Yes it will. It's basically an auto-blogging software.

It takes about 48 hours for CPALead. This eBook focuses on Leadbolt, and they have instant approval!

If 1 was the hardest and 5 the easiest, I'd rate this a 5/5 ?

It's 100% working, which means you will if you do it right. Yes I make \$65 a day with it, otherwise I wouldn't say you can. You wouldn't need to maintain anything.

It depends when CPALead pays out, I think it's like twice a month. I don't use CPALead, and you don't have to.

Just bought the ebook, its more inclined towards blackhat, if you use it as it is described in the ebook, you will be banned from CPALead sooner or later, dont know about LeadBolt. and I dont see how it is auto-pilot. There has to be consistent work though very little to keep things going.

Will be putting it to work in few hours after I get approved into LeadBolt. Also you need some investment.

The example given in the eBook is Blackhat, which definitely will not get you banned at Leadbolt, nor will you get banned at CPALead if you do use your brain. It is autopilot, I have let my setup running for months without having to do anything.. and you don't have need any investments at all ?

[img]

Quality of Information:???? 4 Stars.

Comment: The quality of information in this eBook was pretty good. It went into a fair bit of detail and went into step by step detail to show how do the method. There was clearly a lot of effort put forth here.

==

[img]

Ease of Use:???? 4 Stars.

Comment: Just follow the instructions and you should be fine. As I've noticed the author has already stated on the thread, it helps that you have CPA/Leadbolt in advance, apart from that it's pretty easy to use, I can't really say anything further without giving out details that would spoil it.

==

[img]

Layout:???? 4 Stars.

Comment: The layout could was pretty good I'd have to say. A good use of a lot of pictures which I

can imagine will help a lot of readers, and overall it's a friendly looking layout. At the end the author also provides proof of what he's made.

==

[img]http://upit.cc/images/5fe7ea0d.png[/img]

Grammar:????? 5 Stars.

Comment: Nothing's perfect, but this is as close as you can get to it I suppose. Good job with the grammar and punctuation.

==

[img]http://upit.cc/images/a7bd16f6.png[/img]

Originality:??? 3 Stars.

Comment: Of course there's been other eBooks with CPA and Leadbolt and different methods, but I found that the author made sure to keep the eBook interesting enough, thus making it more original than the dull ones with the same old methods.

==

[img]http://upit.cc/images/99eae7f1.png[/img]

Notes: It is a pretty good eBook. I know the whole CPA/Leadbolt eBooks can get old, but this still had something of it's own to it. As I said earlier the author does provide proof of how much he's made, and I do think it's possible to make 65+\$ a day with a little bit of work at the start (It goes on Auto-pilot after that).

You are not responding on PM, why is that?

Just got my \$17 stolen from you..

This is a misleading thread, which does not give enough information about the ebook.

Bad ebook.. (not at all newb-friendly) Not explained in any kind of way.

His ebook looks like it has been stolen from another forum, with minimal tweaks, so nobody should notice.

I dont know why he has gotten those reviews.

+ he wont even help me (+others) to get started.

Anybody correct me if I'm wrong (i need some real proof that this is not scamming people)

Is this a joke? I stole \$17 from you, lol?

It is very user-friendly, and no offense but if this is too much for you I suggest you stop trying to make money off the internet. This eBook has been written 100% by me and I have many satisfied customers.

Sorry to tell you I actually have a life and I don't spend 7 days a week on HF. Right now I have exams I don't feel like defending myself for such bullshit.

Now as I said, I have stopped using MSN. The PM system is great and I will answer whatever questions you have there. If you are not satisfied I will give you a refund.

Regards

It's your choice, I'm sure you will make the right one and start making real money ?

FYeah - May 26, 2011, 1:41 pm

Would this method work for UK residents?

Zedna - May 26, 2011, 3:04 pm

A joke? No, i dont joke about this, if you find it as a joke, may the Gods know what kind of a joker you are.

And a simple "I am busy at the moment, please be patient with PM answers" would have been appreciated.

To tell me that msn isnt necessary is a lie. It can be necessary, and in my case it was, since you are not answering my questions in PM..

You dont have to spend 7 days a week to just give me a quick reply on PM, as a matter of fact, you were online yesterday (after my PM to you was sent), and you were online today (after my PM was sent).

My PM wasnt a big roman, which would be going to take a day to read. It was simply just a couple of questions, that you probably had heard before, and therefore could have answered in no time.

But instead of answering my PM's you go into your thread and begins to whine over your own mistakes.

Then if you dont start showing me some kind of seller respect, then everybody should read this, and think; "ohh he's a bad seller, i think i should just find another better seller than this guy"

Your mistakes=

Not answering PM (atleast say you are busy)

having a very similar ebook to another (i dont know if i may post it here? it could harm your income)

dash23 - May 26, 2011, 5:08 pm

eye, i have one big problem with your method. already asked you via PM. please answer. again: his ebook is cool, great method i think. but, yeah, not so newbie friendly. but i do want to lern this stuff! thx
