Thread: [tut=-Making MSN Bot With mIRC -=-tut](#)

IPhiLG - January 1, 2011, 1:37 pm

Download mIRC

<http://www.mirc.com/>

you may want to torrent it or actually buy it :D
30 day free trial ;)

open mIRC and press Ctrl+R

on :start:/server irc.net:6667

on *:CONNECT: timer 1 4 msg &bitlbee account add msn EMAIL PASSWORD | timer 1 7 msg
&bitlbee account on

on *:text:*hello*?:msg \$nick This Was Developed With mIRC And Tutorialized By Pamperz@HF

where it says "EMAIL" and "PASSWORD" replace it
(with the obvious strings)

then the basic text is "hello" so if u say that to your bot itll reply with
This Was Developed With mIRC And Tutorialized By Pamperz@HF
if you wish to change it copy and paste it and change *hello with the text you want your bot to reply
to and This Was Developed With mIRC And Tutorialized By Pamperz@HF with what u want the
reply to say :D

live demo:

philassistant@live.co.uk

not 24/7 :S

mhamid - January 1, 2011, 4:00 pm

wowwww... nice post man u are rocking :D

IPhiLG - January 2, 2011, 4:03 am

thanks im glad u enjoyed my tutorial :D

[CX]Luke - January 2, 2011, 8:55 am

How is this an 'MSN' bot? you mean IRC?

The only thing you have got is the on TEXT event.

Surely it would be more beneficial to people to write an example what uses the sockopen function.
And make the bot reply too commands on sockread event.

IPhiLG - January 2, 2011, 12:33 pm

It is an msn bot. and this can reply to commands but im not telling everything because maybe i dont
know everything >_>

SIM-676321 - February 19, 2011, 2:07 pm

how do i add freezing en massadd and other commands!!

IPhiLG - February 23, 2011, 8:30 am

Please leave hackforums for the sake that noobs on dont get a bad name.

GI?ryallowed - February 23, 2011, 2:44 pm

This can be useful to know for those who plan developing a MSN Bot, nice share.

IPhiLG - May 6, 2011, 11:50 am

Thanks im glad you appreciate it
