Thread: [\[AnimeFAN!\] The Hikki-Drive: Calendars, Artbooks, Eroge, Music & More! \(January 2011\)](#)

Ryuku - January 16, 2011, 3:26 pm

Greetings,

I thought it would be about time to make my contribution to this section; and at what a better time it would come, than the completion of the merging of AnimeFAN and ULLF.

I am constantly updating my external HDD with files, basically considering myself as a keen collector. So about every month I will make a thread which will allow AnimeFAN members to request files for their own collections.

Oh, and that's the best name that I could come up with. Kind of catchy actually.

These files are packed in archives, so please make sure you have installed WinRAR (freeware) in order to extract the files:

Code <http://www.rarlab.com/>

Please take into consideration that I have been collecting for over 3 years now, so do not post these files on your own gay little sites unless you have my permission.

I have heaps of folders with unsorted material, which I will update in the coming months packs.

Please post your request in this thread and state which files you would like. I will upload to filesharing sites only, being either HF or MU. However, I will consider others as long as they are not slow for me.

Upon requesting, please be patient while I deal with what you would like. A lot of these are huge packs, so they can take a while to upload. After that, I will then PM you with the links.

For the sake of others and my own time, I will apply the following restrictions:

- You may request upto a maximum of 5 calendars per day.
- You may request upto a maximum of 5 artbooks/fanbooks per day.
- You may request upto a maximum of 3 music albums/singles per day.
- You may request a maximum of 1 visual novel/eroge per day.

*These restrictions may be lifted under special circumstances.

Some of you may be troubled if the files are infected. I assure you that they are not, since I have spent time in checking each and every packed item. If you would still like proof though, I will do my best to give you a scan report. Take into account that the multi-engine scanners do not accept files that are larger than 20MB.

I want to ask,

Tomoyo After - It's a wonderful life

Do you have english translation patch in it? Or it's still in japanese??

A partial patch was meant to be released on the 10th, but it's been delayed again.

As for now, it can only be manually translated using the ATLAS/AGTH method, which isn't perfect.

That reminds me to add the part about translations into the post, thanks.

I'll add a tutorial link or two to the first post, and that should help a lot of people.

Ok, I've sent you the link again for the Vocaliod illustrations. Apologies for the mix up.

In regards to Kanon, this is the Standard Edition, which means it's the 18+ version. I think you can patch those out though if you want.

Give me a few hours to get this one uploaded please.

That's something that should be posted via PM, not in really big, pink font, in a thread in Anime Adventures. :]

Alright, I'll install it tonight and check for you, and yes, Ecstasy is the adult version. These new types of games have the mini-games too like the baseball matches if I remember correctly.

Bad news. Ecstasy doesn't have a patch, and the original has only been translated upto 7% :(

You can try with the manual translation if you like, but that's probably going to piss you off eventually like it does to me. I don't tend to play if there's no full translations.

Snookie & DoubleRainbow, I'll get to your requests after some sleep.
