Thread: [Neptune Help!!!!!!](#)

?S?????v??? - January 16, 2011, 3:33 pm

I created a server with inbuilt binder it with a .exe program...
To test it. I clicked and the binded program started.....

But when I checked back the e-mail id I provided.. I didn't get any logs...even after waiting a day
.Even though, The logging time provided was 20 min?
Even created a program with other keyloggers. and spred it out. but till now I didn't recieve any logs....

Pls help.?

h-boy - January 16, 2011, 3:39 pm

It sounds like your server is corrupted have you tried repeating the process. Or perhaps try it without the using the binder.

?S?????v??? - January 17, 2011, 2:41 am

Tried without using the binder.. But still the only thing I receive in Email is that "Neptune Test Mail"....Nothing Else..What shall I do now.

Are you making sure you have the correct email ID / pass? Also what kind of email service are you using? (hotmail, gmail..etc)

?S?????v??? - January 19, 2011, 3:11 am

gmail. And am sure its working because I do receive a test mail.

?S?????v??? - January 20, 2011, 10:33 am

The message is too short. Please enter a message longer than 25 characters.

plss help!!

xant - January 20, 2011, 11:15 am

you sure you got the smtp correct? e-mail loggers have been known to have problems, and I heard somewhere that g-mail doesn't work all that well anymore.

?S?????v??? - January 22, 2011, 10:42 pm

Ya everything was correct. i received the Test mail....

autorunman22 - January 22, 2011, 10:55 pm

try using gmail, mine can hack atleast 30 online games, facebook accounts and many more things everyday..

?S????v??? - January 23, 2011, 12:40 am
Yes Am using Gmail only..
