eXCrypt - Private Version | 94% UD

I have decided to release the private version of my 94% UD crypter - eXCrypt. It was known as iCrypt before, but because of another crypter with the same name, I was forced to change it. The [original thread](#) is located [here](#). It does not need a stub, currently, but if it ever was not FUD anymore, you could add a stub in the same folder and it would be FUD again. I am asking \$5 for this private version. You go first. Paypal only is accepted. I am only selling 20 copies right now, so get yours while you can! This is 100% coded by me, no copying and pasting. You do not have resale rights. I will be releasing newer versions of my crypter later and hopefully they will be 100% FUD.

Copies available: 20/20

Sp1d0r - December 20, 2010, 7:49 am

No ones going to buy a crypter thats 3/16. Plus your thread says 100% FUD. Make up your mind lol.

Galaxy Wave - December 20, 2010, 7:51 am

Can you not read or something?

he clearly states that is 94% FUD!

Go get to glasses???

eXero - December 20, 2010, 7:52 am

It is 1/16, not 3/16. It is 94% undetectable, and some people may buy it. I am workign on V2 right now that hopefully will be FUD.

Sp1d0r - December 20, 2010, 7:54 am

Go get to glasses???

At the top of the thread he had 100%, but in the thread name he had 94% is what im saying.

eXero - December 20, 2010, 7:54 am

I fixed it. Get over it. If your not going to buy, don't post on my thread.

Sp1d0r - December 20, 2010, 7:55 am

(Dec 20, 2010 08:54 AM)eXero Wrote: [\[CITE\]](#) I fixed it. Get over it. If your not going to buy, don't post on my thread.

Alright, good luck with sales bro. ?

Th3DON - December 20, 2010, 7:59 am

Why would you seeIII a crypter thats 3/16. Get it FUD and then sell it. Good luck!

- XionZ

eXero - December 20, 2010, 8:01 am

Holy crap! It is 1/16!!! Read the thread!

Dionysos™ - December 20, 2010, 8:05 am

Good luck on sell. Btw It would be better if FUD but 5 \$ is really cheap. I hope it's Runtime ;)

eXero - December 20, 2010, 8:11 am

It is runtime and scantime I think. Is anyone going to buy it?

Dionysos™ - December 20, 2010, 8:16 am

(Dec 20, 2010 09:11 AM)eXero Wrote: [\[CITE\]](#) It is runtime and scantime I think. Is anyone going to buy it?

You think ? Does your crypter use runPE ?

Th3DON - December 20, 2010, 8:16 am

Your not sure id it is runtime and scantime? If it has a runpe then it is.

eXero - December 20, 2010, 8:23 am

No it is not runtime or scantime. I was going to implement this, but didn't. Anyone going to purchase?

Gooples - December 20, 2010, 8:26 am

I'll buy if i get V2 for free.

wyterzzz - December 20, 2010, 8:51 am

Haha,I am not flaming but who is going to buy 1/16 crypter,which isn't even runtime ??

Arron XR - December 20, 2010, 9:08 am

looks really nice and \$5 is nothing guys so stop bitching.
good luck with sales bro.

just one thing I would do is say 94%fud on Novirusthanks.org.

CYSER - December 20, 2010, 9:21 am

AHHAHA GTFO NOOB WITH YOUR vb.NET COPYPASTA CRYPTER

pr0t0typ3 - December 20, 2010, 9:27 am

Does it use CodeDom ? If yes are you using managed resources,native resources or are you storing the file in a base-64 string ?

f1sh - December 20, 2010, 9:36 am

Just curious on how something could be 94% Fully Undetectable. Regardless, nice job if you actually made this.

SIM-388794 - December 20, 2010, 9:39 am

(Dec 20, 2010 09:01 AM)eXero Wrote: [\[CITE\]](#) Holy crap! It is 1/16!!! Read the thread!

Bro, look at your "Proof that it's 96%". That's why everyone is saying that it's 3/16, because your proof says that it is -.-

Otherwise, I'm considering buying this - what's the chance that it's going up to 100% anytime soon?

xvisceral - December 20, 2010, 9:39 am

Scan it on Scan4you. NVT is outdated.

SIM-388794 - December 20, 2010, 9:40 am

(Dec 20, 2010 10:36 AM)Dr. Acula Wrote: [\[CITE\]](#) Just curious on how something could be 94% Fully Undetectable. Regardless, nice job if you actually made this.

It's basically like saying "my homework is 80% complete." It's an expression..

pr0t0typ3 - December 20, 2010, 10:00 am

I think it can be fudded very very easy.

boogiebear - December 20, 2010, 10:20 am

scan a file that without a crypt is 16/16 so we know what all if it stays detected on any others.

Dionysos™ - December 20, 2010, 10:20 am

(Dec 20, 2010 10:39 AM)xvisceral Wrote: [\[CITE\]](#) Scan it on Scan4you. NVT is outdated. What do you mean by outdated ?!

eXero - December 20, 2010, 12:31 pm

Guys only post if you are buying. No other reason. And I am trying to get it FUD.

tristan6100 - December 20, 2010, 1:38 pm

i will most probably buy, im getting some payapl soon.

PECrypt - December 20, 2010, 2:18 pm

(Dec 20, 2010 02:38 PM)tristan6100 Wrote: [\[CITE\]](#) i will most probably buy, im getting some payapl soon.

WTF, you want to buy this from my lend 5 euro? rofl

eXero - December 20, 2010, 5:06 pm

Anyone going to buy? :P Still have 20 copies left.

tristan6100 - December 20, 2010, 5:45 pm

I will try to buy as soon as I get the money. Your work looks good and extremely cheap.

eXero - December 20, 2010, 5:48 pm

Awesome :) Can't wait! Does anyone want to buy??? Come on! Everyone buy!

Deadpool™ - December 20, 2010, 5:54 pm

It is impossible to be 94% FUD (Fully Undetected)

eXero - December 20, 2010, 6:12 pm

Dude! I don't giva shit if you don't think it will work, I don't care! If your not buying, don't post on my thread! Stop trying to raise your post count.

K!NG OF CHI - December 21, 2010, 2:05 am

(Dec 20, 2010 06:06 PM)eXero Wrote: [\[CITE\]](#) Anyone going to buy? :P Still have 20 copies left. eXero... Sorry man; of course u have.

No one will buy a nun FUD; non runtime Crypter.

Get it fud and runtime fud and restart ur sales mate :-)

eXero - December 21, 2010, 7:21 am

I guess your right Karpaltunnel. It would be right of me to close sales for now.
