Thread: [t3c4i3 Dos Tool v2.00 \[updated 9/3/2010\]](#)

H3LL - June 30, 2009, 12:23 am

Basically here's the new tool i made, got bored and didn't have any particular project in mind so i thought of upgrading it.

[img]http://img689.imageshack.us/img689/957/capturexi.png[/img]

Download Link - http://#.com/files/361002563/t3c4i3_s_Dos_Tool_v2.00.rar

Some note

- i didn't implement the timer for it
- you can put more than 20 threads per flood type
- packet size may go more than 65535 but i haven't test it out
- 0 = infinite is just 102400, so if you want to go further state a number higher
- for the ip text field, you may put the ip(127.0.0.1) or domain(www.something.com)
- port is obviously 0 - 65535
- interested in the source that was built in C? pm me.

Spoiler ([Click to View](#))

The Old Boy

Note: Built this quite some time but i've never thought it actually works till i compared it with sIRixer's Dos Tool he released. The functions are the same, to DOS however features are different. I won't say whose better or whose worst =) Just want to release mine too.

Note: Some credits to sIRixer for abit of copying his style.

Update: I've built a new tool that runs loads 10 processes at once

Here's the screenie

[img]http://img3.imageshack.us/img3/5466/uploadhgq.jpg[/img]

Here's the link - http://#.com/files/250219455/t3c4i3_s_Dos_Tool.exe

Here's the link for heavy duty -

http://#.com/files/250667727/t3c4i3_s_Dos_Tool_Heavy_Duty_-_10x_.exe

Edit:

- For scanning open ports, use this link - <https://hackforums.net/showthread.php?tid=90964>

if this is not crashing, [link](#)

SaLaH_SiNaN - June 30, 2009, 12:41 am

Thank you very much

I was looking for and found Bakd

Nigward - June 30, 2009, 12:46 am

Nice looks like rDos but I will still try it out :).

Edit: Tool works great much better than rDos good work :).

Cameron187 - June 30, 2009, 1:56 am

i tested on a couple websites yet to take 1 down

H3LL - June 30, 2009, 2:13 am

It's a dos tool, it depends on where you are too... don't expect a pc to take 1 site down

H3LL - June 30, 2009, 9:27 am

bump for the whatsoever

psy_ko_mat - June 30, 2009, 10:09 am

And so ?

To kill a website with only one PC how much time does it take ?

slRixer - June 30, 2009, 10:30 am

Here's the link - http://#.com/files/250219455/t3c4i3_s_Dos_Tool.exe

Someone test this and verify its usage please =) My isp can't let me do shit about dosing.

Message: After running 30 processes to dos v()b()forum(dot)com and waited 15 minutes... i asked my 2 friends to load that site and they say it can't be loaded

Message: I guess it works =)Very nice mate. I don't think it's quite as effective though if it took 30 running processes to drop a site ? Took one for me ? But question... How'd you make the [Input] stuff blue and how'd you get the IP from the site (I tried gethostbyname etc. etc. and that... failed ?)

[Edit]

PM me the reply ?

H3LL - June 30, 2009, 11:03 am

Pm ing =) try to run 1 process of my dos tool and take down v()b()fo()rum again... i think it's probably because of my isp... i'm very limited under my isp. However i'm not sure either =) I need some help in verifying them. I'll pm you now

Oh I See - June 30, 2009, 11:50 am

(Jun 30, 2009 10:30 AM)slRixer Wrote: [\[CITE\]](#) Very nice mate. I don't think it's quite as effective though if it took 30 running processes to drop a site ? Took one for me ? But question... [Edit]

PM me the reply ? Pretty sure you can CMD > Ping <Website> and it will say connecting to <Website'sIP>.

?

H3LL - June 30, 2009, 12:03 pm

Post Number 1 Updated With Port Scanner

soren1 - June 30, 2009, 3:06 pm

to get an ip from a site open cmd,
type "ping "url"
wait a minute and it will show you the ip :o

Moogra - June 30, 2009, 4:04 pm

Downloaded both Port Scanner & DoS Tool.
Thank you

H3LL - July 1, 2009, 1:30 am

Your welcome =)

Quote:to get an ip from a site open cmd,
type "ping "url"
wait a minute and it will show you the ip :o
Well my program don't need you to "ping" =)

nToxication - July 1, 2009, 1:46 am

Thanks for this, i will +rep whenever i can ;)

H3LL - July 1, 2009, 1:47 am

I thought you can =)

H3LL - July 1, 2009, 5:37 am

Updated Post Number 1

Rivalo - July 1, 2009, 8:00 am

Maybe make a version where we can choose the processes

H3LL - July 1, 2009, 8:53 am

What you mean??? Basically it runs 10 processes of the same function together... making it dos 10x at a time

Rivalo - July 1, 2009, 10:33 am

That we can choose how much it DoS at time
or is that impossible

H3LL - July 1, 2009, 11:56 am

How much it dos? As in what... how many sockets? how many packets?

