IP Address Finder V2.0 by eXero

Hello HF, this is my new release: an IP Address finder version 2.0. Just put in any URL and it will find it's IP address! I hope everyone likes it! It was coded in VB2008, made entirely by me. Post a reply! It takes less than 30 seconds to say something nice about it! I added a copy to clipboard function, along with a "Test Paste" option, and I added the correct way for the program to cope with an empty URL box. Enjoy!

Pain And Gain - December 14, 2010, 6:47 pm

Nice and simple just the way i like it downloading now

quintz - December 14, 2010, 6:48 pm

The GUI looks pretty skiddish..

But I guess this is a useful program. You should try to make your own booter and include the IP grabber.

eXero - December 14, 2010, 6:52 pm

Already got a booter, but it needs fixing. Booter includes the IP grabber.

(s)(u)(f)(f)(i)(c)(e) - December 14, 2010, 6:53 pm

You do know Firefox has a Add-on to show the IP of the website you are on...right?

LoneStar X - December 14, 2010, 6:55 pm

(Dec 14, 2010 07:50 PM)BettyWhite Wrote: [\[CITE\]](#) Goddamn,,,, we got an uber making gay ass programs.. GTFO.

You have few posts. You just joined.

How about you be quiet and respect the person who made the program? (The program which I doubt you've even used)

And not tell them to GTFO, they've been here longer than you, and deserve the respect.

I mean, last I checked, the highest quality post you had was "Whats a phishing, how do I make that?"

You're just a waste of bytes on HF.

(Before anyone thinks I'm flaming, read all of BettyWhite's posts)

eXero - December 14, 2010, 6:57 pm

No I didn't know that. This still helps some people. I am just trying to give back!

@faggets with bullshit to say, get off of my thread and go post your low quality crap somewhere else.

(s)(u)(f)(f)(i)(c)(e) - December 14, 2010, 7:01 pm

Well anyways it's called ShowIP if you want to test it out.

Looks like a nice easy to use program BTW. ?

LoneStar X - December 14, 2010, 7:02 pm

I joined a week ago. I think I'm a tad bit older than you. You seem to like the word "gay". Have you experienced gayness firsthand?

How about you actually contribute?

And wow, I'm a Hanna Montana. I'm so hurt. So deeply. /end sarcasm
What are you, 9?

eXero - December 14, 2010, 7:13 pm

How is it a low quality program dumb shit? Get off my thread.

eXero - December 14, 2010, 7:19 pm

I did not ask how many tuts explain how to do this, how many lines of code this is, how many

websites offer this service, and if you can do this in cmd, I posted it as a little program I made to offer to my fellow high quality members of HF, not low quality losers like you 9 year olds. Get off of my thread.

Agent Shark - December 14, 2010, 7:26 pm

Good job on your program and hope to see more stuff from you :)

#SYSTEM F?IL?RE™ - December 14, 2010, 7:32 pm

thanks you very mutch very apreciated mate :D

hackingtheuniverse - December 14, 2010, 7:42 pm

See you took my advice :).

betmenthekill - December 15, 2010, 2:56 am

where can i find the program ??

Fallenbot - December 15, 2010, 5:59 am

Seems a nice tool. I shall download it and put it to my test folder for later use, Thank you mate.

SIM-570417 - December 15, 2010, 6:14 am

Who care about the fulls

nice jobe

thanks for creating and sharing

Mewtw? - December 15, 2010, 7:15 am

Easy to make but always a great share. Thank you mate.

Nort - December 15, 2010, 7:41 am

Nice tool and easy but nice share my friend!

FrenchcoreRadio - December 15, 2010, 7:43 am

whats this? the same as "ping www.google.com" ? and then it shows up the ip.

imStaff - December 15, 2010, 7:50 am

very good program i download...thanks

NIKKE - December 15, 2010, 8:20 am

(Dec 15, 2010 09:14 AM)Installation Wrote: [\[CITE\]](#) I Siriously Got no Idea,

toomofoshortnice program, gui is simple but i have no use for it.

i've never toughed about making making program like this , and why not just ping website :D

p!tch - December 15, 2010, 8:25 am

thx for the tool is simpl ant have a hotmail ip finder ?

eXero - December 15, 2010, 3:23 pm

You can't copy in CMD. Just saying.

hackingtheuniverse - December 16, 2010, 6:16 pm

(Dec 15, 2010 04:23 PM)eXero Wrote: [\[CITE\]](#) You can't copy in CMD. Just saying.

Well you can "Mark" in CMD.

betmenthekill - *December 17, 2010, 5:18 am*

any of you can give me a link for download metasploit frame work please

Inception - *December 17, 2010, 11:31 am*

2 mins to download 3.6mb don't use uploading.com

eXero - *December 17, 2010, 12:24 pm*

What killman? Can you type in English please?
