<http://www.simonesimons.nl>

Very Happy With My Deface :)

**Naww** - December 22, 2010, 3:05 pm

Nicely done my friend.

Care to share your method??

**Dark Injection** - December 22, 2010, 3:22 pm

I injected through mysql injection. Then cracked md5 hash for admin in user table. Then logged in as admin and uploaded the shell as shell.php.gif. Then renamed it to shell.php. Then while using the shell i uploaded my deface over index.html

**Bunk** - December 22, 2010, 3:30 pm

Mind sharing the dork you used to find the website?

I can't find any vuln website recently. :(

Nicely done bro keep them coming I love seeing defaces.?

**Dark Injection** - December 22, 2010, 3:32 pm

Ok this is the dorks i use and used for the site:

inurl:blog.php?id=

inurl:news.php?id=

W0w they are what most people use I try to use dorks that most people wouldn't use.

**Dark Injection** - December 22, 2010, 3:48 pm

yeh i just skip to about page 17 on google and its a random site. But i cant find many vulns :(

**legoman** - December 22, 2010, 4:02 pm

A nice little trick is to think of a rely good word that people wouldn't think of and use that.

Like COLLECT but I have done all that word lol.

Deface is fixed....?

Looks like site admin is pretty quick I guess. :P

**Dark Injection** - December 22, 2010, 8:12 pm

The Site Got Fixed :( Waste of Time :(

**pushl %ebp** - December 22, 2010, 8:15 pm

Page is just blank now... Nice work anyway. ?
