

Forum:[Hack Forums](#)

Thread: [\[TuT\]FUD Java Drive-By. Noob friendly.](#)

End - December 20, 2010, 12:56 am

1. First. You have to download this archive:

[Mediafire](#)

2. Extract it. It should look like this

[\[IMG\]http://img816.imageshack.us/img816/8099/84107257.png\[/IMG\]](#)

3. Now, go ahead and open index.html with notepad.

[\[IMG\]http://img638.imageshack.us/img638/7154/12400530.png\[/IMG\]](#)

Then, minimize it.

4. Upload your virus on a site that supports direct linking. ([www.ougfiles.com](#) , [www.fileave.com](#) , [www.rip way.com](#) , [www.easy-upload.nl](#))

[\[IMG\]http://img513.imageshack.us/img513/6963/81211000.png\[/IMG\]](#)

5. Maximize index.html , and replace "http://yousite.com/virus.exe" with a direct link to your virus. Then save the file.

[\[IMG\]http://img339.imageshack.us/img339/8152/67596732.png\[/IMG\]](#)

6. Upload all the files you find the that folder on your host. If you don't have a host, try rip way.com(remove the space), SPAM, fileave.com

[\[IMG\]http://img338.imageshack.us/img338/8974/37792038.png\[/IMG\]](#)

7. After that, if you did everything fine, your site should look like this:

[\[IMG\]http://img40.imageshack.us/img40/9897/76180256.jpg\[/IMG\]](#)

Enjoy my first tut. I hope you like it.

Impressive Java Drive By mate. Appreciate it. I'm downloading it right now. I appreciate it.
Very good tutorial very detailed with a lot of pictures, Scan ...
All is perfect, thanks for the share.

hapLander - *January 2, 2011, 2:06 pm*
I've uploaded the files but it doesn't work...

Help? :|

Disobedience - January 2, 2011, 2:08 pm

Does This Work On The Most Recent Versions Of Java? Like Is This One Unpatched Or The Same As The Old Ones Just FUD For Virus Scans

Headmaster - January 24, 2011, 1:13 am

Thanks Dude :D Just wath i wanted ! :D Keep up with the good!

SIM-119661 - January 24, 2011, 2:32 am

Thanks. Needed to upgrade my mind i had forgot how to do this xD

antXL - January 24, 2011, 1:02 pm

thanksss grat tutorial!!!

Tarskay - January 24, 2011, 1:17 pm

This is a great tutorial.

But, when I go to upload to fileave.com or Easy Upload it always says fakepath.

maltestpfotboll - January 24, 2011, 7:44 pm

Thank's so much!

Changed the banner, and Cam pic and the loading text for runescape details :)

Regard's Malte.

chroniccommand - January 24, 2011, 10:29 pm

Holy shit another one of these? Fuckin skids.

HERP DERP l33t java drive bys.

x3n0n - January 24, 2011, 10:31 pm

The other day I did a java drive by!

I'm so 31337 right now !

loader - January 24, 2011, 10:31 pm

cool tut. might try it out a little later on

Raven25 - January 29, 2011, 7:32 am

Nice tutorial!!!! I Give it a try right away..

Ultimated - January 29, 2011, 7:50 am

I install it ok, but when i test it, it closes my explorer.exe...

then, the second time i re-run the java, it gets me.

Jaran - January 29, 2011, 1:34 pm

Is it just me or does this not work anymore? I have used this for like a week and today when I open it, accept the java message nothiong happens. I have tested it out on severael PC's and still not working. Its still FUD so can't be anything detecting it. Can it be the host? I am using fileave. Anyone have an idea whats wrong?

End - January 29, 2011, 11:21 pm

(Jan 29, 2011 02:34 PM)Jaran Wrote: [CITE](#) Is it just me or does this not work anymore? I have used this for like a week and today when I open it, accept the java message nothiong happens. it workd with easy-upload thanks!

Joe67 - January 30, 2011, 6:32 am

It's a very nice tutorial ! Thank a lot :)

MagicMushroom™ - February 11, 2011, 8:20 am

looks very interesting...mate

autorunman22 - February 11, 2011, 8:33 am

I cant upload the index.html that was edited to fileave.com. I can only upload the rat. Please and what was the url to send?

