Thread: [\[TUT\]Crack Mega upload,#,DepositFile,Rapidhsare....\[TUT\]](#)

541slover - December 16, 2010, 1:22 am

Hey guys today i gonna show you guys how to crack accounts like Megaupload,#,mediafire,# etc we dont gonna talke to mutch we go right in the case:)

First of all that you gonna do is to find some proxy list , password list , username list or combo list thats easy to finde i gonna show you guys how to do that.

Step1 First you gonna open athena II and click start botton wait some minuts stop when enoghe. Program gonna save the combo list automaticly when you click stop botton and you gonna find the combo list there you have Athena II.

Spoiler [\(Click to View\)](#)[img]http://img18.imageshack.us/img18/4231/namnlsl.png[/img]

So now you have the combo list you dont need pass list and user list becus combo list is username:password.

Step 2. In this step when gonna find out some proxys!!

Open proxy Finder,Click Find

wait some minutes you gonna get some proxys After stop it and Save it just like in the picture.

Spoiler [\(Click to View\)](#)[img]http://img704.imageshack.us/img704/6367/step12.png[/img]

Step 3 : in this step we gonna check the proxys if they work or not!!!

Open proxy checker load the proxys that you find with proxy finder put the socket 20 and click the start booton after you fineshid save the valid proxys and delet invalid proxys!!!

Spoiler [\(Click to View\)](#)[img]http://img709.imageshack.us/img709/4814/gghf.png[/img]

Step 4 : Now we have the combo list or userlist and passlist so lets start cracking its not so hard that you think ;)

Open the Apex Load the usernames load passwords list

or if you wanna use the combo list go to the Pass Option and check the user:pass format.

sorry guys this picture is litle bit wrong :/

Spoiler [\(Click to View\)](#)[img]http://img225.imageshack.us/img225/2632/step1i.png[/img]

[img]http://img547.imageshack.us/img547/2348/step2k.png[/img]

Now we going to put the proxys First click proxy list after Load the valid proxys!!!

Spoiler [\(Click to View\)](#)[img]http://img690.imageshack.us/img690/1018/step3o.png[/img]

In this stip when going to choice witch sites account whe want to crack we say megaupload so just go to site settings click the megaupload chose megaupload and after it well say that you need proxy but whe dont think about it becus we have already puted the proxys so its the time now just click the START and wait some minuts you gonna see the magic of crack :D here is the pic.

Spoiler [\(Click to View\)](#)[img]http://img594.imageshack.us/img594/4361/step4e.png[/img]

So now you got some account we say 20 account its hard to check them one heand one so what we going to do we gonna use Profile IT`.

Load the saved cracked acc,chose the sockest,chose the service we gonna use megaupload becus we cracked now megaupload accounts after that just click start and there you go after some minutes you gonna see how mutch accounts are valid how mutch is premium/regueler

Spoiler [\(Click to View\)](#)[img]http://img69.imageshack.us/img69/413/namnlsss.png[/img]

Sorryy about my bad english guys hope you guys have enjoyed ?

i cant get profile it to work, says:

'Failed to load control 'AIOProfiler' from . Your version of maybe outdated. Make sure you are using the version of the control that was provided with your application.'

So i was wondering whether the issue has to be that I am running Windows 7 64 bit?

can you confirm this?

i dought you can make a program just to crack websites.

Nice TuT, if you have any megaupload premium accounts you could give to me, i'll be glad to vouch for you.

asniex - January 25, 2011, 9:32 pm

The proxy finder is shit. Anonymous or elite proxies are needed for this otherwise we are easily detected by their system. Thanx for the tutorial.

This method can be even more effective if we use a forum leecher to get the user names and use a common password instead of combo list.

i doubt you can make a program just to crack websites.

First learn how to spell doubt, secondly he didnt make this and its a bruteforcing program.
