Thread: [Msn Lockout Bot 100% WORKS Will Show Demoooo !!!!!!!](#)

Vincenzo? - June 23, 2009, 4:19 am

hello, i posted about my bot a while ago and i got hardly any reply because my post wasn't the best or u think i lied !.

so i thought i would post a better one about my bot and files.

if yous think my bot/files are a lie and they DONT work !! why not pm me and ask for my msn address and i will prove they work and give u a demo and 5 slots for 1 week for FREE !!.

these files work 100% promised !!!!

the msn bot is ran on mIRC and has to be hosted on a windows server or a windows pc can be windows 98/xp/vista any one !

if you are a n00b and dont know what mIRC is ! google it dont ask a silly question in a post thanks .

if you are wondering "whats a slot", well slots are what the email address you want froze goes into. eg if some ones anoying you on msn you would get there email address and say to the bot .freeze (email address here).

the bot will now put that email address in 1 slot !!!!

so that means if u have 5 slots ! you can freeze 5 people etc !

some of the commands the bot has are bellow in a skreen print !.

[IMG][http://i40.\[censored\].com/qx8kjm.jpg](http://i40.[censored].com/qx8kjm.jpg)[/IMG]

all the crap msn freezers like ice cold reloaded and all the ones people post on forums are CRAP !!!!

my files are 100% working and will freeze forever aslong as the server/pc is online !

i am selling slots, bots & the msn bot files

if you buy the files you can make your own bots ! and sell them

i will also give instructions on setting up !.

rep me to if you think these are good ?

ep1capple - June 23, 2009, 4:25 am

Graff1ti - June 23, 2009, 11:07 am

This BOT is the best guys .. i tried the demo and it's working 100% great ! it has many functions and can be used for many goals as " 24/7 Freezing - best spamming - booting " also it has never been offline ! ... this is not my first BOT to use but believe me this is the best ! ?

Try the demo or buy the BOT and you will never lose ! ?

Diesel- - June 23, 2009, 2:35 pm

Or just use the rootmonkies to freeze msn's..

-spider- - June 23, 2009, 2:55 pm

Quote:It can freeze forever

Can you give us more details on this, whats to stop somebody from just resetting there passwords and getting back online ?

Vincenzo? - June 23, 2009, 8:24 pm

when they go to reset there password the freezing function jst changes it there and then so there still locked out there is no way they can get back on by resetting there password !

Interesting... somebody freezed me a few weeks ago from a bot, possibly the same as this one and i got back in after resetting my password a few times by sending the reset links to my other account.

There is also a other way they can get back on, this way being, to simply send a email to microsoft and ask them to remove the block.

This is true, this bot is very similar to the rootmonkies bot.

With the rootmonkies bot i belive the admin often clears the list of accounts being freezed because there servers cant handle it.

This brings me to my next question,

If we pay for the bot files from you, and host this on our own servers surely after time we will need to free up some space/slots or the server its hosted from will exceeded its bandwidth limits. no ?

Vincenzo? - June 24, 2009, 4:00 am

no the slots and that dont really take up alot on bandwidth i run mine on my windows server from tagadab and its never ran over its bandwidth and thats me running like 5 bots sumtimes more on it and evry one i have frozen hasn't got back on by resetting there password, and iv never seen this rootmonkies bot ? whats it like

H4XX'R - June 25, 2009, 12:47 pm

I also am on this bot, it works 100% and has not failed me yet. i also have bot files which i host on my computer, although garys are much better as they are on a windows server 24/7,
