Thread: [\[EASY\] How to Setup iStealer 6.3 + Clean Cracked iStealer](#)

saru4141 - December 23, 2010, 8:30 am

If you don't already have iStealer download a clean version here ::

http://#.com/files/438905729/iStealer_6.3.zip

Credits to: Geek(For making this tutorial.), Hav0c(For releasing a virus free cracked iStealer.)

Original article :: <http://infinity-hacking.org/showthread.php?tid=33>

Hey guys,

Today im going to be showing you how to setup your iStealer 6.3 Legends.

First of all download the attachment included in the thread and extract the files into a folder.

Okay so let's start.

Sign up for an SPAM account.

[img]http://img585.imageshack.us/img585/942/istealer1.png[/img]

Done.Now go to the control panel and click on MySQL and create a new database.

[img]http://img88.imageshack.us/img88/9787/istealer2.png[/img]

Now extract the files from the PHP Logger zip file and open up index.php with notepad or any other editor.At the top where it says configuration change the data to the one you recieved when you made the MySQL database everything else needs to stay as it stays.You can also change the panel password.Once your done save the file.

[img]http://img823.imageshack.us/img823/456/istealer3.png[/img]

Okay now upload the php logger files onto the site with the file manager.

[img]http://img403.imageshack.us/img403/285/istealer4.png[/img]

Okay we're almost done.Open up iStealer 6.3 Legends.exe now if you dont feel safe run it in sandboxie.

The URL is now <http://www.yoursite.subdomain.com/index.php> login into the stealer panel and test in the program if it works.You can bind the stealer with an file if you want and also change the icon of the builded stealer.

Okay once you did that click on options and choose the settings you want the default one are the one im gonna use.Now click build and your stealer will be builded.

[img]http://img31.imageshack.us/img31/6088/istealer5.png[/img]

Now you can crypt your stealer with a crypter there are lots of them on the internet or just buy vip at our forum and you can get good crypters so that your stealer is fud from anti's.

You sucefully made your stealer now just send the builded file to your victims and you will get logs into your stealer panel.

Enjoy,

(Dec 23, 2010 09:34 AM)mr.gapbuster Wrote: [\[CITE\]](#) ERROR: SKIN FILES NOT FOUND ?? AM I HACKED NOW? you silly bastard
try extracting it from the zip.

mr.gapbuster - December 23, 2010, 8:40 am

Okay, what do you mean from the zip? I use Winrar.... just open it then press Extract.

Also tried Right click on the .rar file, and extract here.. ddnt work either!

does the program work for you btw?? im using windowsxp sp2

BotMan - December 23, 2010, 8:47 am

works here, i'm using Windows 7... the download is a .zip

Hey Mods please delete this thread, i didn't make it!! it seem somebody keylogged me and made this thread!!

versx - December 23, 2010, 3:21 pm

Already been posted a million times before.

<https://hackforums.net/showthread.php?tid=526734>

Guess this is 1 million and 1 now?
