DAMN NICE!! =D

Love this!

But there were some parts I didn't understand well from the first time.

So I read some parts several times and now I got this: (a project for someone, I made)

Really... Everyone is raving about this, when really all that (someone) will learn from this is the method for importing video.

But, I assume that you have read this tutorial from another website, in my case I saw like three on dailydeviations... So just link it. (?) Just a suggestion

Good job though, I suppose the HF community has never had anything like this.

Nice job xype looks good.

@Velcomusa, maybe there should be less links to other sites and more original tutorials on here? i

never saw this anywhere else i saw a hf member make one of these as i said at the end of the tutorial and i figured it out from there.

your comment that "all that (someone) will learn from this is the method for importing video." well that's all the tutorial was meant to teach, if you have seen this tutorial or know how to do this then move on this is not for you it's for those who posted before you clearly they have found this useful, which is good enough for me.
