Warfront Booter v2 (81) Public Shells Included.

Coded by: WhereistheLovE

[img]http://lolwf.com/wf1.JPG[/img]

About:

This is a .Net program that uses DoS Shells to dos an ip. What makes this booter different from the rest is that; First of all you have a Shells.txt file were you can manage, add or remove your own Dos Shells.

Second feature is that this will load all shells first and once they have all been loaded they will all hit at once instead of the conventional way of having a slow php or program going threw the list 1 by 1 enabling each one.

This makes for a much more powerful attack with less shells.

How to add your own Shells:

-Add Shells 1 by 1

Spoiler [\(Click to View\)](#)

[img]http://lolwf.com/wf2.JPG[/img]

OR

-Add Shells by Text File

Spoiler [\(Click to View\)](#)

[img]http://lolwf.com/wf3.JPG[/img]

DISCLAIMER:

\*This program comes with 81 working "PUBLIC" Shells, this can drop any ones internet and small websites, this will also drop XBL with ease. Keep in mind the shells that come with the booter are public and may not work all the time and can go down.

\*Latest Version of .NET Framework is required.

\*This will only work with red shells. Example Shell Link: <http://regab666.gigfa.com/>

\*When you start the program up or initiate a boot this will create pop ups from your default browser if you are using public shells with advertisement on them or anything like that. To solve this issue use only shells without advertisement or use private shells only.

How do I get my own shells to add?:

-Type this in google search or a bing search "PHP DoS, Coded by"

-Upload your own shells to websites.

-Buy shells from the marketplace here at hackforums.

Virus Total:

Download:

Please be sure to scan the .exe with your antivirus and also upload to any sites you trust like virustotal.com. Please do this with all downloads you may find on hackforums before running any executable files.

Download Update: Removed a harmful shell in the list. Also added +23 Working shells without advertisement.

Hope you enjoy:

I hope you guys enjoy this and put it to good work, havent seen any booters on here that will allow you to add your own shells, so I thought id release mine and my buddies private booter we made.

this is sweet I like it thanks..

**lost\_firing\_pin** - January 3, 2011, 2:11 am

I'm about to download an try this, thanks for the share man, stuff like this keeps me coming back.

**Krewella** - January 3, 2011, 2:24 am

nice release bro..

keep it up

**Breezo** - January 3, 2011, 2:29 am

This looks pretty good can someone confirm???

If it is legit its F'ing uhmazing from what i see.

- Hugs

**?Kreedz?** <sup>™</sup> - January 3, 2011, 2:39 am

This is not working :( damn,it looked awesome!

Just to save me the download and testing It out, what errors did you experience?

**microsoldier** - January 3, 2011, 5:22 am

This is great Thanks man :)

**JoinSeventh** - January 3, 2011, 5:25 am

Can anyone confirm it please?

**Inception** - January 3, 2011, 6:04 am

very nice but when you send the command to the shells it starts opening ads up.

If you loaded the shells and dos'd a connection and it didnt go down it could be because over 100 people have downloaded the booter since yesterday so the shells could be down. Also make sure your using Red Shells.

Future Updates:

V3 (Free) (Direct DL)

-Adding Support for Green Shells.

-Adding 50+ More working Public Shells.

Release Date: Jan 10th, 2011

V4 (Free) (Direct DL)

-Adding Automated Search Engine Shell finder.

-Adding 200+ Working Private shell rotation for a reliable small attack. XBL, Home Connections, Small Website. (This will be a separate option from the dos attack from your list of shells for people who may need to drop some one right away.)

**pepon** - January 3, 2011, 10:24 am

I've tested and is clean, for me works fine, thank you very much for your input. ?

**pica** - January 3, 2011, 10:28 am

This program is clean... but when i opened it and added the included shells and i click on start ESET NOD32 directly popups as a virus (The Site). So don't use the shells that are included because that shells contains a virus:

Virus Type that NOD32 Caught was:

1/3/2011 7:24:20 PM HTTP filter file <http://webpublishingexperts.com/genex/devwork/caroline/HTML/Iframe.B.Gen> virus connection terminated - quarantined NAME Threat was detected upon access to web by the application: C:\Documents and Settings\NAME\Desktop\Warfront Booter.exe.

Thanks for the feedback pica.

I just updated the download link. The harmful shell is removed from the list and also added a new text file called "Shells without advertisement" +23 extra working public shells not in the old list, no advertisement.

**JoinSeventh** - January 3, 2011, 11:41 am

I have downloaded it and can verify thatt it's clean.

But for max effect use your private DoS shells.

**System113** - January 3, 2011, 12:01 pm

this is sooo hot gonna download this :D

**el\_ninio** - January 3, 2011, 1:11 pm

Well my PC crashed when i ran your program

Maybe anyone else got the same problem

I like the fact that you updated the download. Many thanks mate,i shall give it a try in my spare time!

**InSaNiTy@hackers.com** - January 5, 2011, 11:24 am

Diden't get a chance to finish V3 yesterday so hopefully will be coming out tomorrow.