Can i be put all together the client.jar, png's photo, index.html, and my rats in one file host like fileave? And the link im going to send is the link of the index.html that could be edit in blabla.tk? So it looks like legit? Please i wanna know java drive-by.

Nogueira - February 11, 2011, 1:09 pm

I have a question, once the slave clicks "run" the virus/rat/keylogger gets into the slave's pc right? But does it get detected by AV's? Do we still need to encrypt it and make it UD, or by using this it get's through the AV?

penetrator - February 12, 2011, 2:00 am

For god Sake dont say FUD its still Asking to Run ... BTW Nice Tut

autorunman22 - February 12, 2011, 4:29 am

does the slave needs java in his system ?

autorunman22 - February 12, 2011, 5:19 pm

Its already detected. Bump..

End - February 12, 2011, 11:11 pm

(Feb 12, 2011 03:00 AM)penetrator Wrote: [\[CITE\]](#) For god Sake dont say FUD its still Asking to Run ... BTW Nice Tut

FUD from anti-viruses, that's that I meant

autorunman22 - February 12, 2011, 11:36 pm

The last detection of the .jar is horrible. Please re-update/re-fud if you dont mind.

simon omg - February 15, 2011, 5:48 am

Can my virus be everything from a keylogger to a RAT or a stealer? Will it all work?

mathieu60510 - February 15, 2011, 6:41 am

Very nice Thanks MAN !! :))

Dark Lotus - February 15, 2011, 10:04 am

I'm sorry I'm very new to this. What link do I spread to people?

End - February 15, 2011, 12:02 pm

(Feb 15, 2011 11:04 AM)Codad Law Wrote: [\[CITE\]](#) I'm sorry I'm very new to this. What link do I spread to people?

Your website's link mate.

Dark Lotus - February 15, 2011, 12:14 pm

(Feb 15, 2011 01:02 PM)End Wrote: [\[CITE\]](#) Your website's link mate.

Yeah I figured that out xP I keep getting some weird error though.. :/ and it won't connect.

kyletjuhh - February 15, 2011, 1:00 pm

If you press cancel on a Driveby site are u still infected then?

Dunkthefunk - February 15, 2011, 1:06 pm

At the risk of making this thread sound very newbie I have a few simple questions:

So when someone follows the link, they get an automatic download? They will still then need to click on the server for the keylogger to work? Would this not be really suspicious?

samo502 - February 15, 2011, 1:31 pm

I don't suggest SPAM, they do a manual check to make sure your site isn't infected before everyone else can see it most of the time. I've had good experiences with Zymic(Zymic also supports PHP) and fileave, though fileave tends to take a while to update the site when you change files.

Pr0toType - October 22, 2011, 2:55 am

Very nice TuT mate I'll try it. Thank you.

Alienguy - October 22, 2011, 2:58 am

Nice java drive by , thanks a lot brother.

iubitu - October 22, 2011, 6:55 am

Nice TuT. Thanks a lot for this share.

jackoboi - October 22, 2011, 7:17 am

nice tut thanks, will definitely try this.

1NV1518L3 - October 23, 2011, 4:29 am

Cool tutorial, helped alot! Thanks .

cewlisk8ter13 - October 23, 2011, 12:41 pm

got a question...should i put the crypted server in the .html file or just the original one?

Kornk im soz ily - October 23, 2011, 12:46 pm

(Oct 23, 2011 12:41 PM)cewlisk8ter13 Wrote: [\[CITE\]](#) got a question...should i put the crypted server in the .html file or just the original one?

Are you asking if you put the crypted server or original server in the file?

If so you're asking if you want to put a server that anti virus' will pick up, or one that they wont.. The answer seems quite obvious.

stelioss - October 29, 2011, 4:18 am

:) nice tutorial

The answer seems obvious .. crypted! ;p

Gorsko - October 29, 2011, 8:05 am

Thanks for the share bro,but i wanna inform you that it is not fud..my nod just detected it.. :S

Mixuu - October 29, 2011, 9:11 am

(Oct 29, 2011 08:05 AM)JoNy Wrote: [\[CITE\]](#) Thanks for the share bro,but i wanna inform you that it is not fud..my nod just detected it.. :S

Lol look at the thread date, its from 2010... ofc its not fud anymore -.-

hackeye - October 29, 2011, 11:23 am

this is nice, but...

"the application's signature cannot be verified" can look suspicious to some people.

