Step 1

Make you floor and what ever shape you want, you can even do this with text.

Step 3

Get a light and put it under the array, then turn the intensity down and add a shadow, after bring the array higher then the shape

Step 4

Get a different array and then put a plane under it.

Step 5

Make you materials, i used a light peach and added a refection and made the same for the floor but with out the refection, then make a new material and add Luminance then add it to the plane and bring it up like this.
