[\[TUT\]](#)How to use Acunetix Web Scanner results to hack websites![\[TUT\]](#)

can somebody write a good tut for this topic??? from scanning , detecting and exploits . Noobs like us will be grateful if professionals like you can share.

thanks

?E???DAx - December 8, 2010, 11:16 am

Here I'll write you a tutorial really quick.

- 1.) Run Acunetix
- 2.) Scan website
- 3.) Google exploits for the vulnerabilities found

___System___ - December 8, 2010, 11:18 am

wow thats not even close to a tut, tuts go into detail about what your doing you trying to explain it like a pimp don't tell em nothing about it except it works Imfao

anyways I wish I could help I am not familiar with this

iolaka - December 8, 2010, 11:18 am

I recommend you not to use Acunetix ...

It's detected and you could get in trouble.

moza - December 8, 2010, 11:30 am

(Dec 8, 2010 12:18 PM)iolaka Wrote: [\[CITE\]](#) I recommend you not to use Acunetix ...

It's detected and you could get in trouble.

then what else do you suggest and how do you proceed with your methods?

Yeah, kinda the whole point of my post was to sarcastically say "All you need to do is type in the url of the site and hit scan. Then you can use Google to find exploits for the vulnerabilities Acunetix finds".

I guess its hard to portray sarcasm through text.

wronger - December 8, 2010, 11:44 am

Please don't put [\[TUT\]](#) tags around a post that doesn't have a tutorial in it. [\[Tut Request\]](#) would work better.

WE CAN ALL SAY THAT, BUT WE CAN NOT ALL DO THAT. IF YOU CAN DO IT THEN A SMALL TUT WITH PICS WILL BE APPRECIATED.

ALL THOSE WHO SAY THEY HACKS, KEEP FUNNY TUTORIALS LIKE HOW TO USE A KEYLOGGER, SQLI INJECTION WITH TOOLS , SCANNING WITH NOVIRUSTHANKS, WE ARE TIRED OF THAT SHIT. WE WILL INCREASE YOUR REP IF YOU CAN CRATE A NEW AND FRESH TUTORIAL ON THIS TOPIC.

ThankYouAndGoodbye - December 8, 2010, 1:02 pm

If you are not understanding the output of acunetix then it is to much of an advanced tool for your use, you should do some more reading about Web Exploits, most of the exploits accunetixs finds are web based exploits or publicly known web server vulnerabilities.

moza - December 8, 2010, 1:07 pm

"do some more reading about Web Exploits" link

Makaveli™ - December 8, 2010, 1:09 pm

wish i was smart and could understand this -_-

Flowz - December 8, 2010, 1:13 pm

Moza, You are being an arrogant ass.

Use the proper tags and use the search option to find a tutorial about 'Web exploits' there are plenty of tutorials out there with lots of information. <http://www.acunetix.com/index.htm> search around their site and you'll find some helpfull info.

- Flow

Use the search tool, this forum is one of the richest source of online security materials, thats why im on here.

Then again - it wouldn't hurt if you bought on of the old fashioned things called "books", i still think shops stock them. Heres a few that I have that contain things to help you:

Networking For Dummies
Hacking Exposed 6

Hackers Handbook
Shell Coders Handbook
Reversing
24 Deadly Sins Of Software Security
Security+ Review Guide

kabir68 - June 21, 2016, 3:43 am

good communication, i think i will buy to this buyer and stay an report after.
I mean that it is a good resseller

You are the best ,

See you soon

? I don't.... I can't even. What? What are you even saying.

kabir68 - June 25, 2016, 11:11 am

i was opened 2 tabs. And i have a contact with one reseller, i have send in the mistake tabs. And because that you give me reputation -1 ?????

Not cool K0eN

i will delete my post when i will can to do it. It say 1440 min next then i have send my wrong post. Sorry. Every human can make mistake, and that is not a reason to stay -1