T3eS 2 - October 29, 2011, 12:18 pm

Excellent tutorial.

Though iam noob at these, now it made me interested to learn.

Thanks mate

jacklong97 - November 8, 2011, 5:37 pm

hi, where can i find a direct link to upload and which site to create a directory for hosting

xBlackHatx - November 8, 2011, 11:36 pm

vouch to @End!!!

nice and easy TUT buddy!!keep it up!! ;)

Wre©ked - November 9, 2011, 3:21 pm

What website should we use since both are unavailable?

JAcid - November 11, 2011, 1:17 pm

20/35 detected. Would recommend re-FUDing it yourself. Excellent place to start though!

Refresh! - November 14, 2011, 9:02 am

just used this now, not sure if still works but thanks!

Nook1e - November 14, 2011, 9:17 am

You looked at the thread-starting date?

Won't be FUD anymore.

lelnoob - November 14, 2011, 1:40 pm

thanks for the tutorial and tools
much appreciated

Supra23 - November 14, 2011, 4:12 pm

Nice guide its very helpful to people who are beginners

Haah - November 17, 2011, 9:37 am

Very nice thread.

Thanks for the idea.

?clipse™ - November 18, 2011, 2:35 am

How come I've followed so many java drive by Tutorial and it was set-up successful but it just doesn't Infect :S Please Help!.

Yellow Sponge - November 26, 2011, 11:28 am

(Nov 18, 2011 03:35 AM)computerrocks Wrote: [\[CITE\]](#) How come I've followed so many java drive by Tutorial and it was set-up successful but it just doesn't Infect :S Please Help!.

It's not FUD anymore. It's being detected by 20/35 AV programs and on top of that, Java has updated and patched most Java Drive-Bys with warnings & alerts to your victim.

If you want a reliable FUD Java Drive-By I suggest buying a private one.

silverb - November 26, 2011, 1:19 pm

EDIT- Sorry didn't see post above

NOD32

C:\Users\...\Downloads\JavaDriveBy.zip » ZIP » JavaDriveBy\Client.jar -
Java/TrojanDownloader.Agent.NCJ trojan

Flatron192 - November 26, 2011, 3:46 pm

Very nice tut! Thanks bro a lot!

It's so easy to understand...

ÇdnîS Lu?i? - November 26, 2011, 6:44 pm

Good tut, except all the hosting sites are disappearing so none of the links you have given are currently valid. =/.

Skype: BreezyCloudium - November 26, 2011, 7:33 pm

Is this Java-Drive-By still undetected? Interesting...

Scooby Doo. - November 26, 2011, 9:08 pm

Yeah sounds interesting, thanks for the share.

HitTheRoadRunning - December 3, 2011, 9:26 am

This is just what I have been looking for thanks mate!

Chink - December 4, 2011, 12:29 pm

Loved it i am going to try and do this :D

Spacer - December 4, 2011, 1:40 pm

How do i re-FUD this?

- Message 2 Short -

ForbiddenChronic - January 9, 2012, 6:23 pm

I'm a noob and have a question.. Where do i get the virus to upload at?

Dota2MasterRace - January 9, 2012, 11:00 pm

OP, use a crypter, but i'm just wondering if this is still a valid JDB

Daily - January 10, 2012, 12:44 am

Haha.. I just noticed everybody is using the java driveby template I made and posted on 4chan a lot like a year ago..

Penar - January 10, 2012, 6:43 am

Have a question. Once the drive by is clicked, how do you retrieve information on the slaves computer, thanks HQ user and guide.

Rahul_Rulz - January 19, 2012, 9:03 am

This is not FUD anymore.

Any FUD Java Drive ? I am getting detected by Avast.

Serial Menace™ - January 21, 2012, 12:30 am

Great tutorial works for me...also you can use dropbox to upload your server under the public files to get your link for those wondering

bernardo1989 - January 21, 2012, 2:23 am

(Jan 19, 2012 10:03 AM)Rahul_Rulz Wrote: [\[CITE\]](#) This is not FUD anymore.

Any FUD Java Drive ? I am getting detected by Avast.

? thats very bad news bro...

daymoto - January 21, 2012, 2:54 am

When I clicked download on mediafire my avast straight away picked something up before i even click accept (For it to download) is this right ?

brianv33 - January 22, 2012, 10:15 am

THNX Man.

