Are runescape discussions allowed here

In case you're wondering, OP, the reason why Runescape money hacks are IMPOSSIBLE are that all the account information is stored AND handled server side, while you can change its APPEARANCE client side, the server will not recognize it as changed. Best you can do for runescape "hacks" are exploits, and discovering those is a whole other story.

Hello Poop, there is no such thing as runescape related hacks or something along the line of cheats, if you downloaded something like this I'd suggest taking a look in the whitehat section.

The only thing you'll find are applications that has been binded with malwares.

If you want to have anything in rs download moparscape. It's a clone of rs where you can spawn any item!

The only way to (hack) runescape money is to hack other runescape accounts, I used to do that with the free trades a long time ago.?

Hawkey - January 5, 2011, 9:32 am

No, no there are not. Unless you wanna search youtube and find out.

wolfdog54 - January 5, 2011, 10:15 am

None, sorry.. Best thing you can do is bot.

reaper2.2 - January 5, 2011, 10:22 am

I have to laugh at people that actually believe there are money hacks, also ive actually watched a guy on my rat today open one and start using it i find it sad and pathetic. Please get off hackforums as you dont no what your on about.

FaithOfHeaven - January 5, 2011, 10:26 am

There isn't something like a " runescape money hack " but there are various bots developed by some people.

I suggest to take a look at rsbots.net (am I allowed to post this link) ?

VvV - January 5, 2011, 2:23 pm

No there are not any at all. Anyone claiming they have one is talking rubbish. Although you can use a cheatengine to make money appear in your inventory etc. But it will dissappear if clicked, traded etc. So it's useless.

Ruinedsaint - January 5, 2011, 3:42 pm

You want money hack? Go bot your ass off.

Result???: Profit

The Protagonist - January 5, 2011, 4:01 pm

Use <http://www.powerbot.org> it has LOADS of botting scripts. There are no moneey hacks. Scan your pc with <http://www.malwarebytes.org> as you may have been scammed like this several times before.

Tate - January 5, 2011, 4:02 pm

You can use cheat engine to change the client side values of your gold count, but you can't use the gold to buy or trade. The closest thing to a money hack that really exists is botting.

Don't tell him to get off HackForums, new members start somewhere.

Sure they aren't as intelligent as you may be but he came here asking a question which is understandable for someone just getting into the sort of thing.

tl;dr Stop flaming.

Eminent - January 5, 2011, 5:09 pm

There are no working ones. Runescape is a big organization who would not let an exploit as big as that go unnoticed. Bots are your best option unless you want to pay for someone else to do it for you. But they just bot too.

shockrock - January 5, 2011, 5:27 pm

yeah i dout there is but if u find one plz let me know
