windows executable. Windows limits its sockets, using slowloris on windows would require DDOS. On linux, it would be a DOS as there are no socket limitations.
On windows, there is therefore you will need multiple bots making it a distributed attack.

PS: Hope your not using that shit wininet slowloris that was posted here as that's not slowloris.

Willem - December 4, 2010, 5:29 am

Yes we now that, we will fix it asap.

Da Loser - December 4, 2010, 5:39 am

(Dec 4, 2010 06:29 AM)Willem Wrote: [\[CITE\]](#) Yet you can take down websites (because of the amount of bots), do you want a demo?Did you understand my post?

I never said you could not.

Your post said:

Quote:The slowloris attack can't be mistaken for a DDoS, it is completely different.

Anyways. Good luck with sales.

Zeon - December 4, 2010, 5:41 am

What's the difference between the bin and the builder?

Willem - December 4, 2010, 5:44 am

Sorry I know it was just a laggy post =/

(Dec 4, 2010 06:41 AM)[Comrade] Zeon Wrote: [\[CITE\]](#) What's the difference between the bin and the builder?

The bin is just the server itself, which I will build for you.

Builder explains itself..

Willem - December 4, 2010, 10:32 am

Does anyone wants to review this?

Jordyboy - December 4, 2010, 10:34 am

(Dec 4, 2010 11:32 AM)Willem Wrote: [\[CITE\]](#) Does anyone wants to review this?

If you wish to give me a bin i'll review for you. ?

Zeon - December 4, 2010, 10:45 am

What does the builder do? Also, I would be willing to review this.

Jordyboy - December 4, 2010, 10:47 am

(Dec 4, 2010 11:45 AM)[Comrade] Zeon Wrote: [\[CITE\]](#) What does the builder do? Also, I would be willing to review this.

The builder does the same as any other builder. ?

MrKroit - December 4, 2010, 10:48 am

WOW new One Httpbotnet

The Price Very Cheap One L?

fads23 - December 4, 2010, 11:10 am

I'll wait for a review on the Slowloris... also, what is this coded in?

Zeon - December 4, 2010, 11:20 am

How stable is this? Give me a percentage? Is it more stable than WarBot?

Jordyboy - December 4, 2010, 11:57 am

(Dec 4, 2010 12:20 PM)[Comrade] Zeon Wrote: [\[CITE\]](#) How stable is this? Give me a percentage? Is it more stable than WarBot?

The warbot floating around here sucks balls.. So I guarantee this is much more stable.

antidenim - December 4, 2010, 12:10 pm

I've got some time on my hands right now, so if you need a reviewer, hit me up.

Zeon - December 4, 2010, 12:11 pm

I can be a reviewer too, I'll test how this works with Tor.

Shannon R. - December 4, 2010, 2:27 pm

For questions related to the HTTP Bot itself, please contact Willem. For questions regarding payments and purchase please PM me.

If you send me a PM about the bot it'll be ignored.

When Willem gets online he will answer your questions asked. Please be patient.

Zeon - December 4, 2010, 2:46 pm

Will he answer if I can test it with Tor?

Shannon R. - December 4, 2010, 3:07 pm

I'd say he would answer, he shouldn't have any problems with it.

Zeon - December 4, 2010, 4:34 pm

Could I have a copy to test it though?

Shannon R. - December 4, 2010, 4:44 pm

You need to get into contact with Willem for that. There is a link to his profile in the OP. Anything regarding sales should be PM'ed to me.

Black4N0use - December 4, 2010, 5:30 pm

(Dec 4, 2010 12:10 PM)Xeroday Wrote: [\[CITE\]](#) I'll wait for a review on the Slowloris... also, what is this coded in?

Most likely Perl, although I've heard theres 1 or 2 other languages that it is possible to make a slowloris DoS in.

Shannon R. - December 4, 2010, 5:39 pm

It is coded with VB.NET, but the site and interface is PHP.

Black4N0use - December 4, 2010, 8:53 pm

(Dec 4, 2010 06:39 PM).Shannon Wrote: [\[CITE\]](#) It is coded with VB.NET, but the site and interface is PHP.

WHAAAAA?

And its a slowloris?

Or something extremely similar to slowloris?