**RedSky'** - January 5, 2011, 11:59 am

Nice relese testing it right now!

**MAK 90** - January 5, 2011, 1:26 pm

In V3, would you be able to make it so green shells can be used? Just an idea. ?

Yup thats what I plan on doing, I'm off work again tonight so getting some coding in today.

**MAK 90** - January 6, 2011, 7:34 pm

Sounds great! Thanks for the great share. ?

**FE4RxHACKz** - January 6, 2011, 7:42 pm

Thanks for this! Downloaded it.

**Infobesity** - January 6, 2011, 8:56 pm

Great job, clean for those who fear.

Edit:

First time using a booter, not sure what it is, assuming it is a DoSer? But it seems like it had no affect?

I put [http://www.n\\*\\*\\*em.com/](http://www.n***em.com/) in the host box.

I load the 80 PHP Dos Shell Servers from the text files

I put port to 80 and time to 600

I press Boot! and it loads them all and after loading all the servers it says booting

[http://www.n\\*\\*\\*em.com/](http://www.n***em.com/) then within a second says finished.

Was it suppose to do something, the site is fine and dandy, a small site forsure.

**iDeVeLoPeR** - January 7, 2011, 12:09 am

Is this booter strong enough to kick people for Xbox live?

It doesn't work well, it does not hit people offline.

**Freddy Kru?ger** - January 9, 2011, 4:07 am

It's working fine for me :) it is pretty strong too.

**ipollock** - January 9, 2011, 2:26 pm

It doesnt work for me )=. Nice release tho I put all the shells on it and then some of my own shells on it and it didnt work.

**ZAX** - January 10, 2011, 6:41 am

love this program <3 very nice ?

**The MammoTh** - January 10, 2011, 6:41 am

I Tried it its kinda good but it doesn't hit people offline..

**Trake1n** - January 10, 2011, 7:28 am

Thats a great post man!! THX!!!

**Adverse** - January 10, 2011, 2:28 pm

Guys dont hit for much time hit for 19 seconds or less with the shells he gave because most of them don't allow more then 19 so if you put 600 you will only be hitting with like 2/81 shells so it wont hit much at all.

**pepon** - January 10, 2011, 2:43 pm

I tried it and is excellent, the only problem I found is that crashes from 1500 that is free also sells his credit, this post deveria to have five stars, thank you very much for your input.

?

**Shadow Puppet** - January 10, 2011, 3:57 pm

This looks great thanks for the share

**love2winsum** - January 15, 2011, 12:26 am

THX I LOVE YOU KEEP UP THE GOOD WORK

**Clouds** - January 15, 2011, 9:36 am

Either give proper credits next time, or learn to obfuscate. -.-

**Anonymous.7654** - January 15, 2011, 3:36 pm

Thanks for tool man,looks nice.

**Tech-N9ne** - January 15, 2011, 5:41 pm

mssgg 2 short

**garrit1222** - January 15, 2011, 8:24 pm

Looks Great Im Gonna DL It And Test This Baby Out :D

**I R H4ck3r** - January 16, 2011, 12:57 am

This doesnt work.

Spoiler ([Click to View](#)) Too Shoorttt >:(

**InSaNiTy@hackers.com** - January 16, 2011, 8:11 am

(Jan 15, 2011 10:36 AM)RainDrops Wrote: [\[CITE\]](#) Either give proper credits next time, or learn to obfuscate. -.-

Proper credits? It clearly says in bold underlined text who mainly coded this project "whereisthelove". NaZ is also my aka "nazban"... Warfront is our clan also warfronts website is lolwf.com which I own.

I don't see how I failed to supply proper credits?

Also guys most of these shells are dead now and not hitting as hard as they did when it was first released. Main point of this project was for you to be able to use your own shells if you had them, loading them from a text file with ease, no reason to keep coded a new booter when u get shells or creating a php booter.

**autorunman22** - February 13, 2011, 3:30 am

I love to try this one, i want to make my friends net connection off, but not sure what ports i will put T.T

**Vendetta\_** - February 14, 2011, 1:26 pm

Verified working. Before DDoSing myself: Download 7mbit/s, after: 0.02mb/s with 17 shells. I'd say its around 30 shells per 10 mbit internet speed, depending on the shell's quality.

**Vafliis404** - February 14, 2011, 1:47 pm

well this hadn't worked for me . My Dload speed was 85~ Mb/s and after booting i got 86mb/s on speedtest.net ROFL this should be called BOOSTER ;D it took my Dload speed up to 1mb ! ;D Thanks gonna use it when my internet will get slow.

Joke lol , nice work thought it took down my friends network for a bit ;D and one question , in edition what should i use

to take game server down ? is it even possible ? Coz i lost all hopes to get the servers down... I would need some help.

Coz no booter can even ping it ...

Cheers.

**Inception** - March 16, 2011, 11:49 am

If anyone still has this can you send me it? The download link doesn't work, and it looks like the owner doesn't come on HF very often.
