Haha, sorry bro, I'm not selling the source though. To much work was put into this.

KACTA - January 11, 2011, 9:29 pm

Mr. pBot, what you've just said is one of the most insanely idiotic things I have ever heard. At no point in your rambling, incoherent thread were you even close to anything that could be considered a rational thought. Everyone in this thread is now dumber for having listened to it. I award you no points, and may God have mercy on your soul.

Yeah you really must have worn down your right click button on your mouse copying and pasting all this crap.

"Too much work" doesnt sell for under 10 dollars, gtfo.

Listen avenge, I'm new to coding ok. Anything I do, even the smallest things make me happy. For a natural coder this wouldn't take more than a week. For someone who's learning C++ slowly, it's a huge leap. (Jan 11, 2011 10:29 PM)?venge. "Too much work" doesn't sell for under 10 dollars, gtfo. You're contradicting yourself. If I sold it for more than \$10, no one would buy it simply because it's UDP only. I'd probably get made fun of for it.

On the other hand, selling it at a lower price since there's only 1 command and not many people know who I am is a great way to start off a small foundation. And I've already gotten 2 sales. 2 sales for \$5 each in 25 mins or no sales at all for \$10.

Lith - January 11, 2011, 9:40 pm

You're probably not known because you joined today to advertise your copy and pasting work.

It doesn't matter what the functions are. Have you seen ganja bot? He had like 3 fake functions... P2P, UAC Bypass, FaceBook Spread and LAN Spread were all fake. Yet everyone thought they worked just because the bot responded to the commands.

I could've easily lied as well but I'm showing you the truth. pBot has the greatest UDP. There is no better.

Shut the fuck up you fail troll. No one likes you, look at your rep. Honestly, stop being an immature 14 year and get the fuck off damn site. I hate how this shit is now overrun by fail trolls and kids who have no knowledge of anything.

Looks what I found, a neg rep towards you:

"You asked for rep in a pm in the past, now you think you are mature reporting to staff, good job. You changed you name 200+ times to fool people you are a "new person", This time this sticks to your account, why? Because I dont like you..."

^^ This is exactly what a 14 year old boy who has no social life would do.

Negative (-5): Reputation Abuse. Do not ask 'rep4rep' on or offsite, specifically in this case minecraft. Joking isn't an excuse btw.You're lucky I just don't have enough proof for repfuck lol; close though.

Yeah bro, was framed for that seeing I can't play minecraft without lag on my system.

Joshc - January 11, 2011, 10:08 pm

See, I liked your thread, until you had to assume that.

There is better. UDP is a simple protocol, not too hard to get a strong UDP. And HF isn't even close to the best bots. Perhaps you meant it's the strongest UDP flood on HF, and even then, I smell bullshit.

Predator was selling it for me you fucking idiot, he has a big name so I thought he can get some sales. Obviously ban evading and trying to sell something doesn't work. So, 0% Predator, you are wrong?

Exactly what I mean by retarded prepubescent 14 year old boys. Please get off HF and continue to listen to your Justin Bieber music.

Lith - January 11, 2011, 10:11 pm

Justin Bieber is my idol though, yo.

I doubt he was makin' sales for you.

Yea, definitely. pBot is nothing compared to those out of country. Especially Russia. I should have stated best ddos on HF. Which I think is because I hit myself offline with 3 bots for a 20 second hit. It takes 20-30 xr to hit me.

I don't need a review, I already have 2 vouches both with good rep on the bot. Stop asking to review when you're not even an ub3r nor a reviewer.

Hecker21 - January 13, 2011, 12:26 pm

I suggest you do not buy this. It's most likely a public source.

The last thing he was selling was A source to a bot he got off hackforums (Was a public source, Didn't even change the name).