Rivalo - July 1, 2009, 2:36 pm

How many Proccesses it runs

you said something in a quote about 30 Proccesses that you run 15 Minutes and the site was gone.

sorry for my bad english. I'm from holland

H3LL - July 2, 2009, 9:36 am

Basically i "double clicked" 30 times. But i think i need to do that because of my internet connection is slow. If you're running on a high speed connection you can just run once and it's already working fine

devilmary - July 3, 2009, 9:57 pm

[img]http://c3.ac-images.myspacecdn.com/images02/82/l_8b9e59ccfbbb4b069d59dcffd1fc4fce.jpg[/img]

i already ddos that server but that server still alive like nothing happened. ?

H3LL - July 3, 2009, 10:28 pm

That's too bad =(Try using rDos and give me a feedback, probably its your internet speed

Nigward - July 3, 2009, 10:30 pm

(Jun 30, 2009 03:06 PM)soren1 Wrote: [\[CITE\]](#) to get an ip from a site open cmd,
type "ping "url"
wait a minute and it will show you the ip :o
Or do tracert " website " without the quotes.

devilmary - July 3, 2009, 11:28 pm

(Jul 3, 2009 10:28 PM)H3LL Wrote: [\[CITE\]](#) That's too bad =(Try using rDos and give me a feedback,
probably its your internet speed
what do you means by too bad?
i already try rDos at the same site, and it's working.

H3LL - July 3, 2009, 11:38 pm

Working as in server down? Then that's great =) I wonder how come mine can't

devilmary - July 3, 2009, 11:52 pm

ya, server down, but no longer, just for a while, dunno y.
if u can repair yours, that's better :D

H3LL - July 4, 2009, 12:27 am

Yea i will, the thing is i have no idea how good is the performance is it. That's why i didn't edit it, i'll put up some changes can you be my beta tester for this dos tool =) I think i need to increase it's sending packets

devilmary - July 4, 2009, 2:10 am

sure, why not, if there anything u can pm me or add me msn? devilmary77@hotmail.com :)
that we'll be great working for you. =))

H3LL - July 4, 2009, 2:16 am

Thanks =) I'll add you using my email on Hackforums =) I'm currently on my keylogger, when i return to my dos project =) I'll find you =)

Fatal RZA - July 4, 2009, 8:35 am

Very Awesome Programs man, keep it up
?

RSSThief - July 4, 2009, 6:55 pm

The question is, does it DOS you or the target? I can't tell you how many programs have claimed to do this but only flood you and making it look like it's working.

How can I tell it's not DOSing me (short of having another computer)?

H3LL - July 4, 2009, 10:15 pm

It's basically not dosing your localhost nor 127.0.0.1 or your lan ip.... it's dosing the website ip. I don't know how you can tell without having another pc, ask your friend to visit that site maybe

marsic2 - July 5, 2009, 2:26 am

or just use an online proxy to see if the site is still up

H3LL - July 5, 2009, 7:36 am

Well, i'm not sure about proxy => Never used one

Dirty_Moon - July 10, 2009, 11:40 am

Goodjob it seems like rDos but Very good work keep it up m8.. :-)

Technology - July 11, 2009, 4:23 am

Good job on your DoSer. 9/10.

Willox - July 12, 2009, 11:18 pm

it doesnt look very good

cool hawip - July 15, 2009, 7:30 pm

wait so I could put any IP in and it would take there internet down?

Foul - July 15, 2009, 7:41 pm

Well, it won't do a lot since it's only one computer trying to take someone down (if we're talking about a person here). Your best bet if you wanna take someone down, is a botnet server.

cool hawip - July 15, 2009, 7:44 pm

like so how do I connect to a botnet server? And say you play like any game will they just lag or will it actually Disconnect them?

