Thread: [\[Newcomers Must See\]Which RAT To Chose\[TUT\]](#)

ado11 - December 4, 2010, 12:40 pm

Well most of begginers have problem which RAT to chose.

I will recomend you some of these

CyberGate

[img]http://www.downloadsoftfree.com/download/128016-CyberGate-Persoanl-Edition-bronze-packa
ge_boxshot_url_01.png[/img]

CyberGate Features

- [X]Nice GUI
- [X]Very easy to use
- [X]Many tutorials
- [X]Many cool options
- [X] Automatically map ports if your router supports uPnP;
- [X] Multi-Threaded : allowing for multiple clients to be connected, along with increased reliability.
- [X] Reverse Connection : Some of the listed advantages of a reverse connection -
- [X] Connections tab: You can monitor all the connections and client performance from a connection log that will register actions and time /date for those actions.

My Opinion

CyberGate is very good RAT to start but main thing why i will not recomend it is CyberGate is very unstable.But if you are begginer this is very good RAT to start with.

You can download CyberGate [here](#)

You can read [this tutorial](#)

[Official Page](#)

-

DarkComet

[img]http://darkcomet-rat.com/imgs/logo.png[/img]

DarkComet Features

- [X]You don't need to forward your ports
- [X]Use it even on Mac / Linux
- [X]Multithread Technologie
- [X]Strong Traffic Encryption

My opinion

Lot of newcomers dont know hot to setup DarkComet so they cant see they victims.This is very

good RAT that you should try.

Download DarkComet [here](#)

You can watch [this tutorial](#)

[Official Page](#)

-

SpyNet

[img]http://3.bp.blogspot.com/_TRTvzn0EcIY/Sr-9A6eSCUI/AA4/RXgXSQJjw9o/S1600-R/Spynet2.png[/img]

Features

[X]Registry Editor

[X]DOS Prompt

[X]Clipboard

[X]Device List

[X]Active Ports list

My opinion

This is very good RAT very popular i was using him some time but i start using DarkComet at that time so i leave SpyNet.

You can download SpyNet here[here](#)

You can watch tutorial [here](#)

[Official page\(blog\)](#)

What should i know to RAT

- Portforward

Port forwarding or port mapping[1] is the technique of forwarding a TCP/IP packet traversing a network address translator (NAT) gateway to a predetermined network port on a host within a NAT-masqueraded, typically private network based on the port number on which it was received at the gateway from the originating host.

- UPnP

The Universal Plug and Play protocol (UPnP) provides a feature to automatically install instances of port forwarding in residential Internet gateways. UPnP defines the Internet Gateway Device Protocol (IGD) which is a network service by which an Internet gateway advertises its presence on a private network via the Simple Service Discovery Protocol (SSDP). An application that provides an Internet-based service may discover such gateways and use the UPnP IGD protocol to reserve a port number on the gateway and cause the gateway to forward packets to its listening socket.

Use [Search](#) button

You need to make your server FUD (Fully Undetectable)

- Download your Crypter
- Crypt server
- Upload to novirusthanks.org
- If everything is clear you are ready

Spreading

Well [Search](#) button is magic ?

But i recomend you [this flamingworm tutorial](#)

I hope this help you

If you need any help PM i will see if i can help you(only +10 rep,l33t and uber) ?

You must be very carefull you can go in jail ? use proxy ??

This is only for begginers !!! ?

Ace Boogie - December 4, 2010, 12:41 pm

I would choose Cybergate as it is the easiest one to use and also the best one!

ado11 - December 4, 2010, 12:45 pm

Yes but stability is very big problem

StaTiX - December 4, 2010, 12:49 pm

dark comet and cybergate are the best ones right now , the free ones .

i heard that blackshades rat is amasing thouth you will need \$\$\$ for it

ado11 - December 4, 2010, 12:54 pm

yes they are best i didnt post blackshades(amazing RAT) because it cost lot of people today dont have money.

Thanks for reply?

Zpirit - December 4, 2010, 12:54 pm

Use CyberGate it the best, free one.

alias - December 4, 2010, 12:58 pm

What are your opinion about ARC ? It is paid but isn't it good ?

ado11 - December 4, 2010, 1:13 pm

(Dec 4, 2010 01:54 PM)walshy155 Wrote: [\[CITE\]](#) Use CyberGate it the best, free one.

Yes one of best at this time

as i said if cybergate in future will be stable as DarkComet that will be great

ado11 - December 5, 2010, 2:59 am
for this thread

and which RAT i need more to add to this thread

DaRkOoO - December 5, 2010, 3:05 am

Give a proof, or shut the hell up.

Crucifix - December 5, 2010, 3:11 am

Very nice tutorial but you have to something about your English :)

ado11 - December 5, 2010, 3:20 am

I was using CyberGate and i wass losing victims

DaRkOoO - December 5, 2010, 3:23 am

It's your problem you don't know how to use it.

I'm using it since 1.02, so for more than a year, and I never had any problems with it.

ado11 - December 5, 2010, 3:35 am

Yes but lot CyberGate users have problem with stablity and this is only for begginers

DaRkOoO - December 5, 2010, 3:55 am

As I said, you have to know how to use it.

And..Do I look like a beginner ?

Believe me, I've used quite a lot RATs, from BlackShades, DarkComet, Cerberus, Albertino, to CyberGate, and CyberGate is the best.

ado11 - December 5, 2010, 4:02 am

I didnt said that you are begginer

CyberGate is most famous RAT in world

Cmars2 - December 5, 2010, 7:38 am

"Lot of newcomers dont know hot to setup DarkComet so they cant see they victims.This is very good RAT that you should try."

Should be:

"Lots of newcomers don't really know how to setup DarkComet, so it can get a little bit hard. But it's a good RAT."

-

"This is very good RAT very popular i was using him some time but i start using DarkComet at that time so i leave SpyNet."

So it's a him now?

ado11 - December 5, 2010, 7:43 am

Yes my english suck but...

Thanks
