nofear1999 - December 24, 2010, 2:05 pm

NEW THREAD: <https://hackforums.net/showthread.php?tid=939862>

thread ([Click to View](#)) THIS TOOL IS FOR EDUCATIONAL USE ONLY. THE CREATOR "Nofear1999" DOES NOT TAKE ANY RESPONSIBILITY FOR ANYTHING THAT YOU DO.
[img]<http://dl.dropbox.com/u/7913228/Heavy%20Orb%20UDP%20Cannon.png>[/img]

Here's my christmas present to all of you on Hackforums. Here is my UDP Flooder. Unlike the Light orb ion cannon, this one actually works. It is called the Heavy orb UDP cannon. This program WILL freeze upon clicking Imma firin mah lazor because it is so powerful that it freezes the program. THE UDP FLOOD WILL NOT FREEZE THOUGH.

To exit the DDoS you must close out the program.

With that said, let's get to the functions.

Functions:

- Powerful UDP Flood
- SET YOUR OWN DDOS MESSAGE, BY SETTING IT YOU CAN RUN HIGHER OR LOWER DDOSSES DEPENDING ON WHAT YOU SET (it goes by bytes)
- Orgasmic GUI
- FREE
- Troll powers, mainly because it looks like a troll made it ;D

Right, well let's get to the virus scan.

<http://www.virustotal.com/file-scan/report.html?id=44dd9cc963322cb0bc8854b0054fc172ede9b8846f14265032b2834d0541151f-1293227987>

Yes, virus total. 0/43 :)

[DOWNLOAD LINK IS NOT SHITCASH!!! IT'S ALSO DIRECT SO YOU CAN GET TO DOSING RIGHT AWAY!!](#)

Enjoy and Merry christmas.

From Nofear1999

Edit: this DoSes as fast as your internet can handle so you will not be able to access the internet while a DoS is in progress. That's why I reccomend using your neighbor's internet to check or something :) (get permission first)

goryolukas - December 24, 2010, 2:11 pm

Indeed 0/43. ^_^

Checking it now. Thanks

nofear1999 - December 24, 2010, 2:12 pm

and I wouldn't scan it on Virustotal if it were a virus either. It also loads way too fast for it to be a

virus. Anyways enjoy :D

Greek - December 24, 2010, 2:15 pm

ill try this on my laptop lmao.

nofear1999 - December 24, 2010, 2:19 pm

On your laptop connect to a different network so you can check from your reg PC if it's down as it uses all your netz0rz to initiate the attack. it does NOT crash your net, it just uses all the resources to attack the site.

Simba™ - December 24, 2010, 2:21 pm

I've ddosed a site but my net went down because i eats all, so basically this is the best booter that can exist. I've got internet access on my phone so I'll try it later on.

nofear1999 - December 24, 2010, 3:05 pm

There you have it. Proof from the words of simba himself.

In other news, a 15 year old male with the hacker name of "simba1337" has been arrested for taking down Travian using a DoS tool coded by a 14 year old boy called "Nofear1999".

Now the police have taken Nofear1999 in custody however Nofear1999 could not be held because the program was created for educational and IT use only.
