Imfao! Nice virus dude, but if I'm mistaken and this isn't a virus then my apologize.

This seems like a virus though.

1qq23q - January 15, 2011, 3:12 am

it isnt scan it urself it isnt a virus lol.

Relentless™ - January 15, 2011, 3:19 am

If this didn't look so damn fishy I'd probably have downloaded it.

But with what people are saying, I'd hazard a guess that it's infected.

1qq23q - January 15, 2011, 3:29 am

dude .

1st look urself.

If it was a virus it was probaly already removed from the site.

2nd.

the reason that many people say that is becouse its just a nice tool and im a new member.

But i need to earn status.

How i do that? posting tools i made.

JIT-foutopsporing

Als u JIT-foutopsporing wilt inschakelen, moet in het configuratiebestand voor deze toepassing of computer (machine.config) de waarde jitDebugging in het gedeelte system.windows.forms zijn ingesteld. De toepassing moet ook zijn gecompileerd terwijl foutopsporing was ingeschakeld.

Bijvoorbeeld:

```

<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>

```

Wanneer JIT-foutopsporing is ingeschakeld, worden onverwerkte uitzonderingen naar het JIT-foutopsporingsprogramma gestuurd dat op de computer is geregistreerd en worden niet door dit dialoogvenster verwerkt.

It works. It just takes a little while to start up. What is annoying, is that it opens hackforum.net and plays the song "Like a G6". A .net error comes, but I just clicked continue and it started up. This is available at pr1nce.webs.com. I wonder why the hell staff removed the link.

They removed the link because it's a virus... Which is why he got banned...

It certainly did not seem like a virus to me though. Good job, OP.
