Thread: [\[VB.NET\] Steam Theme Maker \[WIP\]](#)

Cody8295 - December 29, 2010, 9:59 pm

I started working on this project, it basically is a Steam Skin creator. I have only added the GUI for friends list setting but will soon add many many more. There is also the "Code" tab so you can edit the colors or settings yourself. All you have to do is make your changes and hit "Debug". Pretty straight forward. It is coded in VB.NET and is the first release so it's not that stable. I will soon be posting updates. I didn't bother mocking up the UI because I just wanted to get the base down, like I said, I will get it done in later updates. Here are some screenshots.

The Main window-

What happens when I put in a bunch of random colors xD

Thanks, any suggestions for next update?

Fake. - December 29, 2010, 11:09 pm

What are you using to send the message with the selected config?

E36 - December 29, 2010, 11:11 pm

This is pretty cool. thanks for the share

Well, First, the textbox is editing the new themes style. Then, the debug sets the theme as the selected one in the listbox, to the registry. It then finds steam.exe and restarts it so it loads up the theme. And thanks for the feedback guys.

Sia - December 30, 2010, 7:47 am

lol my friend made a application that hooks to steams API... you could do stuff as change themes but also change some other codes..

Sounds interesting, I've used the Steam API in PHP, but never vb.net.

Dungeonmasterbob - December 30, 2010, 8:29 am

Its pretty nice i cant wait for future updates

awwww, i thought its editing the memory, not editing the registry and restarting the app :/

Anyway nice release :)

Superior1 - July 25, 2012, 2:42 am

please update you're link or pm me a download please, thanks in advance :)

zosoftnet - July 25, 2012, 7:39 am

Nice thank you. Was waiting for this one!@

But the download link is not up! Please PM me or update it!!

iSevere - July 25, 2012, 10:50 am

Looks nice and almost similar to steam futures . Vouch

DotNetNut - July 25, 2012, 11:14 am

Updates : You need to pay closer attention to details IE : the buttons... looks ok apart from that, but you should really work on the gradients shading etc.
