<http://chunkhost.com/>

I'm going to set up a minecraft server, also, I got my "chunk", now I have to check the CPU speed, I'll post later with it.

Works!

I don't know the CPU speed, but it works for me, see later post.

Tutorial on using this to host a minecraft server: <https://hackforums.net/showthread.php?tid=962199>

You need more than 512 mb to PLAY Minecraft let alone host a server unfortunately. Also, it's only for the first month as a note to potential users and U.S. only.

512MB is more then enough to host a server for 2, which is what I'm going to do.

Nice. I'll try this out. How long is the beta up for?

Wet - January 8, 2011, 9:50 pm

FAIL. you need to enter cc info to verify your from USA

Static™ - January 8, 2011, 9:51 pm

Which OS do I use..? I'm confused!

Brilliant™ - January 8, 2011, 9:54 pm

Fuck!! asks for credit card ! & I don't think any one would like to provide the sensitive information like that. Then will charge some 1.xx \$ for sign up & will refund that immediately to verify that you are in US or not.

Anyways thanks to OP for that.

Static™ - January 8, 2011, 9:55 pm

It asks for a card, really?

I don't think it really matters, their all linux. try Ubuntu 10.04

Static™ - January 8, 2011, 9:56 pm

We don't know if this is a real company, probably a fake database, and VPS.

Nift - January 8, 2011, 9:57 pm

Maybe, thats why I'm not signing up. Probably gonna steal my cc info >_>

Brilliant™ - January 8, 2011, 9:59 pm

Yeah, It does. The OS available are only linux.

Looks like a scam when I enter the right CC details it says it's can't verify them because of a strange reason so I think it is stealing the CC info for some reason or other >,>

that's only an oppion it up to you if you wanna signup or not :)

nick__name - January 8, 2011, 10:10 pm

<<WARNING>> It's either a scam or closed beta, so no point in entering your info. I entered my cc info (created a virtual account with a low limit through my bank) and after it verified everything was correct, it says:

Quote:Sadly, we are already at capacity for our beta test, but will remedy that soon and get in touch with you as soon as your Chunk has been made live!

Thanks a ton for helping us beta test! We really appreciate it! We'll give you plenty of notice when we think we're ready to start charging people money.

Your pal,
ChunkHost

Edit: and even though it says that the \$1.01 is refunded instantly after the charge is made, the \$1.01 charge is still showing up on my card...

I'm signed up currently setting my minecraft server up..

I don't know what happened on your end.

Also, the \$1.01 charge should be "pending", it will be removed in a couple days.

Nimuel - January 8, 2011, 10:19 pm

don't enter any of your credit card details.

it looks really shady. 90% sure its a SCAM.

It's a gift card, I take necessary precautions.

Anyway, for some reason the SH command isn't working..
Any solutions?

I get:

java.bin: ./install.sfx.1181: /lib/ld-linux.so.2: bad ELF interpreter: No such file or directory
Failed to extract the files. Please refer to the Troubleshooting section of
the Installation Instructions on the download page for more information.

Got it to work!
69.172.229.237 is the IP for my server.

Max players is two(I plan on playing with my friend once he gets on).

savvymatthew - January 12, 2011, 5:10 pm

those are some good prices for hosting

guiltygearz - March 19, 2011, 3:35 pm

base on the last post date, obviously not lol.

gomomo123 - March 20, 2011, 3:18 pm

PM me for a free Vps, and tell me why u need it

SoulHarvester - March 21, 2011, 2:24 pm

It's legit I just got mine and it is a legit company.

Vouched.

Adrian802 - March 21, 2011, 2:25 pm

Never played minecraft but would love to check it out someday. Just don't have time!
