Thread: [Unix DES Decrypt help](#)

iGazzy - December 6, 2010, 9:04 am

Hello,

I am wondering how to Decrypt. I know that there's a site Crypto that does it for you but I cannot figure out how to tell which code is which so I can try to decrypt it..

I was told these codes were Unix DES and I cannot find a way to decrypt them.

If you could tell me a site or help me if there is a way with Crypto, that would be perfect. Or even if you could decrypt them for me, that would be appreciated.

They're: Spoiler ([Click to View](#))

(Aug 19, 2020 10:36 AM)webdev77 Wrote: [\[CITE\]](#) The value is the hash is now cracked and indexed so anyone else on the planet can see it. Posting on old threads is not a policy violation provided posts are on topic and not of suspect quality.