Good Job Get Ready For The Next One XD

sam2011hacker - January 22, 2012, 10:53 am

i dont know how but my antivirus detected that there is virus in website.... what to do now

LEARN PRORAMMING,HACKING,CRACKING AT

itsbeenine - January 22, 2012, 11:59 am

Easy to understand tutorial. Going to try it out right now.

TheNeutron - January 22, 2012, 12:05 pm

Thanks, I was really searching for a Java Drive-by. :D

PUBSTAR94 - January 22, 2012, 4:02 pm

nice tut bro im deff going to use this

BuddhaK - January 23, 2012, 8:18 pm

I love it I changed some pictures and stuff and now it looks like facebook!!! You are credited in the source code xD

I would link you but I dont want to infect you!!

Stage0 - January 23, 2012, 8:54 pm

what does this do is it an example or does it do something?

HysteriaX - January 24, 2012, 1:32 am

Nice tut, n easy to understand, gonna try it later

Bidule - January 24, 2012, 9:33 am

Really nice and simple, gonna make slaves :)

Broda - January 24, 2012, 9:41 am

Wow. Thanks so much for releasing this!

numskul - January 24, 2012, 8:49 pm

I can't get this to work no matter what I do.. I'm using x10hosting.com, if that helps at all..
Are there any better, Free hosting sites?

Zalg0 - January 26, 2012, 7:42 pm

I'm gonna try this soon ;)
But i doubt its still fud ..

KryptonMe - January 27, 2012, 2:27 am

thanks this works for me and it was a very detailed and simple tut!

iTWiST3D - January 27, 2012, 2:57 am

It's not fud anymore :(but thanks for this.

bad - January 27, 2012, 3:17 am

thanks a lot brother its a fantastic java drive by

Rajat - January 27, 2012, 4:04 am

Thanks alot very nice tut, will help alot of people! :)

SIM-947411 - January 27, 2012, 4:10 am

Impressive Java Drive By mate. Appreciate it. I'm downloading it right now. I appreciate it.
Very good tutorial very detailed with a lot of pictures, Scan ...

All is perfect, thanks for the share.

Petal - January 27, 2012, 5:45 pm

Ok, noob here. If i set it up ect and spread it how do i use the rat to view the infected people? I understand this is a guide for hosting the virus but when someone downloads it how do i then see the infected person?

Sorry if that does not make sense :(

Salvatore - January 28, 2012, 2:23 am

Great work, nice and easy tutorial! Really love this, it's genius. I tested it on myself and my AntiVirus (MSE) detects it.. but still awesome!

?AY?ØY - January 28, 2012, 4:37 am

Great work!

Don't think its FUD, but thanks!

a308sniper - January 29, 2012, 5:37 pm

nive tut, im trying it now, looks prety cool

biohazardhosting - January 29, 2012, 6:20 pm

lol u said its a fud.... but its nt a fud check this

<http://elementscanner.net/?RE=fcb27100395093df24b5dfb446f82172>

Dextra - February 7, 2012, 10:28 am

Awesome!

Thanks for this nice share!

leduc37 - February 7, 2012, 10:47 am

thank you very much for sharing it's cool dude

Smarty43 - February 7, 2012, 1:44 pm

Nice going to try it right now

thanks annyway

morteli - February 7, 2012, 2:41 pm

Hi,

can't download it.

pls confirm that the link are still working.

Thx

Alish777 - February 9, 2012, 3:27 pm

And this will keylog any1 who pushes run?

Alex4747 - February 9, 2012, 3:43 pm

thanks for the guide, surprised that norton doesnt detect it

Alish777 - February 12, 2012, 11:53 am

Fileave doesnt look like its still up and runnning, so is there an alt to that site?

mich43l - February 12, 2012, 12:49 pm

what hosting site should i use? i cant find anyone or yes i can but they all suck.

domien - February 24, 2012, 4:47 am

LOL MAN IT WORKS!!!!

I LOVE YOU :D Really u solved all my problems!

This guys earns a statue in the white house!

noldenity - February 24, 2012, 5:10 am

This was very usefull thanks! i gonna use this on my site.