H3LL - July 15, 2009, 7:57 pm

If you were to have a mass attack, your victim disconnects

cool hawip - July 15, 2009, 7:58 pm

but how do i send a mass attack

H3LL - July 15, 2009, 8:00 pm

get a botnet

message too short

cool hawip - July 15, 2009, 8:02 pm

so your dos alone wont be enough to dc someone? and sorry for all the questions but with a bot net all you do is dl put in an ip and just dos away?

cool hawip - July 15, 2009, 9:05 pm

??????? will it or not

rekt_ - July 15, 2009, 9:14 pm

looks awesome bro, just downloaded now :) (Jul 15, 2009 09:05 PM)cool hawip Wrote: [\[CITE\]](#)
??????? will it or not

First you would have to build a bot net, and have it infect a whole load of computers, say you infect 1000 computers (they then become bots in your botnet) then with the Client (which you will have on your computer) you can command all of those bots to perform what is called a DDoS attack on any Ip you choose, DDoS = Distributed Denile of Service

This would mean that your DoS attack is 1000 times stronger than if you alone tried to attack the site/Ip and alot more likely to take down the site/Ip.

For more information go to the Botnets, IRC Bots, and Zombies section.

Just for your information this is the reason hackforums keeps being taken off the net at the moment, someone is attcking it with a very large botnet.

Hope that answered some of your questions :)

cubancartel - July 16, 2009, 12:47 am

thanks a bunch, but Im wondering like seeing is its one computer, i play this game where I get d dosd all the time, so would this 1 d dos from my computer lag them out?

Asking from my computer not a botnet just mine

H3LL - July 16, 2009, 3:21 am

I don't understand your question, cubancartel. This is a dos tool, not a ddos tool.

JLG_Jake - July 16, 2009, 4:35 am

im new to this so im probably gonna sound like an idiot but can you use this to take out a single persons internet like host booting

Dirty_Moon - July 16, 2009, 5:12 am

Yeah its not effective and not working lol

H3LL - July 16, 2009, 6:03 am

(Jul 16, 2009 05:12 AM)dirty_moon Wrote: [\[CITE\]](#) Yeah its not effective and not working lol

(Jul 16, 2009 05:12 AM)dirty_moon Wrote: [\[CITE\]](#) Yeah its not effective and not working lol
Actually.. It is.

Supreme Kai - July 16, 2009, 9:49 am

Doesn't work for me.

It doesnt show anything for input/info

H3LL - July 16, 2009, 9:52 am

If you can't load a console =) Probably you need to reformat your pc

JIMQ - July 16, 2009, 11:14 am

HAVE u tried this on HF
Lol Just kidding L :D

tux1 - July 16, 2009, 11:39 am

well it depends on the size of the botnet, does this tool have ip spoofing capabilities or is it easily traced?

H3LL - July 16, 2009, 10:41 pm

No there's no ip spoofing.

pushl %ebp - July 16, 2009, 11:10 pm

nice! many thanks mate great work.

hackelie - July 16, 2009, 11:12 pm

good 1 man
yes better ;)

Awcdfri - July 16, 2009, 11:15 pm

Seems simple and easy to use thanks i'll test it later.

T@R@\$ - July 16, 2009, 11:19 pm

Transmission - August 1, 2009, 5:52 pm

this its very easy to tell where the flood is coming from right? what do i need to protect myself? like an ip hider or something or is there one built in?

H3LL - August 1, 2009, 7:43 pm

There's no ip masking.

message too short

IceOnFire - August 1, 2009, 10:39 pm

So, how long do you have to run this for it to slow down the Ip's internet. I did it on my self and It didn't effect much, sent about 190000 bytes is that alot? Do I open mutiple of these?

H3LL - August 1, 2009, 11:52 pm

(Aug 1, 2009 10:39 PM)IceOnFire Wrote: [\[CITE\]](#) So, how long do you have to run this for it to slow down the Ip's internet. I did it on my self and It didn't effect much, sent about 190000 bytes is that alot? Do I open mutiple of these?

190000 is nothing... apart from that, you must know a pc alone can't bring down a server. So you need to know who you're targetting.

IceOnFire - August 2, 2009, 12:07 am

(Aug 1, 2009 11:52 PM)H3LL Wrote: [\[CITE\]](#) 190000 is nothing... apart from that, you must know a pc alone can't bring down a server. So you need to know who you're targetting.

Say I want to take someone down, a single or a couple computers. (router).

Like on xbox live or something, how many should I send?

H3LL - August 2, 2009, 12:26 am

Just keep it running, best with friends. If the packets are stopped from sending, the server will slowly return to normal

IceOnFire - August 2, 2009, 12:28 am

Should I open multiple running on different ports? Does it make a difference opening multiple at one time?

x8rUn0x - August 4, 2009, 11:44 pm

VERY VERY nice ive been looknig for a toll like this for a loooong time ?

cant dl plz add to another link tyvm!

