iiOnyx - December 14, 2010, 11:43 pm

stop trying to infect users please, you have low post count, you joined this month, no rep, you post in many sections because you're desperate for bots, then you post constantly saying about how well it works and how you have experience with it, please stop trying to spread on HF, it's not allowed,

and If you aren't I'm sorry but this seems a little over the top suspicious. Proceed with Caution. BTW, I'm in AP Psychology, so I usually have a good sense of reasoning.

poision-v1p3R - December 14, 2010, 11:49 pm

so why r u here....if u r psychology??? go and find some clinic.. rofl....

uhmm can you tell me how to get this program for free ^^

zer0day - December 22, 2010, 9:26 am
Usually we don't post paid for tools here unless you have cracked it or provide a crack/serial to make it a full version. Otherwise this should be placed in the monetizing forums because all you are doing is promoting a paid tool which helps no one.

iiOnyx - January 24, 2011, 7:13 pm
Ok, this is stupid. I posted saying how this is a virus, and some dude gave me crap, this dude obviously made new account over and over again because, There are posts with random names with like 2 posts and 0 rep. If this wasn't a virus he would have no need to promote this rubbish tool. Don't download

skiiiz - January 25, 2011, 2:31 am
Onyx is right. Your post is full of BS - there's also nothing to see. And FYI this isn't the best tool.

SIM-135152 - January 25, 2011, 5:19 am
i don't see nothing new in these but good for first sharing
