Tutorial link: [Radiance's Insane Sig Tutorial](#)

PSD download link: [Radiance's Insane PSD](#)

Tutorial and sig both made by me. The psd is 25MB so downloading may take a while. I highly recommend you use the tut together with the PSD.

If you have any questions or comments just post and I'll try to answer them the best I can.

Ohh and I'd love to see some outcomes, so if you've followed the tut please post here

+REP and thanks are appreciated. ?

Conspiracy - July 1, 2009, 1:12 pm

Sig looks great , getting the tut now. Thanks.

Alpha Bruh - July 1, 2009, 1:18 pm

It's not really a signature worthy of a tutorial ;/

Severe - July 1, 2009, 2:49 pm

You sir have some problems..... Its awesome.

Alpha Bruh - July 1, 2009, 3:00 pm

Yes i do have many problems but it looks just simple to me... and I've become very mean for some reason ;/

Severe - July 1, 2009, 3:08 pm

TO SIMPLE??? Who the F are you you disgrace to Gfx.

Its a really nice signature..

You've become mean because you think its the best way to go to get better at gfx or something if so you should stop right now.

Back on topic.

Radiance - July 1, 2009, 4:45 pm

Let's keep this thread clean plz. Ponxly has the right not to like the sig or the tutorial. It's all good. To everyone who does like it, don't forget to leave a comment so I know if ppl actually find this tut useful or not. I would also love to see outcomes as well :)

DudeWhereIsMyWeed - July 1, 2009, 5:02 pm

you don't have to read it all in one go ?

The sig was also a lot of layers so I couldn't really ahve made it shorter if I'd liked to ?

Hehe man think beyond the sig. Tutorials are meant to stir your inner imagination. Its only to show
you the tips or ways to create something so you can implement those tips into your workflow.

Radiance - July 6, 2009, 12:40 am

yep take from it what you can
