Thread: [Small glitch](#)

?Cooldude? - December 12, 2010, 10:34 am

Okay, I'm not sure if this is only affecting this user, or others too. I have changed the date settings [here](#) so that the date is displayed in the Sunday, December 12th, 2010 format. When I click on the profile of [this](#) user, the following shows:

[img]http://i.min.us/iG218.png[/img]

I was wondering if this is happening just for me, or for other members as well.

Minnesota Nice - December 12, 2010, 10:35 am

Ha what happened there? Februaryriday!

Galaxy Wave - December 12, 2010, 10:36 am

Lol never seen this glitch before.

Once Timeless - December 12, 2010, 10:38 am

Another database problem. Just have some patients until omni changes servers. I say this about 2 or 3 times daily.

The only other possibility is your video card.

Sky- - December 12, 2010, 10:39 am

That's not a DB problem. It's been like that for ages.

(Dec 12, 2010 11:39 AM)Sky- Wrote: [\[CITE\]](#) That's not a DB problem. It's been like that for ages. Likely will be fixed when 1.6 is implemented.

?Cooldude? - December 12, 2010, 10:43 am

I'm pretty sure it isn't a database issue, or a problem with my video card. Sky-, is it a MyBB bug, or is it only an issue on HackForums?

Once Timeless - December 12, 2010, 10:47 am

I'm running a forum on 1.6 and don't have a problem like that.

This forum is running 1.4 so it will be fixed on the next update.

I really don't know.

I think it's a MyBB bug.

01-01-1980 (30 years old) mine is okay lol

alfonzo1955 - December 12, 2010, 11:06 am

Working fine for me.

You don't have your date set on that format.
