IP Address Finder by eXero

Hello HF, this is my new release: an IP Address finder. Just put in any URL and it will find it's IP address. I hope everyone likes it! It was coded in VB2008, made entirely by me. Post a reply! It takes less than 30 seconds to say something nice about it!

No offense but this is kind of a useless program xD

Gambino - December 14, 2010, 3:40 pm

Very basic but also very useful, it can save you sometime instead of opening up the command prompt and pinging it yourself.

One suggestion I have is a "Copy to clipboard" button for the IP :)

Good job! :D

Lmao how does this save time? CMD prompt pinging is probably just as fast as this lol.

hyperonion - December 14, 2010, 3:46 pm

I like it. Beats the hell out of command prompt, and it's fast

eXero - December 14, 2010, 3:47 pm

I just thought about adding the copy to clipboard option. I will in next version. And it could save time if you don't have the permissions to open up CMD/command prompt.

I guess if you're on mommy and daddy's computer with like McAfee child smart safety on it maybe o.O

And I'm sorry I just see it as kind of a waste of time. Its like coding a program that opens up your internet browser whenever you click it.

eXero - December 14, 2010, 4:11 pm

Well if you don't like it, nor do you think it has any use, then you don't have to use it. No one is forcing you to use it.

hacc - December 14, 2010, 4:21 pm

Yeah no kidding I'm not planning on using it I just don't understand why anybody would ever need it.

status quo - December 14, 2010, 4:22 pm

Great program,
thanks for this.

I left a present in your rep ;)

HakkuR - December 14, 2010, 4:23 pm

Nice share tho I don't need it you should teach me how to make one.

hackingtheuniverse - December 14, 2010, 4:27 pm

I suggest using this.

```
Private Sub Button2_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
```

Handles Button2.Click

```
Clipboard.SetDataObject(Textip.Text, True)
```

Just add another button.

-mothered- - December 14, 2010, 5:02 pm

Irrespective of whether the command prompt is a better methodology, this is a nice little tool to have on hand.

Appreciate it mate.

eXero - December 14, 2010, 5:05 pm

You welcome mothered, and thanks HTU. I will try that.

@Every Day I'm Hustlin' - What no you didn't?
