Thread: [Describing SUPERAntiSpyware \(Detailed\)](#)

Agent Shark - December 4, 2010, 9:07 am

Hello Reader,

Before I begin my description of SUPERAntiSpyware, please note the following:

- All quoted info is from other sources or links
- All info not quoted is from me

Things I ask from you:

Leave Feedback

Tell me what you thought

If there is more or errors you feel I made post them and I will fix/answer

Ask questions: I love questions :)

Lets Begin:

What is SUPERAntiSpyware?

Spoiler ([Click to View](#)) SUPERAntiSpyware is a program that specializes in the removal of spyware. It's database is constantly updated and contains tons of viruses/adware. When using this tool note that it looks mostly for Spyware and not as much for other viruses.

What are some features of SUPERAntiSpyware?

I am glad you asked here are some features gathered from there site:

Spoiler ([Click to View](#))Quote:

Detect and Remove Spyware, Adware and Remove Malware, Trojans, Dialers, Worms, KeyLoggers, HiJackers, Parasites, Rootkits, Rogue Security Products and many other types of threats.

Light on System Resources and won't slow down your computer like many other anti-spyware products. Won't conflict with your existing anti-spyware or anti-virus solution!

Repair broken Internet Connections, Desktops, Registry Editing and more with our unique Repair System!

Real-Time Blocking of threats! Prevent potentially harmful software from installing or re-installing

First Chance Prevention examines over 50 critical points of your system each time your system starts up and shuts down to eliminate threats before they have a chance to infect and infiltrate your system.

Schedule either Quick, Complete or Custom Scans Daily or Weekly to ensure your computer is free from harmful software. Remove spyware automatically.

How do I use SUPERAntiSpyware?

Well here is my steps of usage:

After downloading/installation do the following:

- Select the button called "Check For Updates"

Updates will occur and a possible restart

- Next select "Scan your computer"

Select COMPLETE scan

Select All Drivers

- If viruses are detected then simply hit remove all and a restart may occur.

After completion you may find a log for your scan at the following (Note this is only if your using it for a Checkup or possible infection):

Preferences > Statistics/Logs > Log

Where should I post my Log if I want to do a check up or feel infected?

Well SUPERAntiSpyware log is saved and here are some of the ways of posting the log:

- Directly to the site

Here are some sites you can post any log at including this one:

[Tiny Paste](#)

[Paste Bin](#)

So here are most of the steps to the usage of SUPERAntiSpyware.

I do hope this gives you a better understanding of this tool.

Additional Information: ()

Thanks again for reading

Stay Safe,
Disruption

Good info for new users. As far as conflicting with your other anti virus protection , it depends what kind of shields you got enabled, if there trying to block the same things and function the same it may conflict. There is a option in SAS to disable or enable its real time shields also with your anti virus protections. Good share Dis.

Updated Thanks Epidemic :)

ProfessionalCriminal - December 4, 2010, 11:00 pm

Quote:You cannot have more than 1 Anti-Spyware as it WILL conflict with each other and may cause system failure.

Hi Disruption,

Actually, you're wrong there. You can have as many anti-spyware or anti-malware applications as you like. Since this and other tools of this such sort are one-off scanners, there's no means for conflicting results. There have been a few incidents reported where anti-malware/anti-spyware tools which have active protection enabled have conflicted with each other, however, for the most part, it's

not an issue.

The fact is, you'll be fine with more than one anti-spyware application.

Thanks,
Malware Boss

You may also want to add some another one of SAS's capabilities.

There is a portable version of it that has a .com extension, so it is able to combat viruses that don't allow the opening of executable files or installation of software.
