So as my first logo i ever made was a disaster.
I tried to do a new logo with a new style.

I think it was a good outcome CnC please:

Thanks no more comments?
oh well

I hope u have seen for yourself how pixelated the second circle is..?
Other then that, overuse of bevel and emboss.

The only thing i like right now is the C lol.

Just google for some logo designing tutorials, so u can get a feel of how to create gloss and stuff like that.
Anyways, it's a good start !

It's kind of nice but you really shouldn't overdo the bevel and the gloss too much.

I like it. And the concept.

But the inner part of the outer line (if you know what I mean) is very... uhm yeah. Something should be done there D:

Except from that, good work.