H3LL - August 31, 2010, 9:04 pm

New link - <http://www.mediafire.com/?c5akcbskr9aktat>

Rebel4055 - August 31, 2010, 11:31 pm

T3c4i3 Awesome program man! Works wonders! Tried it on my friend :P

EDIT: Also does this program do UDP? Or just TCP?

Vier - September 1, 2010, 9:26 am

Can't find the download link when I click it., That's what RS says anyway.

Rebel4055 - September 1, 2010, 11:19 am

(Sep 1, 2010 09:26 AM)Vier Wrote: [\[CITE\]](#) Can't find the download link when I click it., That's what RS says anyway.

Look above my post he added a new link.

H3LL - September 2, 2010, 6:51 am

TCP only =) message says its abit too short

Rebel4055 - September 3, 2010, 7:43 pm

It seems to be randomly crashing sometimes. Any idea why?

IDCUMF - September 3, 2010, 7:51 pm

seems the file got removed by RS - RE-UP Please.

Rebel4055 - September 3, 2010, 8:37 pm

(Sep 3, 2010 07:51 PM)UnFUCKable Wrote: [\[CITE\]](#) seems the file got removed by RS - RE-UP Please.

Has a new link up on this page :P

moein - September 4, 2010, 2:15 am

i have someones ip but what do i put as the port

H3LL - September 4, 2010, 4:54 am

(Sep 4, 2010 02:15 AM)moein Wrote: [\[CITE\]](#) i have someones ip but what do i put as the port
You need to know which port is open before you attempt to dos =)

emre0019 - September 18, 2010, 10:15 am

hi, dead link.

link ölmüs.

H3LL - September 20, 2010, 12:54 am

New link - <http://www.mediafire.com/?c5akcbskr9aktat>

Rebel4055 - September 20, 2010, 4:27 pm

Anyone else having a issue where the program would crash after a few minutes of using it? Or it crashing when you start and stop it?

halo371 - September 21, 2010, 11:11 am

(Sep 20, 2010 12:54 AM)H3LL Wrote: [\[CITE\]](#) New link - <http://www.mediafire.com/?c5akcbskr9aktat>
I tryed to open the program and my winrar says its broken or something I guess another dos tool broken again

Vafllis404 - October 31, 2010, 2:00 pm

Link is dead, please update the post.

Jaims - November 21, 2010, 4:42 pm

My compliments on that program, very nice :D

Altho with some websites, it doesn't take it down when i try to hide my IP with "Hotspot Shield". Yet if i disable it, it does work.

But yeah, then I show my IP.

I'm not a real expert in these things but ok :D

Question is, is there a different method (apart from Loki VPN) to hide your IP?

Zpirit - November 21, 2010, 4:53 pm

(Jun 30, 2009 12:23 AM)H3LL Wrote: [\[CITE\]](#) Basically here's the new tool i made, got bored and didn't have any particular project in mind so i thought of upgrading it.

[img]<http://img689.imageshack.us/img689/957/capturexi.png>[/img]

Download Link - http://#.com/files/361002563/t3c4i3_s_Dos_Tool_v2.00.rar

Some note

- i didn't implement the timer for it
- you can put more than 20 threads per flood type
- packet size may go more than 65535 but i haven't test it out

- 0 = infinite is just 102400, so if you want to go further state a number higher
- for the ip text field, you may put the ip(127.0.0.1) or domain(www.something.com)
- port is obviously 0 - 65535
- interested in the source that was built in C? pm me.

Spoiler ([Click to View](#))

The Old Boy

Note: Built this quite some time but i've never thought it actually works till i compared it with slRixer's Dos Tool he released. The functions are the same, to DOS however features are different. I won't say whose better or whose worst =) Just want to release mine too.

Note: Some credits to slRixer for abit of copying his style.

Update: I've built a new tool that runs loads 10 processes at once

Here's the screenie

[img]<http://img3.imageshack.us/img3/5466/uploadhgq.jpg>[/img]

Here's the link - http://#.com/files/250219455/t3c4i3_s_Dos_Tool.exe

Here's the link for heavy duty -

http://#.com/files/250667727/t3c4i3_s_Dos_Tool_Heavy_Duty_-_10x_.exe

Edit:

- For scanning open ports, use this link - <https://hackforums.net/showthread.php?tid=90964>

Screenie of port scanner

if this is not crashing, [link](#)

The GUI is kinda fail, but yeah thanks man, keep it up!

azag - November 22, 2010, 6:01 am

good job men ..thank you !!

