You got Tap Tap Revenge 3 or 4 and you want to download some of those two track pack which cost around 100 credits? You don't have any credits or already used it? Your iPod or other iDevice is already Jailbroken? Well I've got the solution!

Required: Installous /\

Step one. Go into Tap Track Store, below your credit you can see a button called "Earn Credits"

Step two. Go into the Premium apps section (You can download the free one, but those will give you more point)

Step three. Go on one of the offer and click: Take the offer (It will bring you to the app page where it will ask you to pay to download it) DO NOT RETURN THE THE PREVIOUS OFFERS OR IT WON'T WORK AND YOU WILL HAVE DOWNLOADED AN APP FOR NOTHING (Except if you plan using it)

Step Four. Go in Installous, find the app and download it. (Once installed, try it once)

Step Five. Return to Tap Tap Revenge, normally you should be brought back were you were previously, wait 5 seconds and it will either return you to the app page saying it's installed or it will say that the offer is unavailable.

Step six. Enjoy your credits :D

Important /\: The app must be the current version of it, make sure by looking at it when you're taking the offer and when in Installous, at the very bottom.

Edit: It can also be used for pack of 4 and 6 songs, you need 200 Credits for a pack of 4 song, and you need 300 for pack of 6 song. Faster way:

Lol. Darkxlord... is your name in Tap Tap Revenge Darkpro0?

GI?ryallowed - December 30, 2010, 5:47 am
Nope its darkxlord93 :3 whats yours?

nathan.505 - December 30, 2010, 10:24 am
Just tried it. Works great.
Thanks.

Finally, it was useful for somebody, also, if you want pack of 4 songs it cost 200 credits, 6 songs 300 credits, so just download more app!

works on tap tap 4 too
been doing this for ages xD

you can also DL the premium tap tap apps (gaga, coldplay, metallica, etc.) and should be able to import the content into tap tap 4 (at the bottom of the earn credits page).

GI?ryallowed - January 5, 2011, 7:55 pm
I tried to import Tap Tap NIN, but you can't, it seem that it has a problem into importing it if it's an cracked one.

AMDesai - January 5, 2011, 8:01 pm
I've done it with katy perry, gaga (1 and 2), coldplay, and metallica, but did have problems with SoL and nickelback, not sure why (all cracked apps), imported into tap tap 4

ATTENTION: Instead of doing all that...just download the track from <http://www.sinfuliphone.com/showthread.php?t=27829> and import them using SSH? Alot easier lol and quicker...

GI?ryallowed - January 8, 2011, 10:52 am
Thanks for All your post, I'm going to add DatNigguh link since it could be useful.

DatNigguh - January 8, 2011, 5:05 pm
@Dark: Coolio - ye used to do that method to back on my 2g and tt3...then found out I could just download overnight the massive packs, drag and drop xD

GI?ryallowed - January 16, 2011, 2:30 pm
Drag and Drop is much simplier, but if you don't want a shit load of song you won't play, it can be easier just to download app then get credit :) also, SSH is not made for everyone :/
