Thread: [\[SERVICE\]Design, maintain and even host your site!\[/SERVICE\]](#)

D3r1v4t1v3 - December 28, 2010, 11:56 am

Samm's complete website service

Welcome to the official thread made for one purpose and one purpose only. To get your website, created and off the ground.

If you want to create a certain site but fear you lack the ability, the time or the imagination then pay someone else to do it for you. This service goes above and beyond that, it has extra options so that not only do I create your initial site but perform requested updates and even add some things on my own initiative to keep the site fresh and up to date. Going even further beyond that I will host your site to save those worries, I can host it in any way you desire... Check below for more information.

*NOTE: I also offer services setting up MyBB etc, please check the services option near the bottom for more info on that.

Creation:

This segment is to help choose the right package when it comes to the creation stage of your site.

Packages:Spoiler [\(Click to View\)](#)

Standard:

Basic 5 page site

External CSS for easy editing

Standards Compliant HTML & CSS (includes W3C validator results and images to prove)

Included PHP for Contact form only

Large:Up to 20 pages

External CSS for easy editing

Standards compliant HTML & CSS

Lightweight PHP

Simple maintaining, like slight updating of the site at my leisure to keep it fresh and not dull.

-Add ins-Heavy PHP- If you require more PHP than offered in the stand or large packages.

Javascript- If you require some javascript in your site.

Maintenance- So that you can PM/Email me when you require updates and I will do regular updates and tweaks.

Unbranded- I will not put a link to this thread or my website or any mention of my name etc.

Misc- You require something that is not included in either package or add in. If this option is selected more information must be provided.

Prices:

Prices are not set in stone. I organise your requests by package only for my convenience to help me respond correctly. Cost depends on exact details etc.

Once you have selected your creation package you may continue to the hosting option or go straight down to the form if you have your own hosting or want to deal with that yourself.

Hosting:

This segment is to help choose the right package when it comes to the hosting of your site.

Packages:Spoiler ([Click to View](#))

Shared:

You will be hosted on a decent server with other clients. You will have no FTP or cpanel access and no email accounts.

Shared advanced:

Exactly the same as shared but with FTP access and 5 email accounts with your desired domain i.e. you@yoursite.com.

Basic:

You will be hosted on the same kind of server as shared but it will be entirely yours with FTP access and email accounts.

VPS:

You will have a full virtual private server running your website and your website only. With all the same access as other accounts.

Dedicated Server:

You will have your own dedicated server which I will purchase separately but I will run and maintain for you.

If your not sure which hosting is right for you then I can advise you on which is best when you tell me the exact specifications on your website.

If you would like a custom domain(s) then you can purchase them yourself and point them to my name servers or you can send me the money and I will handle pointing them to my DNS and keeping you updated as to when they need to be updates so you don't forget to renew them/it.

If you want full access to hosting like cpanel etc then you will have to let me know and we'll make a suitable arrangement.

If you would like the domain or access option then state so in the add in field in the application form.

By now you've decided on exactly what you want and you just want to get it started! All you need to do is fill out the below form and send it to me via a PM.

Code Name:

Age:

Email:

Desired Creation Package (leave blank if none):

Desired Hosting Package (leave blank if none):

Desired Add-ins:

Basic information as to what you want:Finishing off:

I'm sorry for any grammatical errors or anything like that, I tried my best but everyone makes mistakes. If you spot a mistake PM me and I'll fix it sharpish. If you have any questions or comments then feel free to drop me a PM. Thank you!

Other services I offer:

Spoiler ([Click to View](#))

-Setting up services like MyBB etc

-Expanding on your preexisting website

-If you would like something that's not here simply PM me and I might be able to help you out.

A note to HF staff: I know this is a service offering but I figured it was best in here since a lot of people wouldn't think of this being offered unless they saw it. Thank you for reading, I hope it's ok to stay in this forum.

RyanDiamond - December 28, 2010, 12:05 pm

Great guy here, damn good designer too. Helps me with some CSS on my game when I need it. But just remember, when I need designs, I come first Samm! ?

I support this service.

Green Arrow - December 28, 2010, 12:15 pm

Do you have any previews of past work?

D3r1v4t1v3 - December 28, 2010, 12:22 pm

The only thing I've done recently is cyberexhosting.com. My other works are outdated as no one wanted me to keep their sites up to date with new technologies etc. They became bland and obsolete. Unfortunately the aforementioned example is not a very good one, what I was asked to do was fairly simple.

eXero - December 28, 2010, 12:43 pm

I vouch for Samm! He coded my website, cyberexhosting.com, and it was a good job. He is completely flexible, and he continues to give support even after he has completed the job. If you need a website developed inexpensively, choose Samm. Again I vouch.

D3r1v4t1v3 - December 28, 2010, 1:26 pm

Thank you eXero, your comments are appreciated!

iGaz - December 28, 2010, 3:11 pm

cyberexhosting.com is not responding for me :S

D3r1v4t1v3 - December 28, 2010, 3:34 pm

It isn't for me either. That is a hosting issue, I don't supply eXero's hosting. Sorry about that.

D3r1v4t1v3 - December 29, 2010, 11:38 pm

Cyberexhosting.com seems to be working now. If you would like to try it then head on over to there.

eXero - January 1, 2011, 9:28 pm

Yea hosting sucks, but the website design was amazing. You guys should hire Samm to code your website.

D3r1v4t1v3 - January 1, 2011, 10:02 pm

Yes but the host was not from me eXero, lol. My host is pretty decent! ?

Hawkins - January 7, 2011, 12:24 pm

Samm is a trustworthy guy, and has skills.
He also hosted renph.info. The hosting was great.
I vouch for him.

Samm, good luck my brother.

eXero - January 19, 2011, 3:05 pm

Come on people! Give Samm a try!

Shadows - January 19, 2011, 4:21 pm

I could help setup any forums you need doing, just offering help PM me if your intrested.

Familure with:

vBulletin.
MyBB - Have Premium Mods.
IPB (Not so much)
SMF (If you wanna go old school)
ForumMotion (If you wanna dissapoint your customers) ;)

Just drop me a PM and we'll talk.

D3r1v4t1v3 - January 20, 2011, 7:46 am

I don't think you understand this thread?
Thank you Hawk, much appreciated! :)
Thanks eXero, only had a few clients through this!

The_Ptah - January 20, 2011, 7:46 am

Do you have any previews of past work?

D3r1v4t1v3 - January 20, 2011, 1:04 pm

This question has already been answered The_Ptah.

Wet - January 20, 2011, 1:25 pm

It would be really helpful if you could provide any sort of design's you've done in the passed, signatures, random art..anything just to give us an ideal picture of your abilities.