H3LL - December 20, 2010, 11:27 pm

No problem =) You're very welcomed.

The GUI is nub yeah i know that... @walshy155

aceinxx - December 21, 2010, 12:18 am

How would I protect myself H3LL.

Should I use UltraSurf? Does it use shells or my internet IP? :P

Please reply, brother.

Forever Young - December 21, 2010, 1:09 am

This tool are using your own connection to DoS and I would recommend you to use a VPN when you use this.

jspark702 - January 2, 2011, 5:54 am

Thank you for sharing. It seems great.

Fear is 1337 - January 2, 2011, 7:54 am

Looks interesting but I know I've seen one like this before..

Pinacalada - January 2, 2011, 9:05 am

download link isnt working,

rsnerd - January 2, 2011, 9:53 am

mirror please link isn't working

DeniyPlaya - February 1, 2011, 10:47 am

mirror broken! pls reup!

im looking for one free dos or ddos attacker anyone knows one good programm?

Matthew 6:33 - February 2, 2011, 8:44 am

FILE NOT FOUND CAN YOU REUPLOAD

sad rawr - February 2, 2011, 9:23 am

the link doesnt work for meh :(

looks good. wish i could get it! lol

wretch - February 2, 2011, 8:13 pm

upload to mediafire i will re-download and post links.

I_Learning_I - March 18, 2011, 5:25 pm

What's the method for flood? (Please don't answer PoD!!!)

Syn Flood?

sekuktawa - April 3, 2011, 2:16 am

please reupload it the link is broken....

but thank in advance for the info...

Froggerpfc - June 16, 2011, 11:55 am

Links not working unfortnatly

PhoenixDub - July 24, 2011, 1:41 am

For the port, Put it as 0 , or the real port of the IP? Nvm, figured it out. :D . .

Andy1337 - December 6, 2011, 6:57 am

Awesome!! Ill check it out! :D And post proggie..

DanDavis_ - December 7, 2011, 11:19 am

send me link, the file has been removed for something

GoblinHF - December 7, 2011, 11:26 am

This thread is very old , it's still working ?

nobyl3s - December 17, 2011, 4:47 pm

hey man can u please send me another link to download i can't download at rapaidshare. Thank's :)

punk25 - December 17, 2011, 5:49 pm

hey bro this dos tool really works/???
cuz i really need one to dos people and sites

Refresh - December 18, 2011, 6:00 pm

Is the download file going to be put up again? I guess i came too late.

zekage2 - December 19, 2011, 10:16 pm

It looks really cool and i want to try it but I can't because the link is broken. Can you please reupload it? :)

Henni1000xxx - January 24, 2012, 7:23 am

Hi, I would really like to test it.
Can you send me a download Link?

bachusteam - January 25, 2012, 11:14 pm

please put a new address for download. thank you

OneTXxL - January 28, 2012, 5:20 pm

send me link please ...)

The message is

Flu???™ - March 9, 2012, 3:13 am

Guys this is from 2009. I think he already knows the link is dead. But if not, I would also appreciate a new link.

agencyuri13 - March 21, 2012, 12:40 am

send me a new link please? would really appreciate it..

alignment - April 4, 2012, 11:54 pm

Links broke man)': Thats an shame :o

roninn21 - April 5, 2012, 2:22 am

Thank you very much

I was looking for and found Bakd

ChinoTorres07 - April 14, 2012, 11:08 am

LINKs dead , can you PM me for UP link ?

0whois0 - April 14, 2012, 12:01 pm

Tnx m8, it seams awesome. Good job!!!

Onixius - April 14, 2012, 12:01 pm

HMM can u give me this booter ?>? can u agree so pm me thanks in advanced

UnknownHacker1 - April 15, 2012, 9:03 pm

Can i have this?

Because its already deleted.

Just pm me and put it in mediafire Please?

crazy5150 - April 16, 2012, 12:17 am

hmm i guess ill have to check it out .. looks good for wipping it up out of no where

anthony12309 - April 16, 2012, 12:28 am

Finally not a share cash download link

Naftalina - April 16, 2012, 2:25 am

The link is broken... Please add a new one...

Anoncreyy - April 11, 2016, 1:11 pm

An other link please ? Ty so much
(Big up, but I search this tool...)

Lulzbent - April 11, 2016, 1:26 pm

Grave dinging.....

trickytries - May 20, 2016, 9:37 pm

The link seems to be broken.

droflim - July 10, 2020, 11:51 am