PoxYY - February 25, 2012, 6:14 pm

Very nice. This might come in handy some time ^^

prashantjcha - February 25, 2012, 9:23 pm

looks great ...i will give it out a try

pst291 - February 27, 2012, 9:23 am

Good guide ,,i will come back to this ,, as i cant portforward im having trouble setting up rats
,,always the same issue,,cant connect to anyone even myself unless i dont use my no ip and use
local host 127.0.0.1 if anyone could shed light on this it would be awesome .i tries xpn thingy,,got
brief connections but when i bind and crypte the file and get it sent to comp 2 or 3 on the network it
wont connect as usual.ive followed every guide for every rat to the letter and always the same

anyways ,, enuff about my stuff ,,good guide thanks for taking the time to do that ,he cares and he
shares

DEVIL MAY CRY - February 27, 2012, 10:39 am

Nice tut, but silent java drive by help to get more victims ?

lostmind888 - February 27, 2012, 10:45 am

nice and easy tutorial mate

thanks for the JDB!

Arês™ - February 27, 2012, 8:02 pm

Is there any chance that after the slave run it they automatically redirect to another specific URL ?

BelgianRofl - February 27, 2012, 8:38 pm

Thanks for putting this together, its very useful =D

Tbag - February 27, 2012, 8:46 pm

(Feb 27, 2012 09:02 PM)Arês™ Wrote: [\[CITE\]](#) Is there any chance that after the slave run it they
automatically redirect to another specific URL ?

Yes that is possible but I have only seen it in the paid java drive by's. I'm sure if you could code java
you could implement that

uglykidjoes - February 27, 2012, 10:24 pm

Great tutorial very well detailed will try this later

Ching Oracle - February 28, 2012, 3:01 am

thanks 4 share i have one question its still fud or not?

KiruKashi - February 28, 2012, 3:27 am

It's nolonger FuD the Jar gets detected.

Tbag - February 28, 2012, 3:28 am

(Feb 28, 2012 04:27 AM)KiruKashi Wrote: [\[CITE\]](#) It's nolonger FuD the Jar gets detected.
Obviously, this is over 2 years old

jpo38 - February 28, 2012, 8:14 am

great tut. will try it after get things setup

UnfriendMe - February 28, 2012, 8:12 pm

Looks great, I'll look into it tomorrow! Thanks

BadGame - February 28, 2012, 10:25 pm

very good tutorial i like it this was very helpfull keep it up man

[nK]-Smok3- - February 28, 2012, 10:55 pm

Excellent tutorial. Thumbs up, A+?

Will this still work if I use a FUD server? Please respond back, I really need to do this one RAT attack and I was planning on using this, it's pretty crafty. Will it work if I crypt my server, make it FUD, upload it, replace it in the notepad and put my own pictures in, to make it my own website?

marda417 - February 29, 2012, 3:45 pm

hey, what file upload site should i use for a direct link the ones in the OP didn't work for me cos the sites were down

?Monkey ?D. ?Luffy - February 29, 2012, 4:05 pm

Excellently explained and a nice Java Drive By it is.

Good job!

Kind Regards,
XoR

Fatality614 - March 1, 2012, 1:28 am

Thanks for the tut there is 100 of this one :P but thanks for bringing them up and btw it wont even work if the guy have anti virus lol. Some body nice need to update it xD

Jeremyz - March 2, 2012, 11:54 am

Many thanks bro worked for me now only have to get a new virus ;)

UnfriendMe - March 2, 2012, 2:11 pm

Where you tell me to edit the index, I don't have the option too. Help

freeman13 - March 2, 2012, 2:35 pm

is this a Way of how to spread RAT server?

Erban - March 29, 2012, 3:26 pm

Who could help me to create a javadriveby?
Skype: Bani195

Msn: Luisa1177@hotmail.de

Please pm or add me on skype or msn.. i really need it

you will get something for that ;)

Hikki - March 29, 2012, 10:55 pm

Awesome tutorial bro..!! ?

candid474 - July 11, 2012, 8:50 am

Thanx for tut very nice please can u upload it back because mediafire. has remove it
Thanx for tut very nice please can u upload it back because mediafire. has remove it

EgoCentral - July 11, 2012, 9:31 am

Hey thats a nice tut there dude, im gunna try it.

I have a question however, on SPAM do i want a free domain or php host

ImSupermanMods - July 13, 2012, 12:29 pm

Thanks it works but does anyone have a new website to upload a virus to thanks.

