Thread: [In~direct's PC cleaning](#)

Vexes - January 8, 2011, 7:43 pm

I am wanting to disinfect people's machine as a decent way to contribute and to protect sensitive data from being passed to another person, i enjoy disinfecting machines and would love to help you. If you want to get your machine checked out then just pm me :)

Agent Shark - January 8, 2011, 7:56 pm

May I ask what tools you will be using?

cobija - January 8, 2011, 7:57 pm

Why dont you just wait for posts here and reply to them?

Agent Shark - January 8, 2011, 7:58 pm

(Jan 8, 2011 08:57 PM)cobija Wrote: [\[CITE\]](#) Why dont you just wait for posts here and reply to them? Taking a wild guess.

Multiple users with different requests = misconception of instructions.

zaraki023 - January 8, 2011, 8:11 pm

better idea .since I'm new and your so bored why don't you help me out my out by hacking www.legendofbleach.com so that I can get dp points which are like points the site uses to get things like a new picture and stuff like that .very harmeless dp points really are to the site,like I'm not asking for you to like kill the site but to help me help/help you kinda thing.like your bored and you could join the site and like together we could dominate like,I'm username:ryuzaraki dude that's my character in the anime world of theirs ,so if you made a character and you sent me like a shit load of dp points then I could get some sick stuff.or even better!!!! if you hacked the gems and money on my account to a reasonable amount then together we could create our own clan and like be like anime captain dudes. it would kick ass I'm telling you.so please respond back so that I know if you want to have some fun and get out of the bored mood that your in man.and if you need my password to get started Ill give it to you cause I'm that willing to have some fun an shit.

We assist in malware removal and computer problems.

-Disruption

Vexes - January 8, 2011, 8:39 pm

I will be using things such as regedit (once i find sign of infection), cce, and Mbam for a post-help scan in case i missed something :)

Agent Shark - January 8, 2011, 8:41 pm

I wish you the best of luck mate. If you need help shoot me a pm.

Vexes - January 8, 2011, 8:44 pm

I actually want to attempt to make a white-hat helper group with a userbar and everything, i would need a co-leader. That way HJT members can do their thing and we can do what we need to in this section :S

If you wanna help me get that started let me know ^_^

Lassy - January 8, 2011, 8:47 pm

I have 3209 infected files in my computer.

They are scrambled everywhere.

Help please.

Spoiler ([Click to View](#))

Joking

Nice service you have here.

That's a negative. I tried making a group similar and got suspended.

cobija - January 8, 2011, 9:09 pm

Post an application OP. It will take a while before you come a teacher (probably a year, training takes about 4-6 months and another few months before you become a teacher).

Vexes - January 8, 2011, 9:13 pm

I posted an application (post27 on the thread) I even gave up my entire blackhat activities and NEVER got an answer, i was thinking of going on another forum to get training but i would prefer it be here on HF

cobija - January 8, 2011, 9:13 pm

OK, then I recommend waiting. There are plenty of people who are in the same mindset as you ?

Vexes - January 8, 2011, 9:14 pm

Cobija can you actually pm me i want to ask you about some stuff :)

Agent Shark - January 8, 2011, 9:14 pm

Don't worry. I have been waiting for 5 months. It takes time.

cobija - January 8, 2011, 9:19 pm

Yeah, eventually you will make it, thats all I can say haha.

Vexes - January 8, 2011, 9:20 pm

Haha hopefully you are talking about both disruption and i instead of just him :p I already got accepted into a training program and am working on the practice test as we speak. It's actually really simple. I want to get into the group here so i can help people on the forums >_<

Agent Shark - January 8, 2011, 9:21 pm

(Jan 8, 2011 10:19 PM)cobija Wrote: [\[CITE\]](#) Yeah, eventually you will make it, thats all I can say haha.

I know that. Patience is the key I suppose.

Vexes - January 8, 2011, 9:38 pm

Still doing this, i am seriously fuckin' bored here D:

laduerb22 - January 9, 2011, 3:28 am

You can give it a try on me. I never use an AV so I'm sure I probably have some infections.

Vexes - January 9, 2011, 3:47 am

Imfao. "some" You had 209 bits of adware on your machine.

Tune - January 9, 2011, 3:49 am

Sorry for being off topic, but is your signature a Bishada and Jericho from APB?

laduerb22 - January 9, 2011, 4:02 am

Thanks for the help. He cleaned hundreds of infections off my computer within 5 minutes.

Vexes - January 9, 2011, 4:06 am

^_^ not a problem, they were easy as fuck to find.

Eminent Fate - January 9, 2011, 5:54 am

By running CCE, and assuming DACS is working, there is very little malware which can come past :)

Vexes - January 9, 2011, 5:55 am

I agree with that Coco, i am thinking of accepting donations :S

Eminent Fate - January 9, 2011, 6:02 am

Accepting donations for disinfecting people :O?

Vexes - January 9, 2011, 6:06 am

I was kidding xD i would never charge for something i enjoy!

Eminent Fate - January 9, 2011, 6:06 am

So, what is your opinion on CCE then. Seeing as you are using it,. Looking past the troubles with DACS :)?

Vexes - January 9, 2011, 6:11 am

Yeah, it works great in identification i mainly use killswitch and a quick scan. That way i can still see what i need to find and then i specify in full scan how to disinfect :S

Eminent Fate - *January 9, 2011, 6:15 am*

Well yeah. Killswitch based of process hacker is a great application. Should have more recognition in this forum ^^

Vexes - *January 10, 2011, 3:52 am*

If anyone at all needs this please let me know :)