Shannon R. - December 4, 2010, 8:57 pm

It IS a slowloris attack that it features.

Willem - December 5, 2010, 3:08 am

(Dec 4, 2010 12:20 PM)[Comrade] Zeon Wrote: [\[CITE\]](#) How stable is this? Give me a percentage? Is it more stable than WarBot?

It is very stable, much more stable than Cybergate imo.

Also guys, dont speculate about the bot if you haven't seen it in action yet...

Assassin™ - December 5, 2010, 5:06 am

I have tested this bot and need to say it is just perfect.

The size of the server is 20kb and the DDos is really strong.

I recommend this http bot.

Willem - December 5, 2010, 7:44 am

(Dec 5, 2010 06:06 AM)Assassin™ Wrote: [\[CITE\]](#) I have tested this bot and need to say it is just perfect.

I recommend this http bot.

Thanks for the vouch. Anyone interested? Please PM me.

Zeon - December 5, 2010, 8:30 am

I would be interested in testing it too. Btw, does it have any dependencies such as loncube or Zend?

Cz2103 - December 5, 2010, 10:10 am

I'd be very interested in testing this; PM me.

Also, is the server FUD?

(Too Short)

Zeon - December 5, 2010, 12:57 pm

I would be interested in testing it too. Btw, does it have any dependencies such as loncube or Zend?

Shannon R. - December 6, 2010, 1:57 am

There wasn't any reason to double post. Your question will be answered when the developer is online.

Willem - December 6, 2010, 5:55 am

(Dec 5, 2010 11:10 AM)Wormat22 Wrote: [\[CITE\]](#) I'd be very interested in testing this; PM me.

Also, is the server FUD?

(Too Short)

Yes, the server is FUD. And when I need testers I will tell you, thanks.

@Zeon No it doesn't.

Zeon - December 6, 2010, 6:41 am

Is this more stable than n0ise?

Zeon - December 13, 2010, 9:03 am

Can I get my question answered?

Willem - December 14, 2010, 4:45 am

Lol tbh, I never used n0ise so I don't know...

way2hota - December 14, 2010, 7:40 am

If im not mistaken Tueri said its vbnet, then Zeon asked if it had any dependencies and Willem said "No it doesn't" ? just wondering also about this bot, good price and looks good btw, couple inquires though

aadster - December 14, 2010, 7:45 am

(Dec 4, 2010 11:32 AM)Willem Wrote: [\[CITE\]](#) Does anyone wants to review this?
I'd be very happy to review this for you, and write up a post explaining the pros and cons of this product, with images and what-not.

If you'd like me to pay for the review, maybe a discount (?), then please PM me.

Zeon - December 14, 2010, 8:19 am

I'd also be willing to review this.

Willem - December 15, 2010, 6:58 am

(Dec 14, 2010 08:40 AM)way2hota Wrote: [\[CITE\]](#) If im not mistaken Tueri said its vbnet, then Zeon asked if it had any dependencies and Willem said "No it doesn't" ? just wondering also about this bot, good price and looks good btw, couple inquires though
He asked for dependencies for the webpanel...

Zeon - December 15, 2010, 12:38 pm

Yeah. So can I review this?

botnous - December 16, 2010, 8:07 am

I would love to review this
thanks

The Name's Bing - December 30, 2010, 7:15 am

I'm interested in purchasing, but first I want to see a Review from a trusted member of HF.
I can Review it if you like, but I can tell you that you won't get many Sales without a review.

Shannon R. - December 30, 2010, 12:48 pm

It has been reviewed by Assassin. I'm sure you can review as well, just PM Willem.

Sublime. - January 1, 2011, 3:25 am

Will be looking into this bot further, waiting for some reviews and the thread features for the bot to be layed out a little better. Looks good though guys!

The Name's Bing - January 4, 2011, 9:31 am

Whats the current detection rate?
I want to know if I'll need a crypter for this.

Infected™ - February 13, 2011, 12:40 am

This looks like a good bot, What the detection rate on this and is it easy to crypt?

what else? - February 13, 2011, 12:47 am

Looks good and simple.

Also a good price.
Good luck with sale :)

Shannon R. - February 13, 2011, 12:51 am

Thanks, but I think it is discontinued.
