It's Called "RocketDock" Sorun! ?

Here their website: <http://rocketdock.com/>

Many tutorials on youtube on how to install and add skins!

But i personally do not use it!

Nah, it's not RocketDock.

It's ObjectDock from StarDock's ObjectDesktop Suite.

It had actually taken me a while to figure out, but I managed it in the end.

Just grab as many themes as you can for Rainmeter and edit the code.

In addition to that I applied a Visual Style; used small icons; changed the RocketDock settings to mouse over only; etc.

Too much to list. Maybe I'll write a tutorial or something.
