Thread: [\[WhiteHat Tutorial\] How to improve our PC system and make it cleaner?](#)

morbotz - January 15, 2011, 9:47 am

In this short tutorial gonna try to help you to Clean your registry, deleting old files, update drivers... shortly - Boost our system and make it better.

What do you need?

Driver scanner + Powersuite + RegistryBooster + SpeedUpMyPC

Defragment tool.

CCleaner

You can download from [here](#).

How to scan & update our drivers?

When you download this archive, extract somewhere.

Start installation process. If they ask you for s.k., see below.

When it's finished, open driver scanner from Start>All programs..../from installation folder.

Click on Start Scan.

When it's finished you will be able to update your drivers (video, LAN, sound, etc..) by clicking on Download all.

If it necessary, restart your system.

How to scan for registry errors?

Follow first two steps above.

When it's finished, open registrybooster from Start>All programs..../from installation folder.

Click on Start scan.

Wait a few moments.

When it's ready, there will be a message like this: Quote:Attention: 6 registry errors was found!

.

Click on Fix Errors.

When it's ready: Quote:Your registry has been cleaned.

How to scan for issues and Speed Up Our PC?

When you download this archive, extract somewhere.

Start installation process. If they ask you for s.k., see below.

When it's finished, open sump from Start>All programs.../from installation folder.

Click on Start scan.

Wait a few moments.

When it's ready, there will be a message like this: Quote:Attention! 472 issues are slowing you down.

.

Click on Fix Issues.

Better close the other process for best results.

When it's ready: Quote:472 improvements have been implemented.

How to Defragment our system and how does it help us?

[Disk Defragmenter is a Utility included in Microsoft Windows designed to increase access speed by rearranging files stored on a disk to occupy contiguous storage locations, a technique commonly known as defragmenting. The purpose is to optimize the time it takes to read and write files to/from the disk by minimizing head travel time and maximizing the transfer rate. As of Windows XP, Disk Defragmenter is also used to improve system startup times.](#)

Without using any software. For windows XPGo to My Computer.

Choose disk for defragmenting (C:\; D:\; E:\)

Right-click on it and click on properties.

Go to Tools.

Click on Defragment now

Click Defragment.

Wait a few moments. If system wants, restart your PC.

For Windows 7Go to Start>Search bar

Type Disk Defragmenter.

Follow the steps. It's very simple.

With using software. For windows XP/Vista/7

[Easiest way for defragmenting.](#)

What is CCleaner and how to use?

-Soon

Serial Keys

I have some free serial keys, but I'm not sure if it's allowed here, so I won't share with you, but don't worry. In google there are tons.

For more help

[PM me.](#)

cobija - January 15, 2011, 12:50 pm

I personally dont like using too many third party programs, but I might add to use disk defragmenter, that helps with speed too.

codeprada - January 15, 2011, 12:58 pm

Nice lil tutorial. Those programs really increase performance. Believe me i've been using them. There's also tuneup utilities

RootKing - January 16, 2011, 3:39 am

By adding so many third party programs you reduce memory and increase the processing. But you could just use Disk Defrag, Disk Clean up, and CCleaner as well to help boost, but this is a great tut though +3 rep if I could.

morbotz - January 16, 2011, 4:27 am

Thank you so much guys. I'm happy to help you. :)

I'll update this thread by giving info for ccleaner, MBAM when I have free time.

RootKing - January 16, 2011, 5:35 am

Your welcome, it's a good start nothing is better then helping another fellow.

morbotz - January 16, 2011, 11:29 pm

I added a point with defragmentation, but now I can add info for Ccleaner, because I'm a standard member and cannot edit my posts after 1440 minutes of posting. So, I'll do it here.

What is CCleaner and how to use?

CCleaner is the number-one tool for cleaning your Windows PC. It protects your privacy online and makes your computer faster and more secure. Easy to use and a small, fast download.

Download from [here](#). Use [this](#).

Install it.

Run CCleaner.

If you want for best results and scan, put ticks everywhere.

Click Run Scan.

Wait a few moments.

If it necessary restart your system.
