Thread: [how to add serial protection on a vb program](#)

ken2003445 - January 5, 2011, 5:11 pm

i just build an injector but i wanna make a serial protection on the program like

when the person open the program, he will need to type the correct password to use the injector

help plz

Grifter - January 5, 2011, 5:13 pm

I don't recommend doing this, it won't work and will get cracked.

i know but i just need to at least put a protection on it

xyzman - January 5, 2011, 5:24 pm

Code Public Sub Authenticate(password As String)

 If password <> "dongs" Then

 MessageBox.Show("Invalid serial")

 Environment.Exit(0)

 Else

 MessageBox.Show("Welcome to my injector!")

 End If

End Sub

this is really really lame protection, there are much better ways of doing this