PingByte1337 - July 13, 2012, 1:27 pm

Thanks for share, i search this tool for any time

ssraiki - July 13, 2012, 1:29 pm

thanks a lot brother its a fantastic java drive by

luv. - July 14, 2012, 10:44 am

Can anyone re-upload for me? OP is taken down.

dettoh - July 17, 2012, 12:45 am

I downloaded everything, but are there any more websites that support direct linking? Do I need one?

dorugreymon - July 17, 2012, 12:50 am

(Jan 16, 1970 05:55 AM)dettoh Wrote: [\[CITE\]](#) I downloaded everything, but are there any more websites that support direct linking? Do I need one?
try hostmyexe.com
35 characters is retarded....

root.localhost - July 17, 2012, 8:01 pm

I'd be more intested in learning how to make your *jar file FUD then to have to relay on someone elses jar.

bishmack - July 17, 2012, 8:50 pm

Do any of you know how to make an iframe keylogger?

Nygge - July 18, 2012, 5:30 pm

I'm gonna download it now and test it!

lilalexq22 - August 7, 2012, 2:11 am

Isnt it possiblr to intigrate into fake wi-fi or something? Idk just somthing i heard. If its possvile can somone tell me how?

yat32 - August 7, 2012, 2:24 am

Fuck yeah nice thanks a lot man!!!

Worked great ^_^

23anonymous00 - August 7, 2012, 7:19 am

for people who dont know where to upload the exe, just use Dropbox! It works great and never gets removed.

FroFro - August 7, 2012, 11:34 am

(Aug 7, 2012 07:19 AM)23anonymous00 Wrote: [\[CITE\]](#) for people who dont know where to upload the exe, just use Dropbox! It works great and never gets removed.It wown't stay FUD for long on dropbox.

lasttimeitrustyou - August 7, 2012, 12:03 pm

I'm wondering, what is the point of paying for a JDB, such as the ones in the premium section, if you can just make your own?

I was going to by one, but now I'm having second thoughts.

31c6fe2dd1 - August 8, 2012, 8:38 am

So what can we use to host our exe?

Rulio739 - August 8, 2012, 1:16 pm

thanks a lot brother its a fantastic java drive by

Clarkeson - August 8, 2012, 2:30 pm

AVG Picks it up. I got a java script exploit notification

PoisonKnife - August 9, 2012, 11:15 am

Thank you very much for this bro! ?

I needed a JDB cam template! ?

Sarazar - August 9, 2012, 12:32 pm

Thanks alot but no one of this Sites work... can anyone say me a other Page?

nudelkuchen - August 9, 2012, 1:19 pm

Really nice drive by going to test it out :P
easy to understand

totombomb - August 9, 2012, 1:58 pm

Thanks going to try it, anyone got any more templates?

Sandikaaa - August 9, 2012, 2:02 pm

Not fud anymore my eset detect it :(

timslim2 - August 11, 2012, 10:17 pm

thanks alot for this awesome tut cheers

iZeki - September 8, 2012, 11:38 am

For step 3, it won't let me click on edit, how do I get that option?

Lil Benadryl - September 8, 2012, 2:56 pm

(Sep 8, 2012 11:38 AM)Sagax Wrote: [\[CITE\]](#) For step 3, it won't let me click on edit, how do I get that

option?

Just do open with notepad or notepad++(I prefer notepad++.) That should work then edit the code to your website with the link and it should work if this is still working, I am not sure but, I am going to be trying it out soon. ?

Aceofgames - September 8, 2012, 4:33 pm

ok i really want to hack someone and i have everything but whenever i try to go to the websites that you have in this tut my computer cant find it. every website it says the website doesnt exist please help me

BennyTheWicked - September 8, 2012, 8:11 pm

All of those direct download sites are dead... Can anyone hit me up with a working one?

Pulzez123 - September 8, 2012, 9:24 pm

Nice guide, helped alot easy to understand

SeventhS - September 8, 2012, 9:37 pm

Nice tut I might actually use this, Thanks

samrokzz - September 8, 2012, 9:37 pm

Seems really nice . Gonna check it out .

QuantumTunnel - September 11, 2012, 10:27 am

It is asking me to Install a Java Runtime 11 or some shite on Firefox :L ????

kmartisnice - September 11, 2012, 6:39 pm

this is an awesome tut man. but had problems trying to open the index to edit it. would appreciate some help thanks man!

