Thread: [\[C#\] Url2BB v1.0 | Convert HF Url's to BB Code](#)

My Life - January 12, 2011, 6:35 am

Hey there,

I had this idea for a quite long so I decided to do it . The whole idea is when you post an application for a group and asks you for any of your work or your threads you post the Links of HF .
But It seems pretty ugly when we have an application like this one with a lot of links:

Spoiler [\(Click to View\)](#)

Quote:Link to a contribution you've made for HF:

<https://hackforums.net/showthread.php?tid=923552>

<https://hackforums.net/showthread.php?tid=915146>

<https://hackforums.net/showthread.php?tid=922981>

<https://hackforums.net/showthread.php?tid=497268>

It wouldnt be better if this could be turn into this one :

Spoiler [\(Click to View\)](#)

Quote:Link to a contribution you've made for HF:

[\[Official\] DragCave Clicking/Discussion - Page 1](#)

[Want to know if your dragon eggs are rare? - Page 1](#)

[Pokemon Black/White ENGLISH - Page 1](#)

[All your problems are belong to us. - Page 1](#)

So , this simple program actually converts the URL's to BB Code with the specific URL title.

Already fixed it issue.

Hope you like it :)

Vysse - January 12, 2011, 8:16 am

Might I suggest a copy all button...cool idea though and good job :D

lol ya bit it'd be convenient if you had a button that did all that... just a suggestion to improve the idea as a whole...
