Thread: [\[PREVIEW\]LogicalRat - The next generation of Rats\[PREVIEW\]](#)

eXero - December 27, 2010, 2:47 pm

I have picked up coding on my Rat, and changed the name because of requests on the [previous preview](#). We have changed the name from iRat to LogicalRat.

Mr. 9 - December 27, 2010, 2:52 pm

wow dude this is looking nice and your not even done just hope it stays stable

h-boy - December 27, 2010, 2:54 pm

Looks like its gunna be a sweet release.What price range are you considering?

Calvin. - December 27, 2010, 2:55 pm

The RAT Looks pretty sick, brooo.

What're the payment methods your going to use?

Willem - December 27, 2010, 2:57 pm

Looking good, good luck on this.

eXero - December 27, 2010, 3:34 pm

Price range(depends on if I find a business partner to help with the coding): \$15-35

Payment methods: Paypal, Credit Cards, probably more like alertpay.

Pokie - December 27, 2010, 3:41 pm

\$25 bucks wouldn't be bad to start off with , but i'm thinking logicrat sounds better than logicalrat.

efkariux - December 27, 2010, 3:46 pm

Not trying to be rude, but ..

Why does the thread title say "The next generation of Rats"?

I'm prettyyyy sure other rats have the same features..

eXero - December 27, 2010, 3:50 pm

That is not all the features, those are just the ones I am working on right now.

Risheng - December 27, 2010, 4:58 pm

It looks pretty good, but change the GUI. Remove the black background, put basic colors & it'll be perfect.

eXero - December 27, 2010, 7:02 pm

It is in basic colors? I like the black and white...

???c? - December 27, 2010, 8:18 pm

GUI is ugly to be honest and direct, change it asap, besides don't think this is going to be the next generation of rats, I suggest you to release a pub version also called beta version of that rat before selling it, and yeah if you plan to sell it good enough, make it a poly FUD rat wich can be crypted not like albertinos wich is useless if the coder isn't there. Besides good luck with the sales, if you need a promotional video, I'm free for that.

Bean Dip - December 27, 2010, 8:19 pm

Need any beta testers? im good hehheh a;)

eXero - December 27, 2010, 8:32 pm

GUI is being changed. No public versions. No beta testers needed. Will be next generation of Rats.
Will be FUD.