SE7LI - September 11, 2012, 10:43 pm

Real HQ tut, thanks man, I might try this soon!

Real HQ tut, thanks man, I might try this soon!

Pops - September 12, 2012, 12:42 am

Thanks man!

Now I have 2 JDB's!

:)

Much appreciated.

Crazy Ralph - September 16, 2012, 3:43 pm

Really cool idea. Genius really. I'm gonna keep learning about other JDB's but this is a great idea to keep in mind!

evolutionroh - September 16, 2012, 9:48 pm

Nice tutorial !!!! thanks for sharing

AnonymousForCh4n - September 16, 2012, 11:25 pm

wow....thanks dudee. really helpfull for beginners like me :P

[K???TiK]™ - September 17, 2012, 1:07 am

thanks for the info man, imma be putting it to use in a minute

Finleyek - September 24, 2012, 3:51 am

Can you re-fud the Client?

Great tut.

swentiz - September 24, 2012, 10:13 am

Nice tutorial and easy to understand! Good job!

josemoop - September 25, 2012, 4:54 pm

thnx and nice guide gonna try latter :p

DefXRampage - September 30, 2012, 5:26 am

mine dont work....

done everything in here i even went on site to test it i used uppit?

does uppit work for the hack download?

DefinitelyNotACop - November 19, 2012, 5:24 am

thank you so much dude.. it's much appreciated..although trusty old eset nod32 picked it up instantly ty :)

LowShotz - November 19, 2012, 5:53 am

(Nov 19, 2012 06:24 AM)bananathief Wrote: [\[CITE\]](#) thank you so much dude.. it's much appreciated..although trusty old eset nod32 picked it up instantly ty :)dude this is from 2010.. why dig up old posts?

Atharva - November 19, 2012, 6:51 am

A short but simple tutorial .

Thank You !

Dr.Heisenberg - November 19, 2012, 6:55 am

really awesome tut and friendly for all these hacker there are new in the business

wccskow123 - November 20, 2012, 3:59 am

it contains a virus shows java:Agent-ASD[expl]..I'm using avast 7

michelle44 - January 15, 2013, 12:31 pm

Very good tutorial, thanks for this!!!

Superkawaii - January 25, 2013, 3:38 pm

is this still working? anyone

message:D

Mindpower - January 25, 2013, 4:52 pm

nice tut, thank you for this :) keep it up.

Azell - January 26, 2013, 12:29 am

I need help.

Basically I am sure I did everything correctly and all it says, "Install Plug In" which would take you to java page to download java. Why is this happening? Isn't it suppose to run? Is it my direct virus link. Can you please reply back I would really appreciate it.

Thanks.

Meatwardo - January 26, 2013, 2:40 am

Thanks, I came into this thread seriously knowing nothing about hacking and was able to get ClassicKeylogger and have all this done in about half an hour, it was really easy to do with your guide. Now I'm spreading it.

tjongo_boy - January 26, 2013, 7:38 am

this tutorial is still working but the .jar file has a detection rate of 20/35

KissMyAxe - February 3, 2013, 12:51 am

i made a java drive by byt his tut but when i click on install missing plugin instead of downloading my server it is downloading java runtime

venomousstyle - February 3, 2013, 9:38 am

I am new to hacking, so thank you for giving me this tutorial, friend :)!

luvaquin - February 3, 2013, 11:53 am

cool nice tread hopefully helpful.... i need good crypter pls

DrGreen - February 4, 2013, 12:07 am

Helo there. Pretty simple and nice tut so you got an A+ from me.

I still have questions (noob ones):

Is this something with which you can spread a RAT or a BotNet ?

How does this work ?

What is a DriveBy ?

Can an antivirus, let's say Avast AV, detect this ?

Any info or links will be appreciated :D.

cretinel4ever - February 4, 2013, 5:24 am

Antivirus detects if file is not crypted FUD!

Java drive by - executes ur server once they click "RUN" applet ... your file must be hosted on some host that allow directlink as he says "somesite.com/server.exe" , i did not find any, so i just use XAMPP and Proxy!

Ty for Java drive by.

Xtazic - February 4, 2013, 7:35 am

Bonjour,

using Dropbox for the link, need a working RAT now haha! Great tutorial for beginners.

Thanks a lot event if it is old.

