Then why are you distributing the pass. You can get into trouble.

poision-v1p3R - January 5, 2011, 8:39 am

because i like to play the Game.... IT is warning against LOW security Sites.. I am A white HAT hacker.... If i will give the details peoples cant do anything... see in my Post.. i include 1 note...

sw0rd95 - January 5, 2011, 8:39 am

Yeah, don't even visit .gov sites, they track your IP. White hat hackers don't do illegal things. They write programs like antiviruses and help people dealing with problems.
From the description you've given, you'd be a grey hat.

poision-v1p3R - January 5, 2011, 8:44 am

i only fight against low Security ya poor Site... bez i hate This site Securitys....

and i will tell u... Do Not Do anything with this DATA.... I am not responsible for this..

If you were white hat, you would have informed them about the vulnerability so that they could fix that.

Not giving away their login details and fucking bragging about it.

TheGirlAsh - January 5, 2011, 8:49 am

its not even possible to crack the hash any way

pkerking - January 5, 2011, 8:55 am

dont think that you are pro, you are a little kid, dont try to play with government websites or else you will be played by government, if you had a visit to admin access , then your IP can be traced , even though you used a proxy, be carefull..

TheGirlAsh - January 5, 2011, 9:21 am

Yeah you hacked a .gov site. Congrats with that. But your not a white hat hacker, white hat's will not tell anyone they hacked the site,

the thing that white hackers would do is contacting the administrator and telling him (or her ;P) about it and how to fix it, not leaking there admin pass.

poision-v1p3R - January 7, 2011, 3:57 am

All guys are rights.. but i like to share.... about white hat hacker i am white hat hacker...

Reported - January 7, 2011, 4:06 am

Please give me the information, and why do all the indian sites get hacked.
There security must be shit over there. xD

Damion774 - January 7, 2011, 4:13 am

Let's see if I can put it this way:

You tell them their website is hackable = White Hat
You - hack them, release information about them, take stuff (like hashes) = Black Hat
Both = Grey Hat

Learn English. Learn what each words mean. And finally, if you want true credit, deface it yourself and release the website.

poision-v1p3R - January 7, 2011, 4:17 am

lol stfu.. i know all w0rds meaning.. don't be over smart dude.

Reported - January 7, 2011, 4:22 am

I posted and PM'd will I get the website URL and the username and password?

pankaka - January 7, 2011, 5:09 am

His username is: poision-v1p3R

Aka leet speech which is common with kids.

An experienced hacker should not have problem with English language since nearly everything is in english.

Releasing info that is classified and telling yourself that you will be fine even by not taking any precautions aka safety from getting tracked.

He states that he doesn't want to get into trouble. Sorry, but that post is already linked to you.

Giving it away is a legal offense since you are distributing classified information.

Enjoy your jail. IF this were to be true which I don't believe.
