[img]http://lightpics.eu/images/pjjpp.png[/img]

Step 1

First you need to download and install EasyPHP, when it's done run EasyPHP and you will have something like : You can turn off MySQL it's useless for the tutorial

Step 2

Now you need to edit your hosts file :

C:\Windows\System32\Drivers\etc\hosts

Open the hosts file with Notepad and add this line : 127.0.0.1 psdto.com

Step 3

Now you will put the PHP files which you have downloaded, into this directory :

C:\Programs\EasyPHP-5.3.3\www

hi , looks nice and hope its still FUD...

looking for the pass

will post the results soon..

thank you

hey guys just unlocked the pass from his shitcash..

cant forget to mention that this is the first time i unlocked any download from shitcash.
whenever i went to shitcash in the past the download never unlocks for me. this time it did wthin less than a minute.

thank you and trying to play with this new cryptor.
will post the results soon..

tested this cryptor with cybergate i get error when i test the encrypted file in my sandbox "runtime error'5' "

dont know why...

and it never executes and no connection at all..

further...

i use fly-cryptor for my cybergate and it works like a charm
dont know what i am doing wrong with this one.

I figured out. I was using xampp and i forgot to turn it ON LOL so if someone have this error "This computer is not authorized to run Galaxy Crypter" its probably cause of not running apache webserver (EasyPHP, XAMPP, WAMPP...).

BUT, now i have new problem. If I try to compile sub form USG it gave me a compile error. Will try to figure it out.

wyterzzz - December 30, 2010, 7:46 am

stop complaining about \$sharecash and etc..here is thread where the download link isn't \$sharecash and you don't need to install EasyPHP:
