Thread: [\[NEW\] Decrypting Passwords \[Free\]](#)

[XcrewT]W4a1 - December 10, 2010, 11:30 am

???

Decrypting

any kind of text

for FREE ?

? just paste the text here and say the method of crypting... ?

.Twilight. - December 10, 2010, 11:32 am

Okay now this is weird, if you're not able to decrypt nowadays [with shitloads of tuts], you should completely stop with any kind of malware/wannabe hacks

But I guess you are just trying to help out, because you just joined and stuff so good luck ?

FEL1X. - December 12, 2010, 8:32 am

hm, i dont think this is a good idea, there is an example:

some skid find a GOOD source of some program, and there is a noob protection with decrypted password, now, he dont know how to decrypt it and he just post it there... and you do all the work... and... skid is leeching the code ^^

gj.

crusty - December 21, 2010, 11:09 am

These noobs are using you to decrypt for them, make them pay bro..

Jaket25 - December 21, 2010, 11:56 am

MD5. Good luck Lol
3d6b95f465360458e54bf4b118984c8e

intheoz - December 22, 2010, 7:43 am

I think even the op cannot decrypt this.

intheoz - December 22, 2010, 8:51 am

To the pr3fix (author of Nemesis Protector), may nemesis protector protect you from n00bs. Dude,
whats the use of all those hard work you have done if most people who is not n00b cannot use it. I
cannot decrypt it but I am not a n00b so your codes and hours of your work gone wasted.

I found hash strings on this site <http://www.learntohack.co.uk> site offers scanning of an users password I do not know if they are valid. these md5 hashes are for facebook if you could check the site and reply to me if it does work.

if it doesnt i would be grateful if you could tell me is there any way to get encrypted facebook passwords or the password itself

can you please decrypt this md5 hash string

dc42d32c805895cc43a3db2f58eafbb5

and this one:

3fdb648cf47fac68d7b3068453d21dc4 - this hash is my password, to make sure it works

thanks

JUAN9087™ - January 10, 2011, 8:00 am

If you don't check well the password you are decrypting, you may find that you are just decrypting the anti-leech/anti-noob protection of the crypters, keyloggers.

jamesbebbby - January 10, 2011, 9:25 am

Chr\$(104) + Chr\$(112) + Chr\$(108) + Chr\$(98) + Chr\$(104) + Chr\$(100) + Chr\$(87) + Chr\$(89) +
Chr\$(87) + Chr\$(70) + Chr\$(109) + Chr\$(99) + Chr\$(85) + Chr\$(104) + Chr\$(88) + Chr\$(82)

Decryp with: base64/string reverse/ascii

Cheers James

Rezman - January 19, 2011, 3:30 pm

Help me I need this decrypted! Thanks!

Hi, i do not know the way of encryption.

Are you able to find out with these few sets of examples ?

This is the main display Values: 6E3CB05C248F

This is the hidden values going to be encrypted to above display or either way round:
69p46R+aqo3M+

Display Values can be re-rolled and hidden codes will be auto edited upon re-rolled.

A few sets of Example

1) 69p46R+aqo3M+
TO
6E3CB05C248F

2) 6gV80dqa0UOA+
TO
053CB05C24D9

3) 69mEkCpBGsHI+
TO
783CB05C248A

4) 6pU4gQBfE+gg+
TO
3E3CB05C24E1

5) 6PhrlTkdPYz2+
TO
133CB05C24AF

Conditions 2: Tried putting the values on my laptop to my desktop, the display value isn't the same.
