Thread: [Fast Port Scanner v1.0](#) -- [\[Scan in a few seconds!\]](#)

psy_ko_mat - July 1, 2009, 12:01 pm

Well with the excellent DoS tool of t3c4i3's let me show you a fast Port Scanner ?

Quote:RE: t3c4i3's Port Scanner v1.00

(Yesterday 03:02 PM)psy_ko_mat Wrote: omg very very slow Oo

Mate... i've never tried other port scanning tool... but if you really think you can get the vulnerable port in 1 minute that's impossible.... Scanning 0 - 65535 =) Might take some time... ?

Well sry but this tool takes a few seconds.

It's a commun tool we made few years ago with a team "Global Web Monitor" i was a noob and i made some researches for the tool and a little of design (with Paint i remember LolZ)

So here is the tool :

[img]<http://www.noelshack.com/uploads/16062009/fps024874.jpg>[/img]

Very simple : Put the IP (easy to find with <http://netzome.com/>) and Scan>Start

Oh and to finish it took 5 seconds...no sorry 6 ! ?

And to dld it :

@ H3LL

I know you are a great coder. you don't have to explain it to the noobs here. :)

Damn... just felt a bit bad... ? Time to take my rest... kut =) see you around in the next 8 hours =)
Wonder what will happen while i'm away ?

psy_ko_mat - July 1, 2009, 1:03 pm

Well i didn't check if this tool was on the www i just found it in my files.

Yes i was in this team, french team exactly with some members of the scene now.

And test the tool u'll see if i said bullshits i checked for vbforums and results in 6seconds!

Not a noob i share this tool, u said me it's not possible to check the open ports shortly, i show you it's possible and i do it aldo for all the members. That's all

I think the pple 'll choose the faster ;)

zackwg23 - July 1, 2009, 1:06 pm

Anyone tried this out that can give any feedback?

123 - July 20, 2009, 6:10 am

Is there a thread or tut on what to do with vulnerable ports?

sgaltair - August 1, 2009, 9:02 pm

I tested it and perhaps I'm just thick? It doesn't seem to want to scan IP ranges, just the first IP you put in. Requires a reset to scan a new IP, even though you type in a new one. But it's hella fast.

Am I missing something? I don't mean to criticize, I just want to get the fullest use out of these tools ?

IDGAF - August 1, 2009, 9:26 pm

I_Learning_I - March 18, 2011, 5:24 pm

Well, good job sharing this tool, although like H3LL said this can easily be found in the internet, you provide no proof that is yours, anyhow, that's none of my business.

I haven't tried it, for simple reasons such as, very very limited functionality, once you learn to use Nmap a simple port scanner like this it's completely useless and at that speed unless you use Raw Sockets and a type of scan that won't leave as many traces your IP will be banned/suspended in a matter of seconds also.

The biggest problem isn't of making a fast port scanner, it's to make it stealthy.

I mean ffs you got as many ports as the server, how hard can it be to put 1 connection per port? -."

I don't know what's the deal between you and H3LL but take your beef out or at least make some real shit before your try to diss anyone, because from what I've seen you've proven that you know a tool, you've shown A tool that is fast, which crash's on Windows 7... massive fail.

Start by making something with options such as SYN Scan, FIN Scan, anythign that uses raw socket will be completely different from some silly send();
