Thread: [\[VB.NET\] SteamID Lookup \[RELEASE\]](#)

Cody8295 - December 30, 2010, 9:38 pm

I've made this program in VB.NET in which you input someones steamid, and all their profile information is displayed.

Basically all this program does is:

Take the steamid from the textbox

Split it to get the server(1 or 0) and the actual ID

Converts to community ID using algorithm

Parses community page to get information.

Nice work thats really cool

Dark Coder - December 30, 2010, 11:07 pm

This is pretty sick, I might put this in my new project soon coming, I'll give credits :D

No, sorry. The source code is not for public release, although it might be in the future.

The sc link is dead! :(

It's been 7 years, I know.

Does anyone have the file?
