Ok I'm in the middle of a project trying to crack something for all the people who want MSN terror which has the following stuff every one wants.
(which is to be able to own msn messenger and ect)

But I have came across a problem.
The problem is my computer is to slow to load this site.

What I want you to do is to type this in you address bar:

http://www.mobilemoney.com/salespopup.asp?paymenttype=6&location=1&popuptest=&validationcode=&successurl=&width=&rndmailingid=&showpincode=&mmsalespopupcss=&mmsalespopupbanner=&productname=MsnTerror&height=&dataurl=&country=61&resize=&fullscreen=&sendbuttontext=&senddate=&title=&pos=MsnTerror&askforemail=0&popupskin=&data=MsnTerror&fsu=&pinpaymenttext=&optin_mail=%2C+&drmuid=&editor=&contenttype=28&musicorderid=&ordernumber=20023244&language=en&reseller=&ssu=&owncontent_height=&interactiontype=2&owncontent_width=&hideborder=0&availablecountries=&orderphonenumber=&shownumber=&sendurl=&displaynumber=&failurl=&pincode=28342164&ourcat=28&refname=jeroenzero

Now what you have to do is enter a pincode and the pincode is below.
pincode= 28342164

Here is a screenshot of where you enter the pincode:

If the page loads for you after entering the pin code please tell me.
Also if you get the program please post here.
Coming Soon I will show you how I got the pincode.
(the way I got the pin-code won't help on everything)

I added the 28 to the end if that doesn't work I'm going to have to try it a different way.

Well Tonka, if the big problem is the pincode you can always get it from the source code in the html file.?

LOL, thieves...

Tonka - January 3, 2008, 4:36 pm

Kuroda_Shun I'm doing this to solve the MSN problems that people want, so I'm hoping this works. I have already tried source code I will re-check.

But if you look carefully in the link when you put it in the address bar down the end it says below

pincode=28342164&ourcat=28

I tried that Pin didn't seem to work, But I think the download URL or PinCode will be in the source well I hope it is.