Regards,

X.

SoundStick - February 4, 2013, 7:37 am

Hey, thanks for the tut man, my old JDB didn't really work haha):

Hope this one does :D

-J

Surreem - February 4, 2013, 8:14 am

this guide was very helpful thanks :)

mr.popper - February 4, 2013, 10:35 am

Really useful tut for beginners. Thanks

Haseo™ - February 4, 2013, 10:40 am

This was a fantastic tutorial much appreciated. explained quite well and the pictures were great. HQ

Yoinked - February 14, 2013, 5:20 pm

Thanks for the pack!! Works really good!

#Reliant - February 14, 2013, 5:45 pm

Im kinda a "noob" but whats all possible with a java drive by.

Scrub. - February 14, 2013, 5:47 pm

This is an awesome tutorial brosef :D

Graveyardsong - February 14, 2013, 6:24 pm

Thank you for this great tutorial :)

Nova2k7 - February 15, 2013, 2:46 am

the upload sites mentioned are no longer working! are there any others?

Fkn - February 16, 2013, 9:25 am

Great tutorial man. Thanks for the share :D!

InfamousKid - February 17, 2013, 5:29 am

Thanks for the tutorial. Bookmarked for future reference, could be really usefull :)

Pioneer# - February 25, 2013, 12:38 am

Malware detected in the zip pack for me. :?

crysised - February 25, 2013, 2:52 am

I'll try this later, thanks for tutorial.

Whiteh4t - February 25, 2013, 3:35 am

it wont work if you dont remember http://..

KissKissBangBang - February 25, 2013, 8:29 am

It's a very nice tutorial ! Thank a lot :)

Jetthebuizel - February 25, 2013, 9:09 am

Wow, one of the simplest tutorials I've seen. Boomarked for later. Great thread bro :).

~Jetthebuizel

hellgate7 - February 28, 2013, 10:44 am

Nice tut..working fine for my survey virus. Thanks!!

herrdeutschland - February 28, 2013, 2:40 pm

veryyy good tut dude ,and very good coding ,but unfortunately it got detected

thanks

Xilla - February 28, 2013, 5:05 pm

Nice tutorial m8, i am gonna do this to my friends :)

piet - March 8, 2013, 6:29 pm

Very nice tutorial!

-35 charatars

IceTimux - March 8, 2013, 9:26 pm

Wonderful tut! works flawlessly and customizing it is easy too if you know some HTML.

SoldierX - March 8, 2013, 11:05 pm

Impressive JDB mate :) good share though:)

tacee - March 9, 2013, 2:05 am

Awesome tut! Keep it going brah! <33

Extortian - March 9, 2013, 2:27 am

Yes very nice TUT i will be downloading this..

_superior - March 9, 2013, 3:29 am

Very nice and detailed tutorial. I hope it will help me too :D

lingoalex - March 9, 2013, 8:27 am

nice tutorial keep the good work rolling

N00BH4CKS - March 9, 2013, 11:11 am

Nice simple tutorial, exactly like it should be (my opinion)

alexlandonflicksss - March 9, 2013, 11:17 am

Thanks for the tut bro.. this will help a lot of people.

DARKSIDELORD - March 10, 2013, 4:41 pm

Nice Tuts am surley giving this a try hope still works

mcdoff - March 13, 2013, 6:05 pm

If you run the javadiveby file through metascan-online, you get 22 threats. Is this normal/problematic?

Royal17 - March 13, 2013, 9:56 pm

Thanks for the tutorial. I will definitely try it out.

iDuL - March 13, 2013, 9:59 pm

Wow, this tut makes things look incredibly easy and simple.
Great tut and thanks for the contribution.

L?on - March 13, 2013, 10:07 pm

very nice thread i will give this a try :P

Faye Reagan - *March 29, 2013, 1:59 am*

the link is broken would love to try this!

xZile - *March 29, 2013, 2:11 am*

Nice tutorial. I'll try this out and see how i get on.

Explodent - *March 29, 2013, 3:07 am*

Nice work man, i'll try it later!. :)

.Misterx. - *March 29, 2013, 1:13 pm*

Nice work man but the link is broken :(

Zap~ - *April 1, 2013, 12:29 pm*

In the index.html code it needs to be "Banner.gif" not "banner.gif". It still is really nice, tho. Thanks!
