Emails quite easy to add, and I disagree. My keylogger that I made is still fud, and sends to email

O i agree with you 100% an email keylogger can be FUD even with email.
But we added a unique function to our keylogger.
It records the windows, and merges our files in POST method.
The only way we could do thhis to our knowledge was through ftp.

and 10 dollars in US is 480.350 INR

Thanks

EnvyH30 - June 28, 2009, 11:09 am
